RESULTS OF OPERATIONS

The Fund's net assets increased by \$42.6 million to \$195.5 million from December 31, 2022 to June 30, 2023. The Fund had net sales of \$27.0 million for The period. The portfolio's performance increased assets by \$18.1 million. The Fund paid distributions totalling \$2.5 million. Hedged units returned 12.7% after fees and expenses for six-month period ended June 30, 2023. Over The same time period, The Fund's benchmark returned 9.8%. The benchmark is The WisdomTree International Quality Dividend Growth Total Return Index (CAD-Hedged) (The Benchmark or The Index).

Please refer to the "Past Performance" section which outlines the performance of the Fund's other units.

Globally, short-term interest rates continued to rise, with most central banks hiking overnight interest rates at least twice during the first half of the year. Expectations for interest rate cuts peaked in early March 2023 when a liquidity crisis forced various regional banks to shut down, causing the regulators to provide additional liquidity.

Despite higher interest rates, global equities made significant gains, particularly in U.S. mega-capitalization stocks. Developments in artificial intelligence (AI) significantly boosted information technology stocks, driving the NASDAQ 100 Index to its best first-half year performance ever. U.S. equity markets were also buoyed by signs of moderating inflation and economic resilience, despite offsetting data in manufacturing and personal savings.

Annual inflation slowed to 3.0% in the United States and 3.4% in Canada at the end of the period, compared to gross domestic product growth of 2.0% and 1.7%, respectively.

The information technology sector led the market, with computer chipmakers in the AI supply chain benefiting from a surge in demand for compute capability. The consumer discretionary and consumer staples sectors also performed well as continued stimulus and existing savings buoyed personal spending. Utilities and real estate sectors underperformed as higher interest rates hurt these businesses. Energy sector stocks struggled as the underlying commodity price of oil also declined.

Elsewhere, Japanese stocks reached their highest level in over 30 years, partly because of foreign inflows, but also aided by the more conservative stance by the Bank of Japan compared to central banks in the rest of the world. Chinese economic growth, however, saw a weaker-than-expected recovery, worsened by growing tensions between the United States and China.

The Fund outperformed its benchmark for the period. Exposures to the consumer discretionary, information technology and industrials sectors contributed most to the Fund's performance. Top individual contributors to the Fund's performance included holdings in LVMH Moët Hennessy Louis Vuitton SE, Industria de Diseno Textil SA and SAP SE.

The Fund's allocations to the energy, financials and utilities sectors detracted from performance. The largest individual detractors from the Fund's performance were positions in Roche Holding Ltd. Dividend Right Cert., Imperial Brands PLC and Hong Kong Exchanges & Clearing Ltd.

Any notable changes made to the Fund's holdings during the period were related to rebalancing activity. Portfolios are obtained from WisdomTree and rebalanced as per their direction with respect to constituents and weightings.

RECENT DEVELOPMENTS

Many market participants continue to believe in a potential soft-landing scenario in developed markets, but the likelihood of at least a mild recession is growing. In the United States, rising interest rates and housing costs, a shrinking money supply and removal of stimulus may have a disproportionate impact on the average consumer, compared to the wealthy. Globally, manufacturing Purchasing Managers' Indexes have slowed considerably, which may be the precursor to a broader economic slowdown. The Canadian consumer may be particularly vulnerable as personal and household debt are considered high. Weakening inflation will no doubt be helpful, but after considerable improvement over the past year, the next leg down may prove more difficult. Consensus estimates for second-quarter 2023 corporate earnings have already been lowered, but actual earnings reports in the coming weeks may provide insight as to the next step for markets.

(1) This information is derived from the Fund's semi-annual and annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on unitholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

(5) This information is provided for the period(s)/year(s) ended June 30, 2023 and December 31.

(6) Closing market price.
