INVESTMENT OBJECTIVE AND STRATEGIES

The investment objective of the CI Mosaic Growth ETF Portfolio (the Fund) is to provide long-term capital growth, by investing primarily in a diversified portfolio of equity exchange-traded funds (ETFs).

The Fund will primarily invest in a mix of equity ETFs and, if deemed necessary by the portfolio advisor, other mutual funds (the underlying ETF and/or mutual funds or the underlying funds) and securities. Equity ETFs will provide exposure to Canadian, U.S., and international equity securities. The Fund may also invest in fixed income ETFs to provide exposure to Canadian and global fixed income securities.

The Fund's asset mix will generally be kept within the following ranges:

- 80% and 100% for equity securities; and
- 0% and 20% for fixed income securities.

The portfolio advisor will, in its sole discretion:

- invest some or all assets of the fund in securities of ETFs and other mutual funds which may be managed by CI Investments Inc., its affiliates and/or other investment fund managers;
- rebalance the fund's assets among the underlying ETFs and/or mutual funds based on the Fund's target asset allocations; and
- monitor the underlying ETFs and/or mutual funds on an ongoing basis and may make changes to the underlying funds or allocated percentages of the underlying funds.

The portfolio advisor uses strategic asset allocation as the principal investment strategy to create a portfolio diversified by investment style, asset class and geographic region. The portfolio advisor will tactically review and adjust the asset allocation strategy, in its sole discretion, depending on various factors, including but not limited to, economic conditions, market conditions, interest rates, relative valuations of equity and fixed income securities, each underlying ETF's and/or mutual fund's investment objectives, past performance and historical volatility in the context of building and managing a diversified portfolio suitable for the investment objective of the Fund.

For a complete discussion of the Fund's and the Underlying Funds' respective investment objective and strategies, please refer to the Fund's and the Underlying Funds' most recently filed simplified prospectus.

RISK

The Manager reviews the risk rating for the Fund on an annual basis, at a minimum, based on the methodology mandated by the Canadian Securities Administrators to determine the risk level of the Fund. Any change to the risk rating made during the period/year was as a result of such review and was not a result of any change to the investment objective, strategies or management of the Fund.

CI Mosaic Growth ETF Portfolio

Management Report of Fund Performance for the period/year ended March 31, 2023

By the end of 2022, the primary concern of market participants was inflation. However, inflation began to cool and supply chain disruptions eased, as evidenced by declining commodity prices. Investors entered 2023 with extreme optimism that an economic soft landing could be achieved in the United States, with cooling inflation and the U.S. Federal Reserve Board (Fed) close to the end of its interest rate increases. U.S. equities rose as a result but were later challenged by continued strength in the labour market, which is expected to drive higher input costs and inflation.

Financial markets weakened as runs on bank deposits hit the news with the failures of SVB Financial Group and Signature Bank. The Fed and U.S. Treasury came to the rescue quickly, assuring that deposits were safe and announced a new program to allow banks to borrow from the Fed using their holdings of government bonds as collateral. Elsewhere in the world, Credit Suisse Group AG was under stress and was forced to be sold to UBS Group AG at a fraction of its value at beginning of the year.

The price of crude oil dipped as low as US\$67. The Organization of the Petroleum Exporting Countries announced a surprise production cut, and the price decline was reversed as investors realized that there could still be a supply and demand imbalance during a recession. Given that the Canadian equity index has more exposure to banks and energy, the performance of the S&P/TSX Composite Index trailed market indexes in the United States and their global peers.

China failed to impress investors as its government did not announce new policies or measures following the announcement of reopening from COVID-19 pandemic lockdowns in November 2022. The Chinese government reported weak manufacturing numbers in March 2023, highlighting weakness in both domestic and foreign demand.

The Fund underperformed its benchmark for the year. An underweight allocation to global equities and exposure to precious metals detracted from the Fund's performance, as did currency hedges. The largest individual detractors from the Fund's performance were holdings in iShares S&P/TSX 60 Index ETF, CI Global Financial Sector ETF, CI Munro Alternative Global Growth Fund, CI Morningstar U.S. Momentum Index ETF and CI Morningstar Canada Value Index ETF.

The Fund's underweight exposure to U.S. equities contributed to performance, as did exposures to the energy sector and quality-oriented stocks. Top individual contributors to the Fund's performance included holdings in CI U.S. 500 Index ETF, CI WisdomTree U.S. Quality Dividend Growth Index ETF, Franklin FTSE Japan Index ETF, CI Morningstar International Value Index ETF and CI WisdomTree International Quality Dividend Growth Index ETF.

During the year, we added new Fund positions in CI U.S. 500 Index ETF, iShares 20+ Year Treasury Bond ETF and CI Health Care Giants Covered Call ETF. Existing Fund holdings in iShares S&P/TSX 60 Index ETF, CI Emerging Markets Alpha ETF, CI Munro Alternative Global Growth Fund, CI WisdomTree International Quality Dividend Growth Index ETF and Franklin FTSE Japan Index ETF were increased. The Fund's positions in CI Gold+ Giants Covered Call ETF, CI Morningstar U.S. Momentum Index ETF and CI Global Financial Sector ETF were eliminated. Fund holdings in CI Morningstar Canada Value Index ETF and iShares Core MSCI Europe ETF were trimmed.

RECENT DEVELOPMENTS

We believe the current economic cycle is likely to end with a slowdown, and we are finding opportunities in specific countries/regions (Japan, China and emerging markets) and sectors and sub-sectors (energy, health care and semiconductors). Their prices in the medium term are supported by demand, though in the near term, their valuations could rise or fall with news headlines.

The Fund has a larger cash allocation. We anticipate bond prices to decline for higher long-term average interest rates and equity valuations to decline to their normal end-of-cycle valuations. Hence, there will be opportunities to add core holdings to the Fund, such as long-dated bonds and U.S. equities.

Administrator

Effective November 14, 2022, RBC Investor Services Trust ceased acting as the administrator to the Fund and CIBC Mellon Global Securities Services Company started acting as the administrator to the Fund.

Independent Review Committee

Effective October 6, 2022, John Sheedy became a member of the Independent Review Committee (IRC) of CI Funds.

Risk rating

Effective July 14, 2022, the risk rating for the Fund changed from "Medium" to "Low-to-Medium". This change is the result of an annual review to comply with the methodology mandated by the Canadian Securities Administrators and is not the result of any changes to investment objective, strategies or management of the Fund.

(1) This information is derived from the Fund's audited annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on unitholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

(5) This information is provided for the period(s)/year(s) ended March 31.
