Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

INVESTMENT OBJECTIVE AND STRATEGIES

The investment objective of the CI U.S. 500 Index ETF (the Fund) is to replicate, to the extent reasonably possible, the performance of the Solactive GBS United States 500 CAD Index (the Index). The Index intends to track the performance of the largest 500 companies from the U.S. stock market.

For a complete discussion of the Fund's investment objective and strategies, please refer to the Fund's most recently filed simplified prospectus.

RISK

No changes affecting the overall level of risk associated with investing in the Fund were made during the period/year. The risks of the Fund remain as discussed in the Fund's most recently filed simplified prospectus or its amendments. The Manager reviews the risk rating for the Fund on an annual basis, at a minimum, based on the methodology mandated by the Canadian Securities Administrators to determine the risk level of the Fund. Any change to the risk rating made during the period/year was as a result of such review and was not a result of any change to the investment objective, strategies or management of the Fund.

RESULTS OF OPERATIONS

The Fund's net assets increased by \$69.5 million to \$218.7 million from December 31, 2023 to December 31, 2024. The Fund had net sales of \$14.6 million for the year. The portfolio's performance increased assets by \$57.0 million. The Fund paid distributions totalling \$2.1 million. Unhedged Common Units returned 36.5% after fees and expenses for the one-year period ended December 31, 2024. Over the same time period, the Fund's benchmark returned 36.2%. The benchmark is the Solactive GBS United States 500 Index (NTR) (the Benchmark or the Index).

During the year, equity markets rebounded, with the S&P 500 Index rising 25%, hitting an all-time high. Performance was led by communication services and information technology stocks. Financials also performed well as the U.S. Federal Reserve Board (Fed) cut interest rates. The Fed cut its federal funds rate by 100 basis points (bps) over the year, taking the federal funds rate from 5.50% to 4.50%.

The Fund slightly outperformed its benchmark for the year. Exposures to the information technology, financials and communication services sectors contributed to the Fund's performance. Top individual contributors to the Fund's performance included holdings in NVIDIA Corp., Apple Inc. and Amazon.com Inc.

No sector allocations detracted from the Fund's performance, but exposures to the materials, real estate and energy sectors contributed the least to the Fund's performance. The largest individual detractors from the Fund's performance were positions in Intel Corp., The Boeing Co. and Adobe Inc.

RECENT DEVELOPMENTS

In the United States, the Overnight Index Swap market is pricing in only 35 bps total in interest rate cuts in 2025, with no cuts until June. In Canada, 67 bps in interest rate cuts have been priced in for next year, anticipating a 25-bp cut in both January and June.

Donald Trump's economic plan appears to combine corporate tax cuts with massive tariff increases. If enacted, it could create massive budget deficits (US\$5.8 trillion over 10 years) and would likely result in even higher bond yields due to the higher supply of government bonds issued to finance it. Trump's protectionist plans for raising tariffs would likely generate retaliatory tariffs, which could drive U.S. inflation higher and could seriously damage the Canadian economy. This would be detrimental to both government bonds and corporate bonds and equities.

Slower economic activity than expected would hurt equities and could widen out corporate spreads from historic lows, causing corporate bonds to underperform versus government bonds.

Privatization

On November 25, 2024, CI Financial Corp. announced that it had entered into a definitive agreement with an affiliate of Mubadala Capital, the alternative asset management arm of Mubadala Investment Company, to acquire all issued and outstanding common shares of CI Financial Corp., other than shares held by members of senior management of CI Financial Corp. who enter into equity rollover agreements. Subject to court and shareholder approvals, regulatory clearances and other customary closing conditions, the transaction is expected to close in the second quarter of 2025. The Manager does not expect the transaction to impact it or the Fund's business, operations or affairs at this time.

(1) This information is derived from the Fund's audited annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on unitholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

(5) This information is provided for the period(s)/year(s) ended December 31.

PAST PERFORMANCE

This section describes how the Fund has performed in the past. Remember, past returns do not indicate how the Fund will perform in the future. The information shown assumes that distributions made by the Fund in the period(s)/year(s) shown were reinvested in additional units of the Fund or relevant Series/Class of the Fund, as applicable. In addition, the information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance.

Year-by-Year Returns

The following chart/charts shows/show the Fund's annual performance for each of the period(s)/year(s) shown and illustrates/illustrate how the Fund's performance has changed from period/year to period/year. In percentage terms, the chart/charts shows/show how much an investment made on the first day of each financial period/year would have grown or decreased by the last day of each financial period/year, except where noted.

¹ 2021 return is for the period from August 12, 2021 to December 31, 2021.
