## RESULTS OF OPERATIONS

The Fund's net assets increased by \$0.6 million to \$12.8 million from December 31, 2023 to June 30, 2024. The Fund had net redemptions of \$2.0 million for the period. The portfolio's performance increased assets by \$2.6 million. ETF US\$ Series units returned 21.4% after fees and expenses for the six-month period ended June 30, 2024. Over the same time period, the Fund's benchmark returned 45.2%. The benchmark is a combination of the Bloomberg Galaxy Bitcoin Index (USD) - 50% and the Bloomberg Galaxy Ethereum Index (USD) - 50% (the Benchmark or the Index).

Equity markets pushed higher through the first half of 2024 with equities relating to artificial intelligence and nuclear energy leading the way. A lack of equity market breadth was a major theme in during the second quarter of 2024, with a small group of large-capitalization growth stocks lifting major indexes. While the S&P 500 Index and Nasdaq 100 Index continued to record all-time highs, fewer stocks reached new highs. Interest rates shifted higher, with the yield curve continuing to be inverted (when shorter-term interest rates are higher than longer-term interest rates). While an inverted yield curve has historically signalled an upcoming recession, it did not materialize during the period. The resilient U.S. economy drove the U.S. Federal Reserve Board to maintain the federal funds rate rather than cut interest rates.

Bitcoin finished the period up 43.1%, outperforming major stock indexes, including the S&P 500 Index (up 15.3%) and the Nasdaq 100 Index (up 17.5%). The U.S. spot Bitcoin exchange-traded fund (ETF) was approved and began trading January 11, 2024. As inflows mounted, Bitcoin recorded an all-time high of US\$73,797.98. Challenges of supply overhang, from sales by the German government and Mt. Gox (Japanese Bitcoin exchange) distributions, weighed on sentiment and sent prices toward US\$60,000 as the first half of 2024 concluded.

Ethereum finished the year up 46.4%, similarly outperforming major stock indexes. On May 23, 2024, the U.S. Securities and Exchange Commission approved the U.S. spot Ethereum ETF. After this news, the price of Ethereum bounced off the US\$2,900 support level and surged to US\$3,800. However, this was short-lived, and Ethereum fell alongside broader cryptocurrency markets.

The Fund underperformed its benchmark over the period. The Fund's performance was driven solely by the performance of Bitcoin and Ethereum.

The Fund's mandate is to track the performance of Bitcoin and Ethereum. As such, the Fund's portfolio is weighted 100% to Bitcoin and Ethereum. We increased the Fund's positions in Bitcoin and Ethereum in line with share creations, and we trimmed Bitcoin and Ethereum in line with share redemptions.

## RECENT DEVELOPMENTS

The upcoming spot ETH ETF to the US markets along with the increasing likelihood of Donald Trump returning to the White House has investors feeling bullish on crypto in the medium to long term. Analysts anticipate a better regulatory environment and the promotion of the digital asset industry remaining onshore. Furthermore, it is widely expected that the Fed will begin cutting interest rates in September, further bolstering risk-on sentiment.

(1) This information is derived from the Fund's semi-annual and audited annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on unitholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

(5) This information is provided for the period(s)/year(s) ended June 30, 2024 and December 31.

(6) Closing market price.

(7) Per units amounts are presented in Canadian dollars.

## PAST PERFORMANCE

This section describes how the Fund has performed in the past. Remember, past returns do not indicate how the Fund will perform in the future. The information shown assumes that distributions made by the Fund in the period(s)/year(s) shown were reinvested in additional units of the Fund or relevant Series/Class of the Fund, as applicable. In addition, the information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance.

### Year-by-Year Returns

The following chart/charts shows/show the Fund's semi-annual and annual performance for each of the period(s)/year(s) shown and illustrates/illustrate how the Fund's performance has changed from period/year to period/year. In percentage terms, the chart/charts shows/show how much an investment made on the first day of each financial period/year would have grown or decreased by the last day of each financial period/year, except where noted.

1 2022 return is for the period from January 28, 2022 to December 31, 2022.
