The performance of the Fund's other Series is substantially similar to that of Series A shares, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

The following commentary pertains to the results of operations of the CI Canadian All Cap Equity Income Fund (the Underlying Fund).

During the year, inflation rose to the highest level experienced in decades, driven by the rapid recovery in consumer demand, tight supply chains and unprecedented monetary stimulus. Central banks shifted away from expansionary central bank monetary policy towards more restrictive policy, including raising interest rates. There were lingering economic ramifications of the COVID-19 pandemic, including renewed lockdowns in China, which have since been largely lifted. There was a sharp decline in the unemployment rate and widespread labour shortages. The outbreak of the Russia-Ukraine conflict caused a spike in the price of crude oil, natural gas, wheat, precious metals and other commodities. The rise in energy prices drove economic activity in oil-producing nations.

The Underlying Fund underperformed its benchmark for the year. The largest individual detractors from the Underlying Fund's performance were holdings in Cargojet Inc., Allied Properties REIT, Brookfield Corp., Tricon Residential Inc., Amazon.com Inc., Lightspeed Commerce Inc., Canadian Imperial Bank of Commerce, Nuvei Corp., Brookfield Infrastructure Partners L.P. and Alphabet Inc.

## *Management Report of Fund Performance for the period/year ended March 31, 2023*

---

Overweight allocations to the information technology, industrials, communication services, health care and utilities sectors contributed to the Underlying Fund's performance, as did underweight exposures to the financials, energy and materials sectors. An underweight exposure to Canada also contributed to the Underlying Fund's performance. Top individual contributors to the Underlying Fund's performance included holdings in Element Fleet Management Corp., LifeWorks Inc., CGI Inc., Boyd Group Services Inc., Thomson Reuters Corp., Alimentation Couche-Tard Inc., Constellation Software Inc., Kinaxis Inc., GFL Environmental Inc. and iA Financial Corp. Inc.

We added new positions in The Toronto-Dominion Bank and TC Energy Corp. to the Underlying Fund during the year. We increased many of the Underlying Fund's existing holdings, including Brookfield Corp., Open Text Corp., GFL Environmental Inc. and Canadian Natural Resources Ltd. We eliminated the Underlying Fund's holdings in UnitedHealth Group Inc., Onex Corp., LifeWorks Inc., Definity Financial Corp., Allied Properties REIT, Canadian Imperial Bank of Commerce, National Bank of Canada and TMX Group Ltd.

Overall, the Fund underperformed its benchmark for the year.

### **RECENT DEVELOPMENTS**

We expect elevated inflation to persist over the near term, and thus favour businesses that have sustainable competitive advantages that allow them to exercise pricing power. Globally, central banks have raised interest rates aggressively to combat inflation. This has put pressure on the valuations of high-growth information technology companies and companies in cyclical sub-sectors, including housing, luxury goods and industrial components. While we do not position the Underlying Fund based on specific macroeconomic factors, we believe the recent valuation pullback has presented compelling opportunities to build positions in high-quality companies within these spaces.

In our opinion, the Russia-Ukraine conflict has reshaped the global energy supply chain. The North American energy sector has benefited from elevated pricing and is well-positioned to ramp up volumes to alleviate the shortage of crude oil and natural gas, especially in Europe. However, we remain cognizant of potential offsetting pressure from demand destruction and the economic slowdown induced by central banks to tame inflation.

Consumer budgets have been pressured by elevated inflation and deteriorating housing affordability. While we remain cautious, we expect consumer spending will be fairly resilient amid excess savings accumulated during the COVID-19 pandemic, record home equity and low unemployment. We expect spending to remain especially resilient in travel, entertainment and experiences, which consumers were unable to enjoy during the pandemic.

We continue to favour companies that can endure any economic environment as well as businesses with short-term challenges that are trading at prices well below our estimate of their intrinsic value. We continue to place an emphasis on balance sheet resilience and liquidity, which enables businesses to continue investing through an economic downturn and ultimately emerge stronger when conditions recover.

(1) This information is derived from the Fund's audited annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on shareholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

(5) This information is provided for the period(s)/year(s) ended March 31.
