RESULTS OF OPERATIONS

The Fund's net assets decreased by \$13.9 million to \$86.6 million from March 31, 2022 to September 30, 2022. The Fund had net redemptions of \$1.0 million during the period. The portfolio's performance decreased assets by \$11.7 million. The Fund paid distributions totalling \$1.2 million. Series A shares returned -12.2% after fees and expenses for the six-month period ended September 30, 2022. Over the same time period, the Fund's benchmark returned -13.6%. The benchmark is a combination of the MSCI World Total Return Index - 50% and the S&P/TSX Composite Total Return Index - 50% (the Benchmark or the Index).

The performance of the Fund's other Series is substantially similar to that of Series A shares, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

Inflation was a concern during the period. Following a return to greater normalcy as the pandemic began to wane, demand for products and services surged. As prices rose, inflation measures jumped. Initially, central banks expected this rise to be only transitional. The situation became more complicated in the early part of 2022 amid Russia's conflict with Ukraine. Both Russia and Ukraine are major exporters of natural gas, oil, metals and wheat. Prices of commodities rose significantly within a very short time. Central banks began to combat rising inflation with aggressive interest rate increases. As interest rates rose above original expectations, bond and equity prices both declined considerably.

The Fund outperformed its benchmark for the period. The Fund's overweight allocation to cash contributed to its performance, as did its exposures to Japanese equities and the energy sector. Top individual contributors to the Fund's performance included holdings in CI Select Canadian Equity Managed Fund, CI Select International Equity Managed Fund and CI Munro Global Growth Equity Fund.

Exposure to gold companies and the semiconductor industry detracted from the Fund's performance. The largest individual detractors from performance were holdings in CI Select U.S. Equity Managed Fund and CI Precious Metals Fund.

We increased the Fund's defensive positioning with an increased cash allocation. We also added to the Fund's Canadian equity exposure. The Fund's exposure to the energy sector was increased. We trimmed the Fund's overall equity exposure and reduced its U.S. and European equity holdings.

RECENT DEVELOPMENTS

We believe that inflation is likely to peak before the end of the year, but expect it to remain stubbornly above central banks' inflation targets in 2023. This suggests that monetary tightening has further to go, which should continue to create volatility in financial markets. The sharp selloff in fixed income markets has pushed real yields into positive territory, resulting in a more-normal economic environment. We believe this should allow bond prices to bottom out ahead of stocks.

While equity valuations have retreated and look better than at any time since the global financial crisis, they are not cheap when viewed against other periods in history when inflation was elevated. Unfortunately, this is part of the process of removing the accommodative monetary policy that has been in place for over a decade. Stocks are likely to see more downward earnings revisions before they find their bottom.

We remain cautiously positioned, currently favouring cash over stocks and bonds. We also favour real assets, such as commodity-related and resource stocks, which tend to perform better in inflationary periods. Canada is preferred in this environment but we also like Latin America. Japan and, eventually, China should benefit from delayed reopening of their economies later this year and next.

(1) This information is derived from the Fund's semi-annual and annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on shareholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period. The higher a Fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period.

(5) This information is provided for the period ended September 30, 2022 and the years ended March 31.
