The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at September 30, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Funds	51,653,538	Net asset value as reported by underlying fund's investment manager	Net asset value

The above investments are valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investments valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Fund	34,034,781	Net asset value as reported by underlying fund's investment manager	Net asset value

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable shares of the Fund as at September 30, 2024 and March 31, 2024.

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at September 30, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
		Net asset value as reported by underlying fund's investment manager	Net asset value
Funds	83,151,006		

The above investments are valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investments valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
		Net asset value as reported by underlying fund's investment manager	Net asset value
Fund	57,451,101		

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable units of the Fund as at September 30, 2024 and March 31, 2024.

Level 3 Reconciliation (cont'd)

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at September 30, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Funds	134,055,999	Net asset value as reported by underlying fund's investment manager	Net asset value

The above investments are valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investments valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Fund	101,737,703	Net asset value as reported by underlying fund's investment manager	Net asset value

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable units of the Fund as at September 30, 2024 and March 31, 2024.

Level 3 Reconciliation (cont'd)

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at September 30, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Funds	352,773,267	Net asset value as reported by underlying fund's investment manager	Net asset value

The above investments are valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investments valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Fund	225,255,790	Net asset value as reported by underlying fund's investment manager	Net asset value

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable units of the Fund as at September 30, 2024 and March 31, 2024.

Level 3 Reconciliation (cont'd)

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Equities	1,575,603	Recent transaction	Recent transaction price

The above investments are valued using the valuation techniques detailed below:

Recent transaction: The investments are valued based on recent completed transaction, which may include external financing, secondary market trades or other transactions near the measurement dates.

For investments valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable units of the Fund as at September 30, 2024 and March 31, 2024.
