

# **ETF FACTS**

# CI Galaxy Multi-Crypto ETF (CMCX.U) - ETF US\$ Series Manager: CI Global Asset Management March 28, 2024

This document contains key information you should know about CI Galaxy Multi-Crypto ETF. You can find more details about this exchange traded fund ("ETF") in its prospectus. Ask your representative for a copy, or contact CI Global Asset Management at www.ci.com, by email at service@ci.com or by calling 1-800-792-9355.

Before you invest, consider how the ETF would work with your other investments and your tolerance for risk.

CI Galaxy Multi-Crypto ETF is an alternative mutual fund. It has the ability to invest in asset classes or use investment strategies that are not permitted for conventional mutual funds. The specific strategies that differentiate this ETF from conventional mutual funds include the ability to borrow cash to use for investment purposes. While these strategies will be used in accordance with the ETF's investment objectives and strategies, during certain market conditions they may accelerate the pace at which your investment decreases in value.

## What does the ETF invest in?

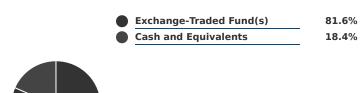

The ETF's investment objective is to provide holders of units with managed exposure to certain digital assets as selected by the Manager, using a rules-based, momentum signaling strategy.

The charts below give you a snapshot of the ETFs investments on January 31, 2024. The ETF's investments will change.

## Top investments (January 31, 2024)

1. CI Galaxy Bitcoin ETF (ETF US\$ Series)	57.4%	
2. CI Galaxy Ethereum ETF (ETF US\$ Series)	24.2%	
3. Cash & Cash Equivalents	18.4%	
Total percentage of top 3 investments	100.0%	
Total number of investments	3	

## Investment mix (January 31, 2024)

## How risky is it?

The value of the ETF can go down as well as up. You could lose money.

One way to gauge risk is to look at how much an ETF's returns change over time. This is called "volatility".

In general, ETFs with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. ETFs with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

# CI Galaxy Multi-Crypto ETF (CMCX.U) - ETF US\$ Series

## Risk rating

CI Global Asset Management has rated the volatility of this ETF as high.

This rating is based on how much the ETF's returns have changed from year to year. It doesn't tell you how volatile the ETF will be in the future. The rating can change over time. An ETF with a low risk rating can still lose money.

Low Low to medium Medium to high High

For more information about the risk rating and specific risks that can affect the ETF's returns, see the "Risk Factors" section of the ETF's prospectus.

## No quarantees

ETFs do not have any guarantees. You may not get back the amount of money you invest.

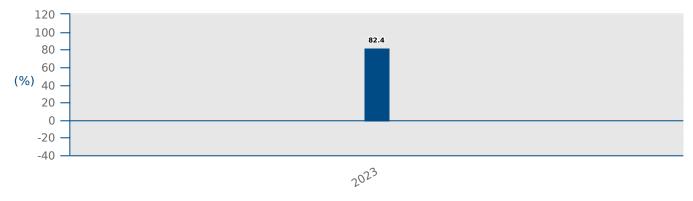

## How has the ETF performed?

This section tells you how this series of securities of the ETF have performed over the past 1 calendar year(s). Returns<sup>1</sup> are after expenses have been deducted. These expenses reduce the ETF's returns.

<sup>1</sup>Returns are calculated using the ETF's net asset value (NAV).

## Year-by-year returns

This chart shows how this series of securities of the ETF performed in the past 1 calendar year(s). This ETF series has not dropped in value in the last 1 calendar year(s). The range of returns and change from year to year can help you assess how risky the ETF has been in the past. It does not tell you how the ETF will perform in the future.

## Best and worst 3-month returns

This table shows the best and worst returns for this series of securities of the ETF in a 3-month period over the past 1 calendar year(s). The best and worst 3-month returns could be higher or lower in the future. Consider how much of a loss you could afford to take in a short period of time.

	Return	3 months ending	If you invested \$1,000 at the beginning of the period	
Best return	41.2%	December 31, 2023	Your investment would rise to \$1,412.	
Worst return	-7.2%	September 30, 2023	Your investment would drop to \$928.	

## Average return

As at January 31, 2024, a person who invested \$1,000 in this series of the ETF since inception has \$918. This works out to an annual compounded rate of return of -4.2%.

# **Trading ETFs**

ETFs hold a basket of investments, like mutual funds, but trade on exchanges like stocks. Here are a few things to keep in mind when trading ETFs:

## Pricino

ETFs have two sets of prices: market price and net asset value (NAV).

# Market price

- ETFs are bought and sold on exchanges at the market price. The market price can change throughout the trading day. Factors like supply, demand, and changes in the value of an ETF's investments can affect the market price.
- · You can get price quotes any time during the trading day. Quotes have two parts: bid and ask.
- The bid is the highest price a buyer is willing to pay if you want to sell your ETF securities. The ask is the lowest price a seller is willing to accept if you want to buy ETF securities. The difference between the two is called the "bid-ask spread".
- · In general, a smaller bid-ask spread means the ETF is more liquid. That means you are more likely to get the price you expect.

# CI Galaxy Multi-Crypto ETF (CMCX.U) - ETF US\$ Series

## Net asset value (NAV)

- · Like mutual funds, ETFs have a NAV. It is calculated after the close of each trading day and reflects the value of an ETF's investments at that point in time.
- · NAV is used to calculate financial information for reporting purposes like the returns shown in this document.

### **Orders**

There are two main options for placing trades: market orders and limit orders. A market order lets you buy or sell securities at the current market price. A limit order lets you set the price at which you are willing to buy or sell securities.

#### Timing

In general, market prices of ETFs can be more volatile around the start and end of the trading day. Consider using a limit order or placing a trade at another time during the trading day.

## Who is this ETF for?

### Investors who:

- want exposure to digital assets, including but not limited to bitcoin and/or Ether
- · want capital growth over the long term
- can tolerate high risk

#### A word about tax

In general, you'll have to pay income tax on any money you make on an ETF. How much you pay depends on the tax laws where you live and whether or not you hold the ETF in a registered plan, such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your ETF in a non-registered account, distributions from the ETF are included in your taxable income, whether you get them in cash or have them reinvested.

### How much does it cost?

This section shows the fees and expenses you could pay to buy, own and sell this series of securities of the ETF. Fees and expenses, including any trailing commissions, can vary among ETFs.

Higher commissions can influence representatives to recommend one investment over another. Ask about other ETFs and investments that may be suitable for you at a lower cost.

## 1. Brokerage commissions

You may have to pay a commission every time you buy and sell securities of the ETF. Commissions may vary by brokerage firm. Some brokerage firms may offer commission-free ETFs or require a minimum purchase amount.

## 2. ETF expenses

You don't pay these expenses directly. They affect you because they reduce the ETF series' returns.

As at December 31, 2023, the total ETF series' expenses were 1.98%. This equals \$19.80 for every \$1,000 invested.

	Annual rate (as a % of the ETF series' value)
Management expense ratio (MER)	
This is the total of the ETF series' management fee and operating expenses. CI Global Asset Management waived or absorbed some of the series' expenses. If it had not done so, the MER would have been higher.	1.03%
Trading expense ratio (TER)	
These are the ETF series' trading costs.	0.95%
ETF expenses	1.98%

## **Trailing commission**

The trailing commission is an ongoing commission. It is paid for as long as you own the ETF. It is for the services and advice that your representative and their firm provide to you.

This ETF does not have a trailing commission.
