CI GLOBAL ASSET MANAGEMENT

ETF FACTS

CI Galaxy Solana ETF (SOLX.B) - ETF C$ Unhedged Series
Manager: CI Global Asset Management
April 16, 2025

This document contains key information you should know about CI Galaxy Solana ETF. You can find more details about this exchange-traded fund ("ETF") in its prospectus. Ask your representative for a copy, or contact CI Global Asset Management at www.ci.com, by email at service@ci.com or by calling 1-800-792-9355.

Before you invest, consider how the ETF would work with your other investments and your tolerance for risk.

Effective April 16, 2025, the ETF series' annual management fee has been changed from 0.40% to 0.35%. Such management fee will be waived until July 16, 2025, and the Manager may, in its discretion, elect to extend the waiver beyond such date.

The CI Galaxy Solana ETF is an alternative mutual fund. It has the ability to invest in asset classes or use investment strategies that are not permitted for conventional mutual funds. The ETF invests in Solana tokens ("SOL"). Given the speculative nature of SOL and the volatility of the SOL markets, there is considerable risk that the ETF will not be able to meet its investment objectives. An investment in the ETF is not intended as a complete investment program and is appropriate only for investors who have the capacity to absorb a loss of some or all of their investment. An investment in the ETF is considered high risk.

Quick facts

Date ETF started:	April 16, 2025	**Fund manager:**	CI Global Asset Management
Total value on February 28, 2025:	This information is not available because the ETF is new.	**Portfolio manager:**	CI Global Asset Management with portfolio sub-advisor Galaxy Digital Capital Management LP

What does the ETF invest in?

The ETF's investment objective is to provide holders of units with exposure to Solana tokens through an institutional-quality fund platform.

The charts below give you a snapshot of the ETFs investments on February 28, 2025. The ETF's investments will change.

Top investments (February 28, 2025)

This information is not available because the ETF is new.

Investment mix (February 28, 2025)

This information is not available because the ETF is new.

How risky is it?

The value of the ETF can go down as well as up. You could lose money.

One way to gauge risk is to look at how much an ETF's returns change over time. This is called "volatility".

In general, ETFs with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. ETFs with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

Risk rating

CI Global Asset Management has rated the volatility of this ETF as **high**.

Because this is a new ETF, the risk rating is only an estimate by CI Global Asset Management. Generally, the rating is based on how much the ETF's returns have changed from year to year. It doesn't tell you how volatile the ETF will be in the future. The rating can change over time. An ETF with a low risk rating can still lose money.

Low	Low to medium	Medium	Medium to high	**High**

For more information about the risk rating and specific risks that can affect the ETF's returns, see the "Risk Factors" section of the ETF's prospectus.

No guarantees

ETFs do not have any guarantees. You may not get back the amount of money you invest.

How has the ETF performed?

This section tells you how this series of securities of the ETF have performed, with returns calculated using the ETF's net asset value (NAV). However, this information is not available because the ETF is new.

Year-by-year returns

This section tells you how this series of securities of the ETF have performed in past calendar year(s). However, this information is not available because the ETF is new.

Best and worst 3-month returns

This section shows the best and worst returns for this series of securities of the ETF in a 3-month period. However, this information is not available because the ETF is new.

Average return

This section shows the value and annual compounded rate of return of a hypothetical $1,000 investment in this series of securities of the ETF. However, this information is not available because the ETF is new.

Trading ETFs

ETFs hold a basket of investments, like mutual funds, but trade on exchanges like stocks. Here are a few things to keep in mind when trading ETFs:

Pricing

ETFs have two sets of prices: market price and net asset value (NAV).

Market price

- ETFs are bought and sold on exchanges at the market price. The market price can change throughout the trading day. Factors like supply, demand, and changes in the value of an ETF's investments can affect the market price.
- You can get price quotes any time during the trading day. Quotes have two parts: bid and ask.
- The bid is the highest price a buyer is willing to pay if you want to sell your ETF securities. The ask is the lowest price a seller is willing to accept if you want to buy ETF securities. The difference between the two is called the **"bid-ask spread"**.
- In general, a smaller bid-ask spread means the ETF is more liquid. That means you are more likely to get the price you expect.

Net asset value (NAV)

- Like mutual funds, ETFs have a NAV. It is calculated after the close of each trading day and reflects the value of an ETF's investments at that point in time.
- NAV is used to calculate financial information for reporting purposes – like the returns shown in this document.

Orders

There are two main options for placing trades: market orders and limit orders. A market order lets you buy or sell securities at the current market price. A limit order lets you set the price at which you are willing to buy or sell securities.

Timing

In general, market prices of ETFs can be more volatile around the start and end of the trading day. Consider using a limit order or placing a trade at another time during the trading day.

Who is this ETF for?

Investors who:

- want exposure to SOL
- want capital growth over the long term
- can tolerate high risk

A word about tax

In general, you'll have to pay income tax on any money you make on an ETF. How much you pay depends on the tax laws where you live and whether or not you hold the ETF in a registered plan, such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your ETF in a non-registered account, distributions from the ETF are included in your taxable income, whether you get them in cash or have them reinvested.

How much does it cost?

This section shows the fees and expenses you could pay to buy, own and sell this series of securities of the ETF. Fees and expenses, including any trailing commissions, can vary among ETFs.

Higher commissions can influence representatives to recommend one investment over another. Ask about other ETFs and investments that may be suitable for you at a lower cost.

1. Brokerage commissions

You may have to pay a commission every time you buy and sell securities of the ETF. Commissions may vary by brokerage firm. Some brokerage firms may offer commission-free ETFs or require a minimum purchase amount.

2. ETF expenses

You don't pay these expenses directly. They affect you because they reduce the ETF series' returns.

The ETF series' expenses are made up of the management fee, operating expenses and trading costs. The ETF series' annual management fee is 0.35% of the ETF series' value. Because the ETF fund series is new, its operating expenses and trading costs are not available.

Staking Service Fee

CI Global Asset Management, as manager of the ETF, is entitled to receive a fee equal to a portion of the staking rewards generated for the ETF by the staking of SOL held in the ETF's portfolio (net of the fees payable to the validator) such that no less than 65% of the rewards accrue to the ETF and up to 35% of the rewards accrue to CI Global Asset Management. For more information on staking, please see the "Investment Strategy – Staking" section of the ETF's prospectus.

Trailing commission

The trailing commission is an ongoing commission. It is paid for as long as you own the ETF. It is for the services and advice that your representative and their firm provide to you.

This ETF does not have a trailing commission.

What if I change my mind?

Under securities law in some provinces and territories, you have the right to cancel your purchase within 48 hours after you receive confirmation of the purchase.

In some provinces and territories, you also have the right to cancel a purchase, or in some jurisdictions, claim damages, if the prospectus, ETF Facts or financial statements contain a misrepresentation. You must act within the time limit set by the securities law in your province or territory.

For more information, see the securities law of your province or territory or ask a lawyer.

For more information

Contact CI Global Asset Management or your representative for a copy of the ETF's prospectus and other disclosure documents. These documents and the ETF Facts make up the ETF's legal documents.
