INVESTMENT OBJECTIVE AND STRATEGIES

The investment objective of the CI Select 40i60e Managed Portfolio Corporate Class (the Fund) is to provide a balance between income and long-term capital growth, while diversifying risk by investing in equity and income securities. It aims to invest 40% of its assets in mutual funds that invest primarily in income securities and 60% of its assets in mutual funds that invest primarily in equity securities.

In order to achieve its investment objective, the Fund's assets are diversified by investment style, asset class, and geographic region. This generally includes approximately 40% in Canadian fixed income and global fixed income securities, and 60% of Canadian equity, U.S. equity, and international equity securities.

For a complete discussion of the Fund's and the Underlying Funds' respective investment objective and strategies, please refer to the Fund's and the Underlying Funds' most recently filed simplified prospectus.

RISK

No changes affecting the overall level of risk associated with investing in the Fund were made during the period/year. The risks of the Fund remain as discussed in the Fund's most recently filed simplified prospectus or its amendments. The Manager reviews the risk rating for the Fund on an annual basis, at a minimum, based on the methodology mandated by the Canadian Securities Administrators to determine the risk level of the Fund. Any change to the risk rating made during the period/year was as a result of such review and was not a result of any change to the investment objective, strategies or management of the Fund.

RESULTS OF OPERATIONS

The Fund's net assets decreased by \$141.7 million to \$737.7 million from March 31, 2022 to March 31, 2023. The Fund had net redemptions of \$109.0 million during the year. The portfolio's performance decreased assets by \$20.7 million. The Fund paid distributions totalling \$12.0 million. Series A shares returned -2.5% after fees and expenses for the one-year period ended March 31, 2023. Over the same time period, the Fund's benchmark returned -1.9%. The benchmark is a combination of the FTSE Canada Universe Bond Total Return Index - 40%, the MSCI World Total Return Index - 30% and the S&P/TSX Composite Total Return Index - 30% (the Benchmark or the Index).

The performance of the Fund's other Series is substantially similar to that of Series A shares, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

By the end of 2022, the primary concern of market participants was inflation. However, inflation began to cool and supply chain disruptions eased, as evidenced by declining commodity prices. Investors entered 2023 with extreme optimism that an economic soft landing could be achieved in the United States, with cooling inflation and the U.S. Federal Reserve Board (Fed) close to the end of its interest rate increases. U.S. equities rose as a result but were later challenged by continued strength in the labour market, which is expected to drive higher input costs and inflation.

Financial markets weakened as runs on bank deposits hit the news with the failures of SVB Financial Group and Signature Bank. The Fed and U.S. Treasury came to the rescue quickly, assuring that deposits were safe and announced a new program to allow banks to borrow from the Fed using their holdings of government bonds as collateral. Elsewhere in the world, Credit Suisse Group AG was under stress and was forced to be sold to UBS Group AG at a fraction of its value at beginning of the year.

Management Report of Fund Performance for the period/year ended March 31, 2023

The price of crude oil dipped as low as US\$67 a barrel. The Organization of the Petroleum Exporting Countries announced a surprise production cut, and the price decline was reversed as investors realized that there could still be a supply and demand imbalance during a recession. Given that the Canadian equity index has more exposure to banks and energy, the performance of the S&P/TSX Composite Index trailed market indexes in the United States and their global peers.

China failed to impress investors as its government did not announce new policies or measures following the announcement of reopening from COVID-19 pandemic lockdowns in November 2022. The Chinese government reported weak manufacturing numbers in March 2023, highlighting weakness in both domestic and foreign demand.

The Fund underperformed its benchmark for the year. An underweight allocation to equities detracted from the Fund's performance, as did exposure to precious metals. The largest individual detractors from the Fund's performance were holdings in CI Select Canadian Equity Managed Fund, CI Income Fund, CI Select U.S. Equity Managed Fund, CI Canadian Bond Fund and CI Precious Metals Fund.

The Fund's overweight exposures to international equities and U.S. and global fixed-income securities contributed to its performance. Allocation to the energy sector also contributed to the Fund's performance. Top individual contributors to the Fund's performance included holdings in CI Select International Equity Managed Fund, CI WisdomTree Japan Equity Index ETF, CI Energy Giants Covered Call ETF, CI Adams Street Global Private Markets Fund and VanEck Semiconductor ETF.

During the year, existing Fund holdings in CI Canadian Bond Fund and CI DoubleLine Total Return Bond US\$ Fund were increased. The Fund's position in CI Munro Alternative Global Growth Fund was eliminated, and we trimmed Fund holdings in VanEck Semiconductor ETF, CI Global Financial Sector ETF, CI Precious Metals Fund, CI Energy Giants Covered Call ETF, CI WisdomTree Japan Equity Index ETF, CI Munro Global Growth Equity Fund, CI Select U.S. Equity Managed Fund and CI Select International Equity Managed Fund.

RECENT DEVELOPMENTS

We believe the current economic cycle is likely to end with a slowdown, and we are finding opportunities in specific countries/regions (Japan, China and emerging markets) and sectors and sub-sectors (energy, health care and semiconductors). Their prices in the medium term are supported by demand, though in the near term, their valuations could rise or fall with news headlines.

The Fund has a larger cash allocation. We anticipate bond prices to decline for higher long-term average interest rates and equity valuations to decline to their normal end-of-cycle valuations. Hence, there will be opportunities to add core holdings to the Fund, such as long-dated bonds and U.S. equities.

(1) This information is derived from the Fund's audited annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on shareholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

(5) This information is provided for the period(s)/year(s) ended March 31.
