Level 3 Reconciliation (cont'd)

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at September 30, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Equity	34,327,900	Discounted cash flows	Discount rate, terminal growth rate

The above investment is valued using the valuation techniques detailed below:

Discounted cash flows: The investment is valued based on its expected future cash flows.

The range of reasonably possible alternative assumptions would result in an increase or decrease in a fair value of approximately \$1,716,000.

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Equity	28,438,341	Discounted cash flows	Discount rate, terminal growth rate

The above investment is valued using the valuation techniques detailed below:

Discounted cash flows: The investment is valued based on its expected future cash flows.

The range of reasonably possible alternative assumptions would result in an increase or decrease in a fair value of approximately \$1,422,000.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable units of the Fund as at September 30, 2024 and March 31, 2024.

Level 3 Reconciliation (cont'd)

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at September 30, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Equity	966,848	Discounted cash flows	Discount rate, terminal growth rate

The above investment is valued using the valuation techniques detailed below:

Discounted cash flows: The investment is valued based on its expected future cash flows.

The range of reasonably possible alternative assumptions would result in an increase or decrease in a fair value of approximately \$48,000.

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Equity	800,968	Discounted cash flows	Discount rate, terminal growth rate

The above investment is valued using the valuation techniques detailed below:

Discounted cash flows: The investment is valued based on its expected future cash flows.

The range of reasonably possible alternative assumptions would result in an increase or decrease in a fair value of approximately \$40,000.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable units of the Fund as at September 30, 2024 and March 31, 2024.

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at September 30, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Equity	966,848	Discounted cash flows	Discount rate, terminal growth rate

The above investment is valued using the valuation techniques detailed below:

Discounted cash flows: The investment is valued based on its expected future cash flows.

The range of reasonably possible alternative assumptions would result in an increase or decrease in a fair value of approximately \$48,000.

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Equities	800,968	Discounted cash flows	Discount rate, terminal growth rate

The above investments are valued using the valuation techniques detailed below:

Discounted cash flows: The investments are valued based on its expected future cash flows.

The range of reasonably possible alternative assumptions would result in an increase or decrease in a fair value of approximately \$40,000.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable units of the Fund as at September 30, 2024 and March 31, 2024.

Level 3 Reconciliation (cont'd)

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at September 30, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Bond	14,208,866	Discounted cash flows	Credit spreads
Bond	7,102,357	Market comparable analysis	Estimated sale price, discount rate
Equity	9,040,269	Capitalized cash flow	Discount rate, sales growth rate

The above investments are valued using the valuation techniques detailed below:

Discounted cash flows: The investment is valued based on its expected future cash flows.

The range of reasonably possible alternative assumptions would result in an increase or decrease in a fair value of approximately \$710,000.

Market comparable analysis: Bonds are valued based on comparable companies bond valuation.

The range of reasonably possible alternative assumptions would result in an increase or decrease in a fair value of approximately \$355,000.

Capitalized cash flow: The investment is valued based on its expected future cash flows.

The range of reasonably possible alternative assumptions would result in an increase or decrease in a fair value of approximately \$452,000.

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Bonds	23,412,363	Discounted cash flows	Credit spreads
Bond	7,113,385	Market comparable analysis	Estimated sale price, discount rate
Equity	9,102,777	Capitalized cash flow	Discount rate, sales growth rate

The above investments are valued using the valuation techniques detailed below:

Discounted cash flows: The investments are valued based on its expected future cash flows.

The range of reasonably possible alternative assumptions would result in an increase or decrease in a fair value of approximately \$1,171,000.

Market comparable analysis: Bond is valued based on comparable companies bond valuation.

The range of reasonably possible alternative assumptions would result in an increase or decrease in a fair value of approximately \$356,000.

Capitalized cash flow: The investment is valued based on its expected future cash flows.

The range of reasonably possible alternative assumptions would result in an increase or decrease in a fair value of approximately \$455,000.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable units of the Fund as at September 30, 2024 and March 31, 2024.

Level 3 Reconciliation (cont'd)

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at September 30, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Fund	2,317,753	Net asset value as reported by underlying fund's investment manager	Net asset value
Bonds	2,101,575	Discounted cash flows	Credit spreads

The above investments are valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Discounted cash flows: The investments are valued based on its expected future cash flows.

The range of reasonably possible alternative assumptions would result in an increase or decrease in a fair value of approximately \$105,000.

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Fund	2,282,621	Net asset value as reported by underlying fund's investment manager	Net asset value
Bond	3,555,100	Discounted cash flows	Credit spreads

The above investments are valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Discounted cash flows: The investment is valued based on its expected future cash flows.

The range of reasonably possible alternative assumptions would result in an increase or decrease in a fair value of approximately \$117,000.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable shares of the Fund as at September 30, 2024 and March 31, 2024.

