INVESTMENT OBJECTIVE AND STRATEGIES

The investment objective of CI Mosaic Income ETF Portfolio Class (the Fund) is to provide a balance between income and capital growth, with a focus on capital preservation over the medium to long-term, by investing primarily in a diversified portfolio of fixed income and equity exchange-traded funds (ETFs).

The Fund primarily invests in a mix of fixed income and equity ETFs and if deemed necessary by the portfolio advisor, other mutual funds (the underlying ETF and/ or mutual funds or the underlying funds) and securities. The Fund has a bias towards fixed income ETFs. The fixed income ETFs provide exposure to Canadian and global fixed income securities. Equity ETFs provide exposure to Canadian, U.S., and international equity securities.

The Fund's asset mix will generally be kept within the following ranges:

- 70% and 100% for fixed income securities; and
- 0% and 30% for equity securities.

The portfolio adviser may, in its sole discretion:

- invest some or all assets of the Fund in securities of ETFs and other mutual funds which may be managed by CI Investments Inc., its affiliates and/or other investment fund managers;
- rebalance the Fund's assets among the underlying ETFs and/or mutual funds based on the Fund's target asset allocations; and
- monitor the underlying ETFs and/or mutual funds on an ongoing basis and may make changes to the underlying funds or allocated percentages of the underlying funds.

The portfolio adviser uses strategic asset allocation as the principal investment strategy to create a portfolio diversified by investment style, asset class and geographic region. The portfolio adviser may tactically review and adjust the asset allocation strategy, in its sole discretion, depending on various factors, including but not limited to, economic conditions, market conditions, interest rates, relative valuations of equity and fixed income securities, each underlying ETF's and/or mutual fund's investment objectives, past performance and historical volatility in the context of building and managing a diversified portfolio suitable for the investment objective of the Fund.

For a complete discussion of the Fund's and the Underlying Funds' respective investment objective and strategies, please refer to the Fund's and the Underlying Funds' most recently filed simplified prospectus.

RISK

No changes affecting the overall level of risk associated with investing in the Fund were made during the period/year. The risks of the Fund remain as discussed in the Fund's most recently filed simplified prospectus or its amendments. The Manager reviews the risk rating for the Fund on an annual basis, at a minimum, based on the methodology mandated by the Canadian Securities Administrators to determine the risk level of the Fund. Any change to the risk rating made during the period/year was as a result of such review and was not a result of any change to the investment objective, strategies or management of the Fund.

RESULTS OF OPERATIONS

The Fund's net assets decreased by \$0.4 million to \$5.8 million from March 31, 2024 to September 30, 2024. The Fund had net redemptions of \$0.6 million for the period. The portfolio's performance increased assets by \$0.3 million. The Fund paid distributions totalling \$0.1 million. Series A units returned 5.3% after fees and expenses for the six-month period ended September 30, 2024. Over the same time period, the Fund's benchmark returned 6.3%. The benchmark is a combination of the FTSE Canada Universe Bond Index (TR) - 80% and the MSCI World Index (NTR) - 20% (the Benchmark or the Index).

The performance of the Fund's other Series is substantially similar to that of Series A shares, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

The following commentary pertains to the results of operations of the Underlying Funds.

Management Report of Fund Performance for the period/year ended September 30, 2024

U.S. companies reported 13% year-over-year earnings growth through the second quarter of 2024, led by the information technology, health care and financials sectors. At the same time, inflation declined consistently, clearing the hurdles for the U.S. Federal Reserve Board (Fed) to cut interest rates in September. Fixed income yields tracked lower with falling inflation, creating additional capital gains for investors. U.S. equities, as measured by the S&P 500 Index, responded well to these developments, with a double-digit return year-to-date and little volatility.

The economy in Canada was weaker than in the United States, especially when measured on a per-capita basis. Many Canadian households had to renew mortgages at much higher interest rates in 2024 compared to the rates initiated in 2019 and 2020. As a result, we saw a stagnant real estate market and weak overall consumption, causing Canada's inflation rate to fall faster than its peers. The Bank of Canada started to cut interest rates in June, cutting its overnight lending rate three times during the period for a total of 75 basis points.

Elsewhere in the world, the European Central Bank cut its deposit rate twice to 3.5%. Japanese equities, as measured by the Nikkei 225 Index, fell dramatically in August as markets anticipated a shift from the Bank of Japan in response to inflation. This forced the central bank to communicate a softer tone. The Japanese yen rebounded, helping to keep Japanese investments close to all-time highs.

