

CI Energy Giants Covered Call ETF

Management Report of Fund Performance for the period/year ended December 31, 2023

This annual management report of fund performance contains financial highlights but does not contain the complete annual financial statements of the investment fund. You can get a copy of the annual financial statements at your request, and at no cost, by calling 1-800-792-9355, by writing to us at CI Investments Inc., 15 York Street, Second Floor, Toronto, ON, M5J 0A3 or by visiting our website at www.ci.com or SEDAR+ at www.sedarplus.ca.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

INVESTMENT OBJECTIVE AND STRATEGIES

The investment objective of the CI Energy Giants Covered Call ETF (the Fund) is to provide unitholders with (i) quarterly cash distributions, (ii) the opportunity for capital appreciation by investing on an equal weight basis in a portfolio of equity securities of at least the 15 largest energy companies measured by market capitalization listed on a North American stock exchange, and (iii) lower overall volatility of returns on the portfolio than would be experienced by owning a portfolio of securities of such issuers directly. The issuers included in the portfolio, which are based on their market capitalization, may be adjusted based on the Portfolio Manager's view on the liquidity of the issuers' equity securities and their related call options.

The Fund invests in a portfolio of equity securities of at least the 15 largest energy companies measured by market capitalization listed on a North American stock exchange. (Energy company) means an issuer classified within either the Integrated Oil & Gas or Oil & Gas Exploration & Production Global Industry Classification Standard (GICS) sub-industry groups, or otherwise determined by the Portfolio Manager to derive their revenue primarily from the exploration for and production of oil and natural gas.

Each month the Portfolio Manager employs a covered call option writing program on approximately, and not more than, 25% (determined at the time of writing) of the securities of each portfolio issuer, in order to seek to earn attractive tax effective income from dividends, distributions and call option premiums, to lower the overall volatility of returns associated with owning a portfolio of these securities, and to generate capital appreciation. Call options may be sold on each individual portfolio security or may be sold on a basket basis, encompassing more than one portfolio security, in the discretion of the Portfolio Manager.

The issuers included in the Fund's portfolio, which are based on their market capitalization, may be adjusted based on the Portfolio Manager's view on the liquidity of the issuers' equity securities and their related call options.

The Fund's portfolio will be rebalanced as soon as practicable, in the determination of the Portfolio Manager, at the end of each calendar quarter, so that immediately following such rebalancing, the Fund's portfolio issuers are approximately equally weighted. In order to facilitate distributions and/or pay expenses of the Fund, the Portfolio Manager may sell portfolio securities of the Fund at its discretion in which case the weighting of the portfolio will be affected.

For a complete discussion of the Fund's investment objective and strategies, please refer to the Fund's most recently filed simplified prospectus.

RISK

The Manager reviews the risk rating for the Fund on an annual basis, at a minimum, based on the methodology mandated by the Canadian Securities Administrators to determine the risk level of the Fund. Any change to the risk rating made during the period/year was as a result of such review and was not a result of any change to the investment objective, strategies or management of the Fund.

RESULTS OF OPERATIONS

The Fund's net assets decreased by \$65.6 million to \$470.4 million from December 31, 2022 to December 31, 2023. The Fund had net redemptions of \$34.5 million for the year. The portfolio's performance increased assets by \$33.5 million. The Fund paid distributions totalling \$64.6 million. Hedged Common Units returned 6.7% after fees and expenses for the one-year period ended December 31, 2023. Over the same time period, the Fund's benchmark returned 2.5%. The benchmark is the MSCI World Energy Total Return Index (LC) (the Benchmark or the Index).

Please refer to the "Past Performance" section which outlines the performance of the Fund's other units.

In North America, markets were dominated by speculation around the interest rate cycle. During the year, central banks continued to tighten monetary policy to combat inflation. The U.S. Federal Reserve Board (Fed) raised interest rates four times, with the federal funds rate reaching 5.50% by December. The Bank of Canada raised its overnight rate by 50 basis points (bps) to 5.00%. Yield curves remained inverted. In Canada, bond yields declined somewhat, with the two-, 10- and 30-year yields declining 16 bps, 19 bps and 25 bps, respectively.

Credit spreads (the difference between the yield on corporate bonds over government bonds) on Canadian corporate bonds tightened somewhat, by approximately 30 bps. Credit spreads on provincial bonds were barely changed, down 8 bps in aggregate.

