The Fund's net assets decreased by \$23.4 million to \$659.4 million from March 31, 2024 to September 30, 2024. The Fund had net redemptions of \$62.8 million for the period. The portfolio's performance increased assets by \$40.4 million. The Fund paid distributions totalling \$1.0 million. Series A shares returned 5.9% after fees and expenses for the six-month period ended September 30, 2024. Over the same time period, the Fund's benchmark returned 8.0%. The benchmark is a combination of the FTSE Canada Universe Bond Index (TR) - 40%, the MSCI World Index (NTR) - 30% and the S&P/TSX Composite Index (GTR) - 30% (the Benchmark or the Index).

The performance of the Fund's other Series is substantially similar to that of Series A shares, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

The following commentary pertains to the results of operations of the Underlying Funds.

U.S. companies reported 13% year-over-year earnings growth through the second quarter of 2024, led by the information technology, health care and financials sectors. Over the same period, inflation declined consistently, clearing hurdles for the U.S. Federal Reserve Board (Fed) to cut interest rates in September. Fixed-income yields tracked lower with falling inflation, creating additional capital gains for investors. U.S. equities, as measured by the S&P 500 Index, responded well to these developments, with a double-digit return year-to-date and little volatility.

The economy in Canada was weaker than in the United States, especially when measured on a per-capita basis. Many Canadian households had to renew mortgages at much higher interest rates in 2024 compared to rates initiated in 2019 and 2020. As a result, we saw a stagnant real estate market and weak overall consumption, causing Canada's inflation rate to fall faster than its peers. The Bank of Canada (BoC) started to cut interest rates in June, cutting them three times during the period for a total of 75 basis points (bps).

Elsewhere in the world, the European Central Bank cut its deposit rate twice during the period to 3.5%. Japanese equities, as measured by the Nikkei 225 Index, fell dramatically in August as markets anticipated a shift from the Bank of Japan in response to inflation. This forced the central bank to communicate a softer tone. The Japanese yen rebounded, helping to keep Japanese investments close to an all-time high.

China recently announced a series of stimulus policies to combat rapidly slowing consumption and support the economy. These policies included cutting interest rates, dropping bank reverse ratios and other incentives to purchase properties and stocks. Investors rushed into the markets, driving large gains. Chinese equities, as measured by the Shanghai Shenzhen CSI 300 Index, rebounded 27% in the last two weeks of September.

The Fund underperformed its benchmark for the period. Exposures to Japan and the energy sector detracted from the Fund's performance, as did an overweight cash allocation. The largest individual detractors from performance were holdings in CI Energy Giants Covered Call ETF, CI WisdomTree Japan Equity Index ETF, CI Global Short-Term Bond Fund, CI Private Markets Income Fund and CI Adams Street Global Private Markets Fund.

An underweight allocation to fixed income contributed to the Fund's performance, as did an underweight exposure to global bonds. Top individual contributors to the Fund's performance included holdings in CI Select Canadian Equity Managed Fund, CI Select International Equity Managed Fund, CI Select U.S. Equity Managed Fund, CI Canadian Bond Fund and CI Munro Global Growth Equity Fund.

Existing holdings in CI Select U.S. Equity Managed Fund, CI Munro Global Growth Equity Fund, CI DoubleLine Total Return Bond US\$ Fund and CI Energy Giants Covered Call ETF were increased. We trimmed the Fund's positions in CI WisdomTree Japan Equity Index ETF, CI Income Fund, CI Select International Equity Managed Fund, CI Canadian Bond Fund and CI Select Canadian Equity Managed Fund.

RECENT DEVELOPMENTS

The next year should be interesting as a series of events unfolds. The Fed and BoC are likely to continue to cut interest rates as much as 200 bps. Other significant events include the U.S. presidential election and a roll-out of economic stimulus policies in China. Investors will also be closely watching the performance of companies that supply and invest in artificial intelligence.

Management Report of Fund Performance for the period/year ended September 30, 2024

Investors are looking for interest-rate cuts to keep economies growing and provide a boost to small businesses. We believe interest-rate cuts will be implemented quickly enough to change these trends. Both the Fed and the BoC seem eager to cut interest rates, and they have ample room to make this adjustment.

In Canada, mortgage rates have fallen over 100 bps (five-year term) in the last several months, easing some of the pain for homeowners. However, we do not believe these interest-rate cuts will cause inflation to rise. Consumers are less likely to pay higher prices for goods, a change from the period shortly following the COVID-19 pandemic. Savings have depleted to normal levels. If interest-rate cuts pause sometime next year due to a resurgence of inflation and the economy being too robust, we expect the pain to be felt in fixed-income markets as they are currently priced for very aggressive interest-rate cuts.

(1) This information is derived from the Fund's semi-annual and annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on shareholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

(5) This information is provided for the period(s)/year(s) ended September 30, 2024 and March 31.