China recently announced a series of stimulus policies to combat rapidly slowing consumption and the country's lower economic growth. These policies included cutting interest rates, dropping bank reserve ratios and other incentives to purchase properties and stocks. Investors rushed into the markets, driving large gains. Chinese equities, as measured by the Shanghai Shenzhen CSI 300 Index, rebounded 27% in the last two weeks of September.

The Fund underperformed its benchmark for the period. The Fund's cash allocation detracted from performance, as did exposures to Japanese equities and the energy sector. Allocation to short-term bonds and commodities also detracted from the Fund's performance. The largest individual detractors from the Fund's performance were holdings in CI Energy Giants Covered Call ETF, CI Health Care Giants Covered Call ETF and CI 1-5 Year Laddered Government Strip Bond Index ETF.

An underweight allocation to fixed income and overweight allocation to equities contributed to the Fund's performance. Exposures to dividend stocks, precious metals, quality factor, gold bullion and investment-grade bonds also contributed to the Fund's performance. Top individual contributors to the Fund's performance included holdings in CI Enhanced Government Bond ETF, CI Global Investment Grade ETF, CI U.S. 1000 Index ETF and iShares S&P/TSX 60 Index ETF.

Existing holdings in CI Enhanced Government Bond ETF, CI WisdomTree U.S. Quality Dividend Growth Index ETF, CI WisdomTree International Quality Dividend Growth Index ETF and Horizons Equal Weight Banks Index ETF were increased. We trimmed the Fund's positions in CI WisdomTree Japan Equity Index ETF, SPDR Bloomberg Emerging Markets Local Bond ETF, CI Emerging Markets Alpha ETF, CI U.S. 1000 Index ETF and iShares 20+ Year Treasury Bond ETF.

RECENT DEVELOPMENTS

Liquidity is easing as most central banks have begun to cut policy interest rates in recent months. The Fed has been more cautious as inflation has been a bit stickier than in other regions and growth has been more resilient. Financial markets have generally been in favour of these interest rate cuts, with most equity markets at all-time highs, while bonds have performed better as policymakers made the shift.

Politics and geopolitics have been another key focus for markets. The upcoming U.S. presidential election is likely to increase volatility as the two main candidates have been in a dead heat, which may result in legal challenges. Conflicts in Europe and the Middle East look unlikely to moderate in the near term.

In recent months, we have trimmed the Fund's overweight equity and commodity allocations to fund increased investments in fixed income instruments, particularly in short and intermediate maturities in government, mortgage and credit sectors. The Fund still holds an underweight allocation to bonds as fundamental and technical indicators suggest challenges for the segment. Gold has outperformed as central bank and private sector buying of the commodity continues to support demand. In terms of equities, we favour non-U.S. markets in spite of strong corporate profit news from the United States.

Management Report of Fund Performance for the period/year ended September 30, 2024

Independent Review Committee

The Manager, in respect of the Fund, received the following standing instructions from the IRC with respect to related party transactions:

The applicable standing instructions require, amongst others, that related party transactions be conducted in accordance with the Manager's policies and procedures and applicable law and that the Manager reports related party transactions periodically to the IRC and advise the IRC of any material breach of such policies. The Manager's policies and procedures require that investment decisions in respect of related party transactions (a) are free from any influence by an entity related to the Manager and without taking into account any consideration relevant to an entity related to the Manager; (b) represent the business judgment of the Manager, uninfluenced by considerations other than the best interests of the Fund; (c) do not exceed the limitations of the applicable legislation; and (d) achieve a fair and reasonable result for the Fund.

Except as otherwise noted above under Related Party Transactions section, the Fund was not a party to any related party transactions during the period/year ended September 30, 2024. If the Fund invested in related party transactions, it relied on the IRC's standing instructions regarding related party transactions during this reporting period/year.

(1) This information is derived from the Fund's semi-annual and annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on shareholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

(5) This information is provided for the period(s)/year(s) ended September 30, 2024 and March 31.

PAST PERFORMANCE

This section describes how the Fund has performed in the past. Remember, past returns do not indicate how the Fund will perform in the future. The information shown assumes that dividends made by the Fund in the period(s)/year(s) shown were reinvested in additional shares of the Fund or relevant Series/Classes of the Fund, as applicable. In addition, the information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance.

Year-by-Year Returns

The following chart/charts shows/show the Fund's semi-annual and annual performance for each of the period(s)/year(s) shown and illustrates/illustrate how the Fund's performance has changed from period/year to period/year. In percentage terms, the chart/charts shows/show how much an investment made on the first day of each financial period/year would have grown or decreased by the last day of each financial period/year, except where noted.

¹ 2018 return is for the period from June 26, 2017 to March 31, 2018.