CI Energy Giants Covered Call ETF

Management Report of Fund Performance for the period/year ended December 31, 2023

Global economic growth was expected to moderate in the second half of 2023, with core inflation remaining above 3%. Persistent high inflation exerted pressure on central banks, suggesting the possibility of continued monetary tightening in various regions. Inflation in Canada dropped for the year, from 6.3% to 3.1% (for November 2023). Inflation in the United States showed a similar pattern, down to 3.1% from 6.5%.

The Fed signalled an end to its interest rate hikes in December 2023, indicating potential interest rate cuts. This led to positive market sentiment and a shift of investments towards fixed income and interest rate-sensitive sectors.

Equity markets rebounded in the latter part of the year, with U.S. equity indexes showing impressive growth. The rebound was driven by lower inflation, a drop in U.S. Treasury yields and a stronger-than-expected gross domestic product growth. The equity surge occurred despite low earnings growth, highlighting the market's resilience and optimism for a soft economic landing.

In the United States, information technology stocks and small- to mid-capitalization equities significantly rebounded, with energy stocks also showing strong performance. In contrast, Japanese equities faced challenges amid concerns about yen appreciation, despite strong stock market performance. Emerging markets showed varied performance, with some regions benefiting from softening U.S. monetary policy while others, like China, faced economic challenges.

The Fund outperformed its benchmark for the year. Top individual contributors to the Fund's performance included holdings in Petroleo Brasileiro SA, Canadian Natural Resources Ltd. and Eni SPA.

The largest individual detractors from the Fund's performance were positions in Devon Energy Corp., Chevron Corp. and Exxon Mobil Corp.

RECENT DEVELOPMENTS

Declining inflation has led investor expectations towards potential interest rate cuts. Central banks, still focused on long-term price stability, recognize that their policies have become adequately restrictive but have not yet fully committed to lowering interest rates. The timing, pace and magnitude of interest rate reductions will hinge on the trajectory of inflation and ongoing health of the economy. A stable economy with lower inflation should lead to a slow and gradual reduction in interest rates.

Despite the challenges of higher borrowing costs and a slowdown in consumer and corporate spending, the resilience of household and corporate balance sheets is notable. Supported by a historically low unemployment rate and expectations of forthcoming interest rate cuts, the economy should avoid a severe slowdown over the medium term. As the world adjusts to a lower inflation environment, economic activity is predicted to be slow to moderate early in 2024, eventually giving way to reasonable though likely sub-trend growth.

The United States is emerging as a clear leader in innovation, particularly in the field of artificial intelligence. Technological advancements are not just a trend but a significant growth driver, with regions investing in these technologies poised to gain substantial long-term economic benefits. The global trade landscape, which is recovering from previous slowdowns, is expected to see a steady upswing. This improvement should benefit sectors such as energy, manufacturing and finished goods.

2024 is poised to be a period characterized by efforts to quell inflation, which should lead to more affordable borrowing costs. Innovation will likely be crucial for driving economic growth. Key factors, such as the potential for interest rate reductions and the implications of the U.S. presidential election, are set to play a role in sculpting the global economic landscape. The coming year promises a blend of challenges and opportunities.

Risk Rating

Effective April 17, 2023, the risk rating for the Fund changed from "Medium-to-High" to "High". This change is the result of an annual review to comply with the methodology mandated by the Canadian Securities Administrators and is not the result of any changes to investment objective, strategies or management of the Fund.

RELATED PARTY TRANSACTIONS

Manager, Portfolio Manager and Trustee

CI Investments Inc. is the Manager, Portfolio Manager and Trustee of the Fund. CI Investments Inc. is a subsidiary of CI Financial Corp. The Manager, in consideration of management fees, provided management services required in the day-to-day operations of the Fund.

CI Energy Giants Covered Call ETF

Management Report of Fund Performance for the period/year ended December 31, 2023

Management fee rate/rates as at December 31, 2023, for Series/Class or each of the Series/Classes, as applicable, is/are shown below:

| | Annual management fee rate (%): |
|--------------------------|---------------------------------|
| Hedged Common Units | 0.650 |
| Hedged US\$ Common Units | 0.650 |
| Unhedged Common Units | 0.650 |

The Manager received \$3.4 million in management fees for the year.

Management Fees

100% of total management fees were used to pay for investment management and other general administration.

