Management Report of Fund Performance for the period/year ended December 31, 2023 (Expressed in US\$)

This annual management report of fund performance contains financial highlights but does not contain the complete annual financial statements of the investment fund. You can get a copy of the annual financial statements at your request, and at no cost, by calling 1-800-792-9355, by writing to us at CI Investments Inc., 15 York Street, Second Floor, Toronto, ON, M5J 0A3 or by visiting our website at www.ci.com or SEDAR+ at www.sedarplus.ca.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

INVESTMENT OBJECTIVE AND STRATEGIES

The investment objective of the CI Galaxy Multi-Crypto ETF (the Fund) is to provide unitholders with managed exposure to certain digital assets as selected by CI Investments Inc. (the Manager), using a rules-based, momentum signaling strategy.

To achieve its investment objective, the Fund primarily invests in a mix of Exchange-Traded Funds (ETFs), managed by the Manager, that provide exposure to one or more digital assets, including, but not limited to, bitcoin and/or ethereum.

The Fund does not intend to directly hold digital assets. The selection of digital assets for inclusion in the portfolio will be determined by the Manager, based on the availability of ETFs or investment funds managed by it. The Fund intends to invest in CI Galaxy Bitcoin ETF (the Bitcoin ETF) and CI Galaxy Ethereum ETF (the Ethereum ETF), each of which is an ETF currently managed by the Manager.

The Fund utilizes a model that incorporates moving averages to signal positive or negative momentum as an indicator to increase or decrease exposure to digital assets within the portfolio. With respect to the digital assets portfolio, the Fund will rebalance quarterly to a weighting of 50% Bitcoin ETF and 50% Ethereum ETF, or such other weighting as determined by the Manager from time to time.

The Fund may invest a substantial portion of its assets in cash, cash equivalents or other money market instruments based on negative momentum signals from the rules-based strategy or in order to meet its current obligations or for tactical purposes.

In the event of adverse market, economic or political conditions, the net asset values of the Bitcoin ETF and the Ethereum ETF may decline, possibly resulting in the Fund investing all or substantially all of its assets in cash, cash equivalents or other money market instruments.

For a complete discussion of the Fund's investment objective and strategies, please refer to the Fund's most recently filed simplified prospectus.

RISK

No changes affecting the overall level of risk associated with investing in the Fund were made during the period/year. The risks of the Fund remain as discussed in the Fund's most recently filed simplified prospectus or its amendments. The Manager reviews the risk rating for the Fund on an annual basis, at a minimum, based on the methodology mandated by the Canadian Securities Administrators to determine the risk level of the Fund. Any change to the risk rating made during the period/year was as a result of such review and was not a result of any change to the investment objective, strategies or management of the Fund.

RESULTS OF OPERATIONS

The Fund's net assets increased by \$6.1 million to \$12.2 million from December 31, 2022 to December 31, 2023. The Fund had net sales of \$3.3 million for the year. The portfolio's performance increased assets by \$5.4 million. The Fund paid distributions totalling \$2.6 million. ETF US\$ Series units returned 82.4% after fees and expenses for the one-year period ended December 31, 2023. Over the same time period, the Fund's benchmark returned 122.6%. The benchmark is a combination of the Bloomberg Galaxy Bitcoin Index 50% and the Bloomberg Galaxy Ethereum Index 50% (the Benchmark or the Index).

The following commentary pertains to the results of operations of the Underlying Funds.

Market sentiment was positive to finish the year. Inflation continued to decline, with the U.S. consumer price index falling to 3.1% in November 2023, after peaking in mid-2022 at 9.1%. U.S. gross domestic product growth remained strong. In the latter part of 2023, investors were pricing in five interest rate cuts of 25 basis points each for 2024, sending riskier assets higher. The "Magnificent Seven" stocks (consisting of Apple Inc., Amazon.com Inc., Alphabet Inc., Meta Platforms Inc., Microsoft Corp., NVIDIA Corp. and Tesla Inc.) dominated stock market performance, with a return of 107.01% for the year. These stocks benefited from rising enthusiasm for artificial intelligence.

Bitcoin finished the year up 153.0%, outperforming major stock indexes, including the S&P 500 Index (up 26.3%) and the Nasdaq 100 Index (up 55.1%). The upcoming anticipated approval of the spot Bitcoin exchange-traded fund (ETF) and the Bitcoin halving event drew interest from buyers. Spot Bitcoin ETFs would allow institutional and traditional retail investors to access Bitcoin exposure in a familiar product wrapper alongside their portfolios. Bitcoin halving, which occurs once in approximately every four years, reduces the block reward from 6.25 to 3.125 Bitcoin, reducing the flow of new token supply by 50%. Both events present opportunities for positive catalysts, which were largely responsible for Bitcoin's outperformance in the second half of 2023.

CI Galaxy Multi-Crypto ETF

Management Report of Fund Performance for the period/year ended December 31, 2023 (Expressed in US\$)

Ethereum finished the year up 92.1%, outperforming major stock indexes, including the S&P 500 Index (up 26.3%) and the Nasdaq 100 Index (up 55.1%). Despite underperforming Bitcoin, Ethereum had a strong fourth quarter of 2023, ending the year with a positive catalyst heading into 2024. Large U.S. asset managers have filed for spot Ethereum ETFs. This set the stage for a similar price appreciation as Bitcoin, which rose in the lead-up to its ETF. Furthermore, Bitcoin halving events have historically triggered strong performance for other cryptocurrencies and may offer support for mid-2024 and beyond.

The Fund's mandate is to track the performance of Bitcoin and Ethereum. As such, the Fund's portfolio is weighted 100% to Bitcoin and Ethereum. We increased the Fund's positions in Bitcoin and Ethereum in line with share creations and trimmed the Fund's positions in Bitcoin and Ethereum in line with share redemptions.

Overall, the Fund underperformed its benchmark for the year.

RECENT DEVELOPMENTS

Economic data suggests the U.S. economy may avoid a recession. With impending interest rate cuts and an upcoming presidential election later in 2024, we can expect volatility in the coming year.

RELATED PARTY TRANSACTIONS

Manager, Portfolio Manager and Trustee

CI Investments Inc. is the Manager, Portfolio Manager and Trustee of the Fund. CI Investments Inc. is a subsidiary of CI Financial Corp. The Manager, in consideration of management fees, provided management services required in the day-to-day operations of the Fund.

(1) This information is derived from the Fund's audited annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on unitholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.
