INVESTMENT OBJECTIVE AND STRATEGIES

The investment objective of CI Global REIT Fund (the Fund) is to provide regular current income by investing primarily in real estate investment trusts (REITs) and equity securities of corporations participating in the residential and commercial real estate sector. These include corporations that own, manage, develop, finance and otherwise participate in the residential and commercial real estate industry. While the Fund will invest primarily in REITs and common equities, it may also invest in convertible debentures and trust units, as well as in fixed-income securities issued by real estate related corporations and government or other sovereign credits. The Fund may also invest in structured products, either public or private, that hold real estate related securities, including mortgages, mezzanine debt or properties.

The Fund has the ability to invest up to all of its assets in foreign securities.

For a complete discussion of the Fund's investment objective and strategies, please refer to the Fund's most recently filed simplified prospectus.

RISK

No changes affecting the overall level of risk associated with investing in the Fund were made during the period/year. The risks of the Fund remain as discussed in the Fund's most recently filed simplified prospectus or its amendments. The Manager reviews the risk rating for the Fund on an annual basis, at a minimum, based on the methodology mandated by the Canadian Securities Administrators to determine the risk level of the Fund. Any change to the risk rating made during the period/year was as a result of such review and was not a result of any change to the investment objective, strategies or management of the Fund.

RESULTS OF OPERATIONS

The Fund's net assets decreased by \$119.3 million to \$467.4 million from March 31, 2023 to March 31, 2024. The Fund had net redemptions of \$103.4 million during the year. The portfolio's performance increased assets by \$23.8 million. The Fund paid distributions totalling \$39.7 million. Series A units returned 4.4% after fees and expenses for the one-year period ended March 31, 2024. Over the same time period, the Fund's benchmark returned 8.8%. The benchmark is the FTSE EPRA/NAREIT Developed Total Return Index (the Benchmark or the Index).

The performance of the Fund's other Series is substantially similar to that of Series A units, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

During the year, persistently high inflation and a resilient economy led central banks to continue to raise interest rates until the summer of 2023. Since then, both the U.S. Federal Reserve Board (Fed) and the Bank of Canada (BoC) held their overnight rates at 5.50% and 5.00%, respectively. Investors have been speculating about when the first interest rate cuts will commence and the magnitude of such cuts, expectations for which have been pushed back several times. Currently, the Fed and BoC are expected to make their first interest rate cuts in the summer of 2024.

Bond yields were volatile. The 10-year U.S. Treasury yield was at 3.47% on March 31, 2023, rose steadily to just under 5.00% in October, and declined sharply to 3.80% before climbing again and finishing the year at 4.20%. In Canada, the 10-year bond yield started the year at 2.90%, briefly went above 4.20% in October, and finished the year at 3.47%.

Real estate investment trust (REIT) performance was heavily influenced by bond yields, with REITs generally rebounding when yields were falling, while giving up ground while yields were rising. Overall, REITs trailed the broader equity indexes, which were heavily influenced by the strong rebound in information technology stocks.

The Fund underperformed its benchmark for the year. An underweight allocation to Japan detracted from the Fund's performance as Japanese real estate developers performed strongly. An underweight exposure to data centers also detracted from the Fund's performance as they rebounded alongside other information technology companies that could benefit from enthusiasm around artificial intelligence. The Fund's underweight exposure to malls was another detractor from performance. Consumers remained more resilient than anticipated. Underweight positions in Simon Property Group Inc., Digital Realty Trust Inc. and Mitsui Fudosan Co. Ltd. were the largest individual detractors from the Fund's performance.

Exposure to U.S. single-family rental REITs, which performed well on strong fundamentals, contributed to the Fund's performance. Canadian seniors housing exposure also contributed to the Fund's performance as a result of a rebound in occupancy. Exposure to U.S. hotels contributed to the Fund's performance as average daily occupancy rates remained strong and group business rebounded. Top individual contributors to the Fund's performance were holdings in Chartwell Retirement Residences, Tricon Residential Inc. and American Homes 4 Rent. Chartwell Retirement Residences performed well on rising occupancy, which is rebounding post the COVID-19 pandemic. Tricon Residential Inc. announced it was being taken over by Blackstone Inc. at a premium. American Homes 4 Rent posted strong results in the single-family rental space amid solid demand and limited supply.

CI Global REIT Fund

Management Report of Fund Performance for the period/year ended March 31, 2024

Ongoing inflation and its impact on the level of interest rates continued to be the dominant theme over the past year. Volatility in bond yields contributed to volatility in the REIT market and likely contributed to the underperformance of REITs. We added to the Fund new positions in Public Storage Inc. and Regency Centers Corp., and we increased position in existing holdings in Ventas Inc., Welltower Inc. and RioCan REIT. Several positions were eliminated from the Fund, including ESR Kendall Square REIT Co. Ltd., ESR Group Ltd., Extra Space Storage Inc. and European Residential REIT. We trimmed positions in Tricon Residential Inc., Apartment Income REIT Corp. and Host Hotels & Resorts Inc.

RECENT DEVELOPMENTS

Economic growth, particularly in the United States, has been more resilient than expected, and the U.S. labour market continues to be strong. Inflation has been coming down, but perhaps a bit slower than hoped. As a result, the Fed and most other central banks have delayed cutting interest rates. The expectations going forward are for inflation to continue to trend downward, and central banks should be in a position to cut interest rates in the summer of 2024. While longer-term bonds yields may not drop substantially from current levels, a stabilization in interest rates and the potentially positive backdrop of declining overnight rates should open the real estate transaction market and provide some price discovery. We believe this should be a catalyst for the REIT market as the sector overall seems to be trading at a discount to net asset value. The Fund is positioned in sub-sectors of the REIT market, such as retail, residential and industrial, that continue to have strong fundamentals and should respond favourably to a more robust transaction market.

(1) This information is derived from the Fund's audited annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on unitholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

(5) This information is provided for the period(s)/year(s) ended March 31.
