INVESTMENT OBJECTIVE AND STRATEGIES

The investment objective of the CI Portfolio Series Balanced Fund (the Fund) is to provide a balance between income and long-term capital growth while diversifying risk by investing in income and equity mutual funds managed by CI Investments Inc.

The portfolio advisor invests the assets of the Fund in units or shares of other mutual funds (the Underlying Funds), rebalances the Fund's assets among the Underlying Funds based on the Fund's target asset allocations, and monitors the Underlying Funds and may make changes to the Underlying Funds or the allocated percentages of the Underlying Funds without notice to unitholders. Strategic asset allocation is the principal investment strategy used to create a portfolio diversified by investment style, asset class and geographic region. This generally includes Canadian equity, U.S. equity, international equity, Canadian fixed-income and global fixed-income securities.

The portfolio advisor considers, among other factors, each Underlying Fund's investment objective and strategies in determining the Fund's target asset allocations, past performance and historical volatility in the context of a diversified holding of the Underlying Funds suitable for the investment objective of the Fund.

For a complete discussion of the Fund's and the Underlying Funds' respective investment objective and strategies, please refer to the Fund's and the Underlying Funds' most recently filed simplified prospectus.

RISK

No changes affecting the overall level of risk associated with investing in the Fund were made during the period/year. The risks of the Fund remain as discussed in the Fund's most recently filed simplified prospectus or its amendments. The Manager reviews the risk rating for the Fund on an annual basis, at a minimum, based on the methodology mandated by the Canadian Securities Administrators to determine the risk level of the Fund. Any change to the risk rating made during the period/year was as a result of such review and was not a result of any change to the investment objective, strategies or management of the Fund.

RESULTS OF OPERATIONS

The Fund's net assets decreased by \$582.8 million to \$3,107.4 million from March 31, 2022 to March 31, 2023. The Fund had net redemptions of \$306.5 million during the year. The portfolio's performance decreased assets by \$88.2 million. The Fund paid distributions totalling \$188.1 million. Series A units returned -2.9% after fees and expenses for the one-year period ended March 31, 2023. Over the same time period, the Fund's benchmark returned -1.9%. The benchmark is a combination of the FTSE Canada Universe Bond Total Return Index - 40%, the MSCI World Total Return Index - 30% and the S&P/TSX Composite Total Return Index - 30% (the Benchmark or the Index).

The performance of the Fund's other Series is substantially similar to that of Series A units, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

The following commentary pertains to the results of operations of the Underlying Funds.

By the end of 2022, the primary concern of market participants was inflation. However, inflation began to cool and supply chain disruptions eased, as evidenced by declining commodity prices. Investors entered 2023 with extreme optimism that an economic soft landing could be achieved in the United States, with cooling inflation and the U.S. Federal Reserve Board (Fed) close to the end of its interest rate increases. U.S. equities rose as a result but were later challenged by continued strength in the labour market, which is expected to drive higher input costs and inflation.

Financial markets weakened as runs on bank deposits hit the news with the failures of SVB Financial Group and Signature Bank. The Fed and U.S. Treasury came to the rescue quickly, assuring that deposits were safe and announced a new program to allow banks to borrow from the Fed using their holdings of government bonds as collateral. Elsewhere in the world, Credit Suisse Group AG was under stress and was forced to be sold to UBS Group AG at a fraction of its value at beginning of the year.

CI Portfolio Series Balanced Fund

Management Report of Fund Performance for the period/year ended March 31, 2023

The price of crude oil dipped as low as US\$67. The Organization of the Petroleum Exporting Countries announced a surprise production cut, and the price decline was reversed as investors realized that there could still be a supply and demand imbalance during a recession. Given that the Canadian equity index has more exposure to banks and energy, the performance of the S&P/TSX Composite Index trailed market indexes in the United States and their global peers.

China failed to impress investors as its government did not announce new policies or measures following the announcement of reopening from COVID-19 pandemic lockdowns in November 2022. The Chinese government reported weak manufacturing numbers in March 2023, highlighting weakness in both domestic and foreign demand.

The Fund underperformed its benchmark for the year. An overweight allocation to Canadian equities and growth-oriented equities detracted from the Fund's performance, as did currency hedges. The largest individual detractors from performance were holdings in CI Synergy Canadian Corporate Class, CI Signature Emerging Markets Corporate Class, CI Canadian Core Plus Bond Fund, CI Canadian Bond Fund and CI Cambridge Canadian Dividend Fund.

The Fund's exposures to the energy sector and U.S. fixed-income securities contributed to its performance. Allocation to momentum factor equities also contributed to the Fund's performance. Top individual contributors to the Fund's performance included holdings in CI International Equity Fund, CI Emerging Markets Corporate Class, CI International Value Corporate Class, CI Synergy Canadian Corporate Class and CI Morningstar International Value Index ETF.

During the year, we added new Fund positions in CI Emerging Markets Corporate Class, CI International Equity Fund, CI Canadian Dividend Fund, iShares China Large-Cap ETF and CI U.S. Stock Selection Corporate Class. We initiated new, and subsequently eliminated, Fund positions in CI Health Care Giants Covered Call ETF, CI Canadian All Cap Equity Income Fund and CI Synergy Canadian Corporate Class. Existing Fund holdings in CI WisdomTree Canada Quality Dividend Growth Index ETF, CI Morningstar Canada Value Index ETF and CI Canadian Bond Fund were increased.

The Fund's positions in CI Morningstar International Momentum Index ETF, CI Global Financial Sector ETF, CI American Value Corporate Class, CI Income Fund and CI Sentry Canadian Income Fund were eliminated. Fund holdings in CI Precious Metals Fund, iShares S&P/TSX Capped Energy Index ETF, VanEck Semiconductor ETF, CI Energy Giants Covered Call ETF and CI Global Bond Fund were trimmed.

RECENT DEVELOPMENTS

We believe the current economic cycle is likely to end with a slowdown, and we are finding opportunities in specific countries/regions (Japan, China and emerging markets) and sectors and sub-sectors (energy, health care and semiconductors). Their prices in the medium term are supported by demand, though in the near term, their valuations could rise or fall with news headlines.

The Fund has a larger cash allocation. We anticipate bond prices to decline for higher long-term average interest rates and equity valuations to decline to their normal end-of-cycle valuations. Hence, there will be opportunities to add core holdings to the Fund, such as long-dated bonds and U.S. equities.

Administrator

Effective October 24, 2022, RBC Investor Services Trust ceased acting as the administrator to the Fund and CIBC Mellon Global Securities Services Company started acting as the administrator to the Fund.

Independent Review Committee

Effective October 6, 2022, John Sheedy became a member of the Independent Review Committee (IRC) of CI Funds.

(1) This information is derived from the Fund's audited annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on unitholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

(5) This information is provided for the period(s)/year(s) ended March 31.
