## INVESTMENT OBJECTIVE AND STRATEGIES

The investment objective of CI U.S. Equity Class (the Fund) is to seek a balance of current income and long-term capital appreciation by investing substantially all of its assets in securities of CI U.S. Equity Fund (the Underlying Fund).

The investment objective of the Underlying Fund is to seek a balance of current income and long-term capital appreciation by investing primarily in a diversified portfolio of dividend-paying U.S. equity securities, including common and preferred shares and, to a lesser extent, interest-bearing securities, such as bonds, bills or bankers' acceptances. The Underlying Fund may also invest in non-dividend-paying U.S. equity securities, non-U.S. equity securities and debt securities. The amount of non-U.S. securities shall not exceed approximately 30% of the assets of the Underlying Fund.

For a complete discussion of the Fund's and the Underlying Fund's respective investment objective and strategies, please refer to the Fund's and the Underlying Fund's most recently filed simplified prospectus.

## RISK

No changes affecting the overall level of risk associated with investing in the Fund were made during the period/year. The risks of the Fund remain as discussed in the Fund's most recently filed simplified prospectus or its amendments. The Manager reviews the risk rating for the Fund on an annual basis, at a minimum, based on the methodology mandated by the Canadian Securities Administrators to determine the risk level of the Fund. Any change to the risk rating made during the period/year was as a result of such review and was not a result of any change to the investment objective, strategies or management of the Fund.

## RESULTS OF OPERATIONS

The Fund's net assets increased by \$128.0 million to \$539.0 million from March 31, 2022 to March 31, 2023. The Fund had net sales of \$171.2 million during the year. The portfolio's performance decreased assets by \$29.6 million. The Fund paid distributions totalling \$13.6 million. Series A shares returned -5.2% after fees and expenses for the one-year period ended March 31, 2023. Over the same time period, the Fund's benchmark returned -0.2%. The benchmark is the S&P 500 Total Return Index (the Benchmark or the Index).

The performance of the Fund's other Series is substantially similar to that of Series A shares, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

The following commentary pertains to the results of operations of the CI U.S. Equity Fund (the Underlying Fund).

During the year, inflation rose to the highest level experienced in decades, driven by the rapid recovery in consumer demand, tight supply chains and unprecedented monetary stimulus. Central banks shifted away from expansionary central bank monetary policy towards more restrictive policy, including raising interest rates. There were lingering economic ramifications of the COVID-19 pandemic, including renewed lockdowns in China, which have since been largely lifted. There was a sharp decline in the unemployment rate and widespread labour shortages. The outbreak of the Russia-Ukraine conflict caused a spike in the price of crude oil, natural gas, wheat, precious metals and other commodities. The rise in energy prices drove economic activity in oil-producing nations. The failures of SVB Financial Group and Credit Suisse Group AG in mid-March 2023 and resulting uncertainty drove significant losses in financials sector stocks, and energy sector stocks declined on fears of reduced demand in a potential recessionary environment.

The Underlying Fund underperformed its benchmark for the year. Underweight exposures to the information technology, materials, consumer staples, energy and health care sectors detracted from the Underlying Fund's performance, as did overweight exposures to the industrials, communication services and utilities sectors. Notable individual detractors from the Underlying Fund's performance included holdings in Alphabet Inc., Brookfield Asset Management Inc., Live Nation Entertainment Inc., Amazon.com Inc., Brookfield Business Partners L.P., Brookfield Infrastructure Partners L.P., Baxter International Inc., Medtronic PLC, Bank of America Corp. and Brookfield Business Corp.

Top individual contributors to the Underlying Fund's performance included holdings in Booking Holdings Inc., Visa Inc., Mastercard Inc., LVMH Moët Hennessy Louis Vuitton SE, CGI Inc., Liberty Braves Group, McDonald's Corp., JPMorgan Chase & Co., TransDigm Group Inc. and Starbucks Corp.

We added new positions in Brookfield Asset Management Ltd., The Walt Disney Company, Accenture PLC, Ametek Inc. and Danaher Corp. to the Underlying Fund. Several existing holdings were increased during the year. These included Alphabet Inc., Visa Inc., Canadian Pacific Railway Ltd., LVMH Moët Hennessy Louis Vuitton SE, Boston Scientific Corp. and Nike Inc. We sold the Underlying Fund's positions in Embecta Corp., Brookfield Reinsurance Ltd., LifeWorks Inc., Becton, Dickinson and Co. and Baxter International Inc., and trimmed holdings in Home Depot Inc., Mondelez International Inc., Enbridge Inc., Liberty Braves Group and Medtronic PLC.

Overall, the Fund underperformed its benchmark for the year.

## **RECENT DEVELOPMENTS**

We expect elevated inflation to persist over the near term, and thus favour businesses that have sustainable competitive advantages that allow them to exercise pricing power. Globally, central banks have raised interest rates aggressively to combat inflation. This has put pressure on the valuations of high-growth information technology companies and companies in cyclical sub-sectors, including housing, luxury goods and industrial components. While we do not position the Underlying Fund based on specific macroeconomic factors, we believe the recent valuation pullback has presented compelling opportunities to build positions in high-quality companies within these spaces.

In our opinion, the Russia-Ukraine conflict has reshaped the global energy supply chain. The North American energy sector has benefited from elevated pricing and is well-positioned to ramp up volumes to alleviate the shortage of crude oil and natural gas, especially in Europe. However, we remain cognizant of potential offsetting pressure from demand destruction and the economic slowdown induced by central banks to tame inflation.

Consumer budgets have been pressured by elevated inflation and deteriorating housing affordability. While we remain cautious, we expect consumer spending will be fairly resilient amid excess savings accumulated during the COVID-19 pandemic, record home equity and low unemployment. We expect spending to remain especially resilient in travel, entertainment and experiences, which consumers were unable to enjoy during the pandemic.

We continue to favour companies that can endure any economic environment as well as businesses with short-term challenges that are trading at prices well below our estimate of their intrinsic value. We continue to place an emphasis on balance sheet resilience and liquidity, which enables businesses to continue investing through an economic downturn and ultimately emerge stronger when conditions recover.

(1) This information is derived from the Fund's audited annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on shareholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

(5) This information is provided for the period(s)/year(s) ended March 31.

### Year-by-Year Returns

The following chart/charts shows/show the Fund's annual performance for each of the period(s)/year(s) shown and illustrates/illustrate how the Fund's performance has changed from period/year to period/year.
