RESULTS OF OPERATIONS

The Fund's net assets decreased by \$1.1 million to \$7.3 million from March 31, 2023 to September 30, 2023. The Fund had net redemptions of \$0.7 million during the period. The portfolio's performance decreased assets by \$0.3 million. The Fund paid distributions totalling \$0.1 million. Series A units returned -3.9% after fees and expenses for the six-month period ended September 30, 2023. Over the same time period, the Fund's benchmark returned -2.9%. The benchmark is a combination of the FTSE Canada Universe Bond Total Return Index - 80% and the MSCI World Total Return Index - 20% (the Benchmark or the Index).

The performance of the Fund's other Series is substantially similar to that of Series A shares, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

The following commentary pertains to the results of operations of the Underlying Funds.

It was a rough period, with both bonds and equities declining. Yields kept rising as most market participants do not expect an economic recession in the near term. Rating agency Fitch Ratings Inc. downgraded the United States' "risk free" rating. Equities declined following a solid rebound in the first two quarters of 2023. On a year-to-date basis, equities remained strong, outperforming fixed-income securities.

The Fund slightly underperformed its benchmark for the period. Security selection detracted from the Fund's performance, as did an overweight allocation to global equities. The largest individual detractors from the Fund's performance were holdings in CI Canadian Core Fixed Income Private Trust, CI Canadian Equity Income Private Trust, CI Precious Metals Private Trust, CI Global Infrastructure Private Trust and CI International Equity Income Private Trust.

An underweight exposure to emerging markets contributed to the Fund's performance, as did exposure to the energy sector and the Canadian dollar. Top individual contributors to the Fund's performance included holdings in CI U.S. Equity Private Trust, CI Global High Yield Fixed Income Private Trust and CI Energy Private Trust.

We increased the Fund's holding in CI Global Real Estate Private Trust, and we trimmed positions in CI Global High Yield Fixed Income Private Trust, CI Canadian Equity Income Private Trust, CI Precious Metals Private Trust, CI Energy Private Trust and CI International Equity Income Private Trust.

RECENT DEVELOPMENTS

The steady increase in market interest rates has put pressure on the system. After a year and a half of interest rate increases, and later, stern warnings from economists, central bankers and investors alike that a recession was coming, most hard economic data and employment is signalling anything but. This has forced the U.S. Federal Reserve Board (Fed) and other central banks to maintain monetary tightening.

Inflation is on the decline, which may lead the Fed and other central banks to stop raising interest rates. However, the most recent year-over-year data shows inflation falling to 3.9%, which is still well above the Fed's 2% target. The steepening of the yield curve has unsettled stocks, with U.S. equities (as measured by the S&P 500 Index) down almost 10% from their recent peak. Absent a recession, these levels for inflation and longer-term interest rates may stay somewhat elevated, causing more pressure on stock market valuations.

U.S. corporate earnings have flattened this year despite average U.S. nominal gross domestic product (GDP) growth of 8% since the end of 2021 as profit margins compressed. Higher interest, wages and other input expenses have weighed on corporate bottom lines. However, it now looks like margin deterioration may be behind us, having stabilized in the last quarter. Still, nominal growth is now slowing as inflation and GDP growth head lower. This challenges the consensus assumption for earnings growth into next year of approximately 10%, with the likelihood for a slowing of the economy given the lagged effects of monetary tightening.

With overnight cash rates and short-term government and credit securities offering between 5–6% with little risk, the hurdle for owning equities has become higher. We hold extra cash in the Fund to give us flexibility. We also like our higher yield and lower duration (sensitivity to interest rates) positioning for the Fund, and we remain cautious on equities in the current environment. Commodities should also receive more allocations this fall.

Management

⁽¹⁾ This information is derived from the Fund's semi-annual and annual financial statements.

⁽²⁾ Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on shareholder residency and can be different from 13%.

⁽³⁾ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

⁽⁴⁾ The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

⁽⁵⁾ This information is provided for the period(s)/year(s) ended September 30, 2023 and March 31.
