INVESTMENT OBJECTIVE AND STRATEGIES

The investment objective of the CI Canadian Aggregate Bond Index ETF (the Fund) is to track, to the extent reasonably possible, the price and yield performance of the FTSE Canada Universe Bond Index™ (the Benchmark or the Index), before fees and expenses. The Index is designed to broadly capture the Canadian investment grade fixed income securities market while seeking to enhance yield within desired risk parameters and constraints.

The investment strategy of the Fund is to invest in and hold a proportionate share of the constituent securities of the Index or otherwise invest in a manner intended to track the price and yield performance of the Index. The Fund may also invest in or use certain other securities to obtain exposure to the price and yield performance of the Index.

For a complete discussion of the Fund's investment objective and strategies, please refer to the Fund's most recently filed simplified prospectus.

RISK

No changes affecting the overall level of risk associated with investing in the Fund were made during the period/year. The risks of the Fund remain as discussed in the Fund's most recently filed simplified prospectus or its amendments. The Manager reviews the risk rating for the Fund on an annual basis, at a minimum, based on the methodology mandated by the Canadian Securities Administrators to determine the risk level of the Fund. Any change to the risk rating made during the period/year was as a result of such review and was not a result of any change to the investment objective, strategies or management of the Fund.

RESULTS OF OPERATIONS

The Fund's net assets increased by \$1,191.3 million to \$1,200.5 million from December 31, 2023 to December 31, 2024. The Fund had net sales of \$1,185.4 million for the year. The portfolio's performance increased assets by \$17.7 million. The Fund paid distributions totalling \$11.8 million. Non-Hedged Units returned 4.3% after fees and expenses for the one-year period ended December 31, 2024. Over the same time period, the Fund's benchmark returned 4.2%. The benchmark is the FTSE Canada Universe Bond Index (TR) (the Benchmark or the Index).

During the year, equity markets rebounded, with the S&P 500 Index rising 25%, hitting an all-time high. Performance was led by communication services and information technology stocks. Financials also performed well as the U.S. Federal Reserve Board (Fed) cut interest rates. The Fed cut its federal funds rate by 100 basis points (bps) over the year, taking the federal funds rate from 5.50% to 4.50%.

Canadian equities, as measured by the S&P/TSX Composite Index, hit an all-time high in 2024, rising 21.7% for the year. The information technology, financials and energy sectors led performance. The Bank of Canada (BoC) brought its overnight lending rate down by 175 bps, from 5.00% to 3.25%, over the course of the year.

Canadian two-year and five-year bond yields fell 96 bps and 21 bps, to 2.93% and 2.97%, respectively. Conversely, 10-year and 30-year yields rose 13 bps and 31 bps, to 3.21% and 3.31%, respectively. Yield curves reverted to a positive slope as interest rate cuts pulled down front-end yields.

In November, corporate credit spreads (the difference in yields between corporate bonds and government bonds of similar maturity) narrowed to all-time lows in the United States, signalling investor optimism for corporate earnings and the U.S. economy.

Inflation in Canada declined significantly, from 3.4% to 1.9%. In the United States, inflation declined from 3.4% to 2.7%, still well above the Fed's 2% target.

CI Canadian Aggregate Bond Index ETF (formerly CI Yield Enhanced Canada Aggregate Bond Index ETF)

Management Report of Fund Performance for the period/year ended December 31, 2024

The Fund slightly outperformed its benchmark for the year. Exposure to government bonds, particularly federal bonds, contributed to the Fund's performance, as did exposure to corporate investment-grade bonds. Top individual contributors to the Fund's performance included holdings in Government of Canada (GoC) 3.0% Jun. 1, 2034, GoC 1.5% Jun. 1, 2031 and GoC 1.75% Dec. 1, 2053 bonds.

The largest individual detractors from the Fund's performance were positions in Hydro-Québec 2.85% Dec. 1, 2053, Province of Ontario 4.15% Dec. 2, 2054 and Province of Ontario 4.6% Jun. 2, 2039 bonds.

RECENT DEVELOPMENTS

In the United States, the Overnight Index Swap market is pricing in only 35 bps total in interest rate cuts in 2025, with no cuts until June. In Canada, 67 bps in interest rate cuts have been priced in for next year, anticipating a 25-bp cut in both January and June.

Donald Trump's economic plan appears to combine corporate tax cuts with massive tariff increases. If enacted, it could create massive budget deficits (US\$5.8 trillion over 10 years) and would likely result in even higher bond yields due to the higher supply of government bonds issued to finance it. Trump's protectionist plans for raising tariffs would likely generate retaliatory tariffs, which could drive U.S. inflation higher and could seriously damage the Canadian economy. This would be detrimental to both government bonds and corporate bonds and equities.

Slower economic activity than expected would hurt equities and could widen out corporate spreads from historic lows, causing corporate bonds to underperform versus government bonds.

Privatization

On November 25, 2024, CI Financial Corp. announced that it had entered into a definitive agreement with an affiliate of Mubadala Capital, the alternative asset management arm of Mubadala Investment Company, to acquire all issued and outstanding common shares of CI Financial Corp., other than shares held by members of senior management of CI Financial Corp. who enter into equity rollover agreements. Subject to court and shareholder approvals, regulatory clearances and other customary closing conditions, the transaction is expected to close in the second quarter of 2025. The Manager does not expect the transaction to impact it or the Fund's business, operations or affairs at this time.

Fund name

Effective April 5, 2024, CI Yield Enhanced Canada Aggregate Bond Index ETF was renamed CI Canadian Aggregate Bond Index ETF.

(1) This information is derived from the Fund's audited annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on unitholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

(5) This information is provided for the period(s)/year(s) ended December 31.

PAST PERFORMANCE

This section describes how the Fund has performed in the past. Remember, past returns do not indicate how the Fund will perform in the future. The information shown assumes that distributions made by the Fund in the period(s)/year(s) shown were reinvested in additional units of the Fund or relevant Series/Class of the Fund, as applicable. In addition, the information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance.

Year-by-Year Returns

The following chart/charts shows/show the Fund's annual performance for each of the period(s)/year(s) shown and illustrates/illustrate how the Fund's performance has changed from period/year to period/year. In percentage terms, the chart/charts shows/show how much an investment made on the first day of each financial period/year would have grown or decreased by the last day of each financial period/year, except where noted.

¹ 2017 return is for the period from June 22, 2017 to December 31, 2017.

Annual Compound Returns

The following table shows the Fund's annual compound returns for each year indicated, compared to the FTSE Canada Universe Bond Index (TR).

The FTSE Canada Universe Bond Index is a market capitalization weighted index that measures the performance of the Canadian investment-grade fixed income market. The Index consists of fixed rate bonds denominated in Canadian dollars, with a remaining effective term to maturity of at least one year, rated BBB or higher. The Index is comprised of four main credit or borrower categories: bonds issued by the Government of Canada (including Crown Corporations), Provincial bonds (including provincially-guaranteed securities), Municipal bonds and Corporate bonds. The Corporate sector is further divided into sub-sectors based on major industry groups: Financial, Communication, Industrial, Energy, Infrastructure, Real Estate and Securitization. The Corporate sector is also divided into sub-indices based on credit rating: a combined AAA/AA sector, a single A sector and a BBB sector.

A discussion of the performance of the Fund as compared to the benchmark is found in the Results of Operations section of this report.