Level 3 Reconciliation (cont'd)

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at September 30, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
		Net asset value as reported by underlying fund's investment manager	Net asset value
Fund	18,226,062		
Bond	9,329,084	Discounted cash flows	Credit spreads

The above investments are valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Discounted cash flows: The investment is valued based on its expected future cash flows.

The range of reasonably possible alternative assumptions would result in an increase or decrease in a fair value of approximately \$466,000.

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
		Net asset value as reported by underlying fund's investment manager	Net asset value
Fund	17,949,795		
Bonds	8,734,643	Discounted cash flows	Credit spreads

The above investments are valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Discounted cash flows: The investments are valued based on its expected future cash flows.

The range of reasonably possible alternative assumptions would result in an increase or decrease in a fair value of approximately \$437,000.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable units of the Fund as at September 30, 2024 and March 31, 2024.

Level 3 Reconciliation (cont'd)

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at September 30, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Bond	1,118,709	Discounted cash flows	Credit spreads

The above investment is valued using the valuation techniques detailed below:

Discounted cash flows: The investment is valued based on its expected future cash flows.

The range of reasonably possible alternative assumptions would result in an increase or decrease in a fair value of approximately \$56,000.

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Bond	1,125,551	Discounted cash flows	Credit spreads

The above investment is valued using the valuation techniques detailed below:

Discounted cash flows: The investment is valued based on its expected future cash flows.

The range of reasonably possible alternative assumptions would result in an increase or decrease in a fair value of approximately \$56,000.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable units of the Fund as at September 30, 2024 and March 31, 2024.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at September 30, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Funds	20,041,003	Net asset value as reported by underlying fund's investment manager	Net asset value

The above investments are valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investments valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Fund	12,361,117	Net asset value as reported by underlying fund's investment manager	Net asset value

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable units of the Fund as at September 30, 2024 and March 31, 2024.

Level 3 Reconciliation (cont'd)

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at September 30, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Funds	155,705,821	Net asset value as reported by underlying fund's investment manager	Net asset value

The above investments are valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investments valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Funds	125,055,451	Net asset value as reported by underlying fund's investment manager	Net asset value

The above investments are valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investments valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable units of the Fund as at September 30, 2024 and March 31, 2024.

Level 3 Reconciliation (cont'd)

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at September 30, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Fund	84,430,322	Net asset value as reported by underlying fund's investment manager	Net asset value

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Fund	82,343,089	Net asset value as reported by underlying fund's investment manager	Net asset value

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable units of the Fund as at September 30, 2024 and March 31, 2024.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at September 30, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Fund	4,916,179	Net asset value as reported by underlying fund's investment manager	Net asset value

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Fund	5,937,230	Net asset value as reported by underlying fund's investment manager	Net asset value

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable shares of the Fund as at September 30, 2024 and March 31, 2024.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at September 30, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Fund	8,193,631	Net asset value as reported by underlying fund's investment manager	Net asset value

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Fund	9,895,383	Net asset value as reported by underlying fund's investment manager	Net asset value

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable shares of the Fund as at September 30, 2024 and March 31, 2024.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at September 30, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Fund	14,064,891	Net asset value as reported by underlying fund's investment manager	Net asset value

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Fund	14,146,015	Net asset value as reported by underlying fund's investment manager	Net asset value

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable shares of the Fund as at September 30, 2024 and March 31, 2024.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at September 30, 2024

Asset Type	Fair Value	Valuation Techniques	Significant Unobservable Inputs
Fund	18,934,366	Net asset value as reported by underlying fund's investment manager	Net asset value

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

as at March 31, 2024

Asset Type	Fair Value	Valuation Techniques	Significant Unobservable Inputs
Fund	17,688,209	Net asset value as reported by underlying fund's investment manager	Net asset value

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at September 30, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Fund	13,781,575	Net asset value as reported by underlying fund's investment manager	Net asset value

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Fund	9,895,383	Net asset value as reported by underlying fund's investment manager	Net asset value

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at September 30, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Fund	8,907,679	Net asset value as reported by underlying fund's investment manager	Net asset value

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Fund	9,895,383	Net asset value as reported by underlying fund's investment manager	Net asset value

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable shares of the Fund as at September 30, 2024 and March 31, 2024.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at September 30, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Fund	8,602,903	Net asset value as reported by underlying fund's investment manager	Net asset value

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Fund	8,312,122	Net asset value as reported by underlying fund's investment manager	Net asset value

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable shares of the Fund as at September 30, 2024 and March 31, 2024.

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at September 30, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Fund	8,111,286	Net asset value as reported by underlying fund's investment manager	Net asset value

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Fund	7,718,399	Net asset value as reported by underlying fund's investment manager	Net asset value

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable shares of the Fund as at September 30, 2024 and March 31, 2024.

Level 3 Reconciliation (cont'd)

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at September 30, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
		Net asset value as reported by underlying fund's investment manager	Net asset value
Fund	14,947,468		

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable shares of the Fund as at September 30, 2024 and March 31, 2024.