Independent Review Committee

The Manager, in respect of the Fund, received the following standing instructions from the Independent Review Committee (IRC) with respect to related party transactions:

The applicable standing instructions require, amongst others, that related party transactions be conducted in accordance with the Manager's policies and procedures and applicable law and that the Manager reports related party transactions periodically to the IRC and advise the IRC of any material breach of such policies. The Manager's policies and procedures require that investment decisions in respect of related party transactions (a) are free from any influence by an entity related to the Manager and without taking into account any consideration relevant to an entity related to the Manager; (b) represent the business judgment of the Manager, uninfluenced by considerations other than the best interests of the Fund; (c) do not exceed the limitations of the applicable legislation; and (d) achieve a fair and reasonable result for the Fund.

Except as otherwise noted above under Related Party Transactions section, the Fund was not a party to any related party transactions during the period/year ended December 31, 2023. If the Fund invested in related party transactions, it relied on the IRC's standing instructions regarding related party transactions during this reporting period/year.

(1) This information is derived from the Fund's audited annual financial statements.

(2) Net assets per unit and distributions per unit are based on the actual number of units outstanding for the relevant Series/Class at the relevant time. The increase (decrease) in net assets from operations per unit is based on the weighted average number of units outstanding for the relevant Series/Class over the fiscal period/year.

(3) Distributions are automatically reinvested in additional units of the Fund.

(4) This information is provided for the period(s)/year(s) ended December 31.

(5) Per units amounts are presented in U.S. dollars.

(1) This information is derived from the Fund's audited annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on unitholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

(5) This information is provided for the period(s)/year(s) ended December 31.

(6) Closing market price.

(7) Per units amounts are presented in U.S. dollars.

[^]Historical information pertaining to HST is not available.

CI Energy Giants Covered Call ETF

Management Report of Fund Performance for the period/year ended December 31, 2023

PAST PERFORMANCE

This section describes how the Fund has performed in the past. Remember, past returns do not indicate how the Fund will perform in the future. The information shown assumes that distributions made by the Fund in the period(s)/year(s) shown were reinvested in additional units of the Fund or relevant Series/Class of the Fund, as applicable. In addition, the information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance.

Year-by-Year Returns

The following chart/charts shows/show the Fund's annual performance for each of the period(s)/year(s) shown and illustrates/illustrate how the Fund's performance has changed from period/year to period/year. In percentage terms, the chart/charts shows/show how much an investment made on the first day of each financial period/year would have grown or decreased by the last day of each financial period/year, except where noted.

1 2015 return is for the period from February 04, 2015 to December 31, 2015.

2 2022 return is for the period from March 03, 2022 to December 31, 2022.

CI Energy Giants Covered Call ETF

Management Report of Fund Performance for the period/year ended December 31, 2023

Annual Compound Returns

The following table shows the Fund's annual compound returns for each year indicated, compared to the MSCI World Energy Total Return Index and the S&P 500 Total Return Index.

The MSCI World Energy Index is a free float-adjusted market capitalization index that is designed to capture the large and mid cap segments across 23 developed markets including: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the United Kingdom and the United States of America. All securities in the Index are classified in the Energy sector as per the Global Industry Classification Standard.

The S&P 500 Index is an index composed of 500 stocks weighted by capitalization and representing all major U.S. industries. The Index is a broad measure of the stock performance of the largest U.S. companies.

A discussion of the performance of the Fund as compared to the benchmark is found in the Results of Operations section of this report.

A NOTE ON FORWARD-LOOKING STATEMENTS

This report may contain forward-looking statements about the Fund, its future performance, strategies or prospects, and possible future Fund action. The words "may," "could," "should," "would," "suspect," "outlook," "believe," "plan," "anticipate," "estimate," "expect," "intend," "forecast," "objective," and similar expressions are intended to identify forward-looking statements.

Forward-looking statements are not guarantees of future performance. Forward-looking statements involve inherent risks and uncertainties, both about the Fund and general economic factors, so it is possible that predictions, forecasts, projections and other forward-looking statements will not be achieved. We caution you not to place undue reliance on these statements as a number of important factors could cause actual events or results to differ materially from those expressed or implied in any forward-looking statement made by the Fund. These factors include, but are not limited to, general economic, political and market factors in Canada, the United States and internationally, interest and foreign exchanges rates, global equity and capital markets, business competition, technological changes, changes in laws and regulations, judicial or regulatory judgments, legal proceedings and catastrophic events.

The above list of important factors that may affect future results is not exhaustive. Before making any investment decisions, we encourage you to consider these and other factors carefully. All opinions contained in forward-looking statements are subject to change without notice and are provided in good faith but without legal responsibility.
