RESULTS OF OPERATIONS

The Fund's net assets decreased by \$1.9 million to \$115.8 million from March 31, 2023 to September 30, 2023. The Fund had net sales of \$1.6 million during the period. The portfolio's performance decreased assets by \$3.5 million. Series A units returned -3.0% after fees and expenses for the six-month period ended September 30, 2023. Over the same time period, the Fund's benchmark returned -3.4%. The benchmark is a combination of the Bloomberg Global Aggregate Bond Total Return Index - 40%, the FTSE Canada Universe Bond Total Return Index - 40%, the S&P 500 Total Return Index - 7%, the S&P/TSX Composite Total Return Index - 7% and the MSCI ACWI Ex-U.S. Total Return Index - 6% (the Benchmark or the Index).

The performance of the Fund's other Series is substantially similar to that of Series A units, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

The following commentary pertains to the results of operations of the Underlying Funds.

It was a rough period, with both bonds and equities declining. Yields kept rising as most market participants do not expect an economic recession in the near term. Rating agency Fitch Ratings Inc. downgraded the United States' "risk free" rating. Equities declined following a solid rebound in the first two quarters of 2023. On a year-to-date basis, equities remained strong, outperforming fixed-income securities.

The Fund slightly outperformed its benchmark for the period. An overweight allocation to cash and currency hedges contributed to the Fund's performance. Exposure to global equities and Japan contributed to the Fund's performance, as did allocations to short-term bonds and credit. Top individual contributors to the Fund's performance included holdings in CI U.S. 500 Index ETF, CI Alternative Investment Grade Credit Fund, CI Energy Giants Covered Call ETF, CI Munro Alternative Global Growth Fund and CI Morningstar International Value Index ETF.

Security selection detracted from the Fund's performance, as did an underweight exposure to U.S. equities. A lack of exposure to global bonds also detracted from the Fund's performance. The largest individual detractors from the Fund's performance were holdings in CI Enhanced Government Bond ETF, iShares 20+ Year Treasury Bond ETF, CI Global Investment Grade ETF, CI U.S. Treasury Inflation-Linked Bond Index ETF and SPDR Bloomberg Emerging Markets Local Bond ETF.

We increased the Fund's existing positions in CI Global Investment Grade ETF, CI Gold Bullion Fund, CI Enhanced Government Bond ETF, CI Auspice Broad Commodity ETF and CI WisdomTree International Quality Dividend Growth Index ETF. The Fund holdings in CI 1-5 Year Laddered Government Strip Bond Index ETF, CI Enhanced Short Duration Bond Fund, iShares 20+ Year Treasury Bond ETF, CI U.S. Treasury Inflation-Linked Bond Index ETF and CI Morningstar Canada Value Index ETF were trimmed.

RECENT DEVELOPMENTS

The steady increase in market interest rates has put pressure on the system. After a year and a half of interest rate increases, and later, stern warnings from economists, central bankers and investors alike that a recession was coming, most hard economic data and employment is signalling anything but. This has forced the U.S. Federal Reserve Board (Fed) and other central banks to maintain monetary tightening.

Inflation is on the decline, which may lead the Fed and other central banks to stop raising interest rates. However, the most recent data shows inflation falling to 3.9% year-over-year, which is still well above the Fed's 2% target. The steepening of the yield curve has unsettled stocks, with U.S. equities (as measured by the S&P 500 Index) down almost 10% from their recent peak. Absent a recession, these levels for inflation and longer-term interest rates may stay somewhat elevated, causing more pressure on stock market valuations.

U.S. corporate earnings have flattened this year despite average U.S. nominal gross domestic product (GDP) growth of 8% since the end of 2021 as profit margins compressed. Higher interest, wages and other input expenses have weighed on corporate bottom lines. However, it now looks like margin deterioration may be behind us, having stabilized in the last quarter. Still, nominal growth is now slowing as inflation and GDP growth head lower. This challenges the consensus assumption for earnings growth into next year of approximately 10% with the likelihood for a slowing of the economy given the lagged effects of monetary tightening.

With overnight cash rates and short-term government and credit securities offering between 5–6% with little risk, the hurdle for owning equities has become higher. We hold extra cash in the Fund to give us flexibility. We also like our higher yield, lower duration (sensitivity to interest rates) positioning for the Fund, and we remain cautious on equities in the current environment. Commodities should also receive more allocations this fall.

(1) This information is derived from the Fund's semi-annual and annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on unitholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

(5) This information is provided for the period(s)/year(s) ended September 30, 2023 and March 31.

The words “may,” “could,” “should,” “would,” “suspect,” “outlook,” “believe,” “plan,” “anticipate,” “estimate,” “expect,” “intend,” “forecast,” “objective,” and similar expressions are intended to identify forward-looking statements.

Forward-looking statements are not guarantees of future performance. Forward-looking statements involve inherent risks and uncertainties, both about the Fund and general economic factors, so it is possible that predictions, forecasts, projections and other forward-looking statements will not be achieved. We caution you not to place undue reliance on these statements as a number of important factors could cause actual events or results to differ materially from those expressed or implied in any forward-looking statement made by the Fund. These factors include, but are not limited to, general economic, political and market factors in Canada, the United States and internationally, interest and foreign exchanges rates, global equity and capital markets, business competition, technological changes, changes in laws and regulations, judicial or regulatory judgments, legal proceedings and catastrophic events.

The above list of important factors that may affect future results is not exhaustive. Before making any investment decisions, we encourage you to consider these and other factors carefully. All opinions contained in forward-looking statements are subject to change without notice and are provided in good faith but without legal responsibility.
