RESULTS OF OPERATIONS

The Fund's net assets decreased by \$0.8 million to \$5.6 million from March 31, 2022 to September 30, 2022. The Fund had net redemptions of \$0.3 million during the period. The portfolio's performance decreased assets by \$0.3 million. The Fund paid distributions totalling \$0.2 million. Class A units returned -4.7% after fees and expenses for the six-month period ended September 30, 2022. Over the same time period, the Fund's benchmark returned -10.2%. The benchmark is a combination of the FTSE Canada Universe Bond Total Return Index - 40%, the MSCI World Total Return Index - 35% and the S&P/TSX Composite Total Return Index - 25% (the Benchmark or the Index).

The performance of the Fund's other Classes is substantially similar to that of Class A units, except for differences in the structure of fees and expenses. For the returns of the Fund's other Classes, please refer to the "Past Performance" section.

The following commentary pertains to the results of operations of the Underlying Funds.

Inflation was a concern during the period. Following a return to greater normalcy as the pandemic began to wane, demand for products and services surged. As prices rose, inflation measures jumped. Initially, central banks expected this rise to be only transitional. The situation became more complicated in the early part of 2022 amid Russia's conflict with Ukraine. Both Russia and Ukraine are major exporters of natural gas, oil, metals and wheat. Prices of commodities rose significantly within a very short time. Central banks began to combat rising inflation with aggressive interest rate increases. As interest rates rose above original expectations, bond and equity prices both declined considerably.

The Fund outperformed its benchmark for the period. The Fund's shorter duration (sensitivity to interest rates) positioning in its fixed income component contributed to performance, as did its exposure to Canadian equities. Top individual contributors to the Fund's performance included holdings in CI Select Canadian Equity Managed Fund and CI Select International Equity Managed Fund.

Security selection detracted from the Fund's performance. The largest individual detractor from performance was a holding in CI Select U.S. Equity Managed Fund.

RECENT DEVELOPMENTS

We believe that inflation is likely to peak before the end of the year, but expect it to remain stubbornly above central banks' inflation targets in 2023. This suggests that monetary tightening has further to go, which should continue to create volatility in financial markets. The sharp selloff in fixed income markets has pushed real yields into positive territory, resulting in a more-normal economic environment. We believe this should allow bond prices to bottom out ahead of stocks.

While equity valuations have retreated and look better than at any time since the global financial crisis, they are not cheap when viewed against other periods in history when inflation was elevated. Unfortunately, this is part of the process of removing the accommodative monetary policy that has been in place for over a decade. Stocks are likely to see more downward earnings revisions before they find their bottom range.

We remain cautiously positioned, currently favouring cash over stocks and bonds. We also favour real assets, such as commodity-related and resource stocks, which tend to perform better in inflationary periods.

Independent Review Committee

Effective October 6, 2022, John Sheedy became a member of the Independent Review Committee (IRC) of CI Funds.

RELATED PARTY TRANSACTIONS

Manager, Portfolio Advisor, Trustee and Registrar

CI Investments Inc. is the Manager, Portfolio Advisor, Trustee and Registrar of the Fund. CI Investments Inc. is a subsidiary of CI Financial Corp. The Manager, in consideration for management fees, provides management services required in the day-to-day operations of the Fund. The Portfolio Advisor, in consideration for risk management fees, acts as Risk Manager to the Fund and is responsible for providing and overseeing the risk management strategy for the Fund. The Manager bears all of the operating expenses of the Fund (other than taxes, borrowing costs, investment sub-advisory costs paid to the Protection Manager and new governmental fees) in return for an administration fee.

Management fee and administration fee rates as at September 30, 2022, for each of the Classes are shown below:

	Annual management fee rate (%)	Annual administration fee (%)
Class A	2.500*	0.22
Class F	1.500*	0.22
Class O	Paid directly by investor	0.15

*This is the aggregated management fees payable annually to the Manager, Risk Manager and Protection Manager based on the value of the net assets in the Active Portfolio.

The Manager received \$0.1 million in management fees and risk management fees and \$0.01 million in administration fees for the period.

CI G5|20i 2036 Q2 Fund

Management Report of Fund Performance for the period ended September 30, 2022

Management Fees

Approximately 27% of total management fees were used to pay for sales and trailing commissions. The remaining 73% of management fees were used to pay for investment management and other general administration.

Related Fund Trading

Related fund trading occurs when a Fund purchases or sells units/shares of another Fund managed by the Manager. During the period ended September 30, 2022, the Fund engaged in related fund trading or held position(s) in related fund(s) at the end of the period.

Independent Review Committee

The Manager, in respect of the Fund, received the following standing instructions from the IRC with respect to related party transactions:

The applicable standing instructions require, amongst others, that related party transactions be conducted in accordance with the Manager's policies and procedures and applicable law and that the Manager advise the IRC of any material breach of such policies. The Manager's policies and procedures require that investment decisions in respect of related party transactions (a) are free from any influence by an entity related to the Manager and without taking into account any consideration relevant to an entity related to the Manager; (b) represent the business judgment of the Manager, uninfluenced by considerations other than the best interests of the Fund; and (c) do not exceed the limitations of the applicable legislation. Annually, the IRC reviews reports describing each instance that the Manager acted in reliance on the standing instructions noted above.

Except as otherwise noted above under Related Party Transactions section, the Fund was not a party to any related party transactions during the period ended September 30, 2022. If the Fund invested in related party transactions, it relied on the IRC's standing instructions regarding related party transactions during this reporting period.

(1) This information is derived from the Fund's semi-annual and annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on unitholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period. The higher a Fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period.

(5) This information is provided for the period ended September 30, 2022 and the years ended March 31.

PAST PERFORMANCE

This section describes how the Fund has performed in the past. Remember, past returns do not indicate how the Fund will perform in the future. The information shown assumes that distributions made by the Fund in the periods shown were reinvested in additional units of the relevant Class of the Fund. In addition, the information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance.

Year-by-Year Returns

The following charts show the Fund's semi-annual and annual performance for each of the periods shown and illustrate how the Fund's performance has changed from period to period. In percentage terms, the charts show how much an investment made on the first day of each financial period would have grown or decreased by the last day of each financial period, except where noted.

¹ 2017 return is for the period from April 1, 2016 to March 31, 2017.
