RESULTS OF OPERATIONS

The Fund's net assets decreased by \$55.4 million to \$130.1 million from December 31, 2022 to June 30, 2023. The Fund had net redemptions of \$47.9 million for the period. The portfolio's performance decreased assets by \$0.3 million. The Fund paid distributions totalling \$7.2 million. The Hedged Common Units returned -1.2% after fees and expenses for the six-month period ended June 30, 2023. Over the same time period, the Fund's benchmark returned 1.5%. The benchmark is the S&P/TSX Global Gold Total Return Index (the Benchmark or the Index).

Globally, short-term interest rates continued to rise, with most central banks hiking overnight interest rates at least twice during the first half of the year. Expectations for interest rate cuts peaked in early March 2023 when a liquidity crisis forced various regional banks to shut down, causing the regulators to provide additional liquidity.

Despite higher interest rates, global equities made significant gains, particularly in U.S. mega-capitalization stocks. Developments in artificial intelligence (AI) significantly boosted information technology stocks, driving the NASDAQ 100 Index to its best first-half year performance ever. U.S. equity markets were also buoyed by signs of moderating inflation and economic resilience, despite offsetting data in manufacturing and personal savings.

Annual inflation slowed to 3.0% in the United States and 3.4% in Canada at the end of the period, compared to gross domestic product growth of 2.0% and 1.7%, respectively.

The information technology sector led the market, with computer chipmakers in the AI supply chain benefiting from a surge in demand for compute capability. The consumer discretionary and consumer staples sectors also performed well as continued stimulus and existing savings buoyed personal spending. Utilities and real estate sectors underperformed as higher interest rates hurt these businesses. Energy sector stocks struggled as the underlying commodity price of oil also declined.

Elsewhere, Japanese stocks reached their highest level in over 30 years, partly because of foreign inflows, but also aided by the more conservative stance by the Bank of Japan compared to central banks in the rest of the world. Chinese economic growth, however, saw a weaker-than-expected recovery, worsened by growing tensions between the United States and China.

The Fund underperformed its benchmark for the period. The largest individual detractors from the Fund's performance were positions in Sibanye Stillwater Ltd., SSR Mining Inc. and Newmont Corp.

Top individual contributors to the Fund's performance included holdings in Gold Fields Ltd., Kinross Gold Corp. and Endeavour Mining PLC.

RECENT DEVELOPMENTS

Many market participants continue to believe in a potential soft-landing scenario in developed markets, but the likelihood of at least a mild recession is growing. In the United States, rising interest rates and housing costs, a shrinking money supply and removal of stimulus may have a disproportionate impact on the average consumer, compared to the wealthy. Globally, manufacturing Purchasing Managers' Indexes have slowed considerably, which may be the precursor to a broader economic slowdown. The Canadian consumer may be particularly vulnerable as personal and household debt are considered high. Weakening inflation will no doubt be helpful, but after considerable improvement over the past year, the next leg down may prove more difficult. Consensus estimates for second-quarter 2023 corporate earnings have already been lowered, but actual earnings reports in the coming weeks may provide insight as to the next step for markets.

(1) This information is derived from the Fund's semi-annual and annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on unitholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

(5) This information is provided for the period(s)/year(s) ended June 30, 2023 and December 31.

(6) Closing market price.

(7) Per units amounts are presented in U.S. dollars.

PAST PERFORMANCE

This section describes how the Fund has performed in the past. Remember, past returns do not indicate how the Fund will perform in the future. The information shown assumes that distributions made by the Fund in the period(s)/year(s) shown were reinvested in additional units of the Fund or relevant Series/Class of the Fund, as applicable. In addition, the information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance.

Year-by-Year Returns

The following chart/charts shows/show the Fund's semi-annual and annual performance for each of the period(s)/year(s) shown and illustrates/illustrate how the Fund's performance has changed from period/year to period/year. In percentage terms, the chart/charts shows/show how much an investment made on the first day of each financial period/year would have grown or decreased by the last day of each financial period/year, except where noted.

¹ 2022 return is for the period from March 03, 2022 to December 31, 2022.
