INVESTMENT OBJECTIVE AND STRATEGIES

The investment objective of CI Canadian Small/Mid Cap Equity Income Class (the Fund) is to provide consistent monthly income and capital appreciation by investing substantially all of its assets in securities of CI Canadian Small/Mid Cap Equity Income Fund (the Underlying Fund).

The investment objective of the Underlying Fund is to provide consistent monthly income and capital appreciation by investing in equity securities of small- and medium-capitalization companies and trusts, as well as preferred securities and convertible debentures and, to a lesser extent, other interest-bearing securities, such as bonds, bills or bankers' acceptances.

The portfolio advisor of the Underlying Fund employs a value-oriented investment approach, utilizing fundamental analysis to identify companies that have high returns on invested capital, generate free cash flow and have modest capital expenditure requirements. In addition, the Underlying Fund may hold preferred securities and convertible debentures. The Underlying Fund has the ability to invest in foreign securities in an amount not exceeding approximately 49% of the assets of the Underlying Fund.

For a complete discussion of the Fund's and the Underlying Fund's respective investment objective and strategies, please refer to the Fund's and the Underlying Fund's most recently filed simplified prospectus.

RISK

No changes affecting the overall level of risk associated with investing in the Fund were made during the period/year. The Manager reviews the risk rating for the Fund on an annual basis, at a minimum, based on the methodology mandated by the Canadian Securities Administrators to determine the risk level of the Fund. Any change to the risk rating made during the period/year was as a result of such review and was not a result of any change to the investment objective, strategies or management of the Fund.

RESULTS OF OPERATIONS

The Fund's net assets increased by \$3.4 million to \$94.0 million from March 31, 2023 to March 31, 2024. The Fund had net redemptions of \$10.0 million during the year. The portfolio's performance increased assets by \$15.5 million. The Fund paid distributions totalling \$2.1 million. Series A shares returned 18.2% after fees and expenses for the one-year period ended March 31, 2024. Over the same time period, the Fund's benchmark returned 15.5%. The benchmark is a combination of the S&P/TSX Completion Total Return Index - 70% and the S&P MidCap 400 Total Return Index - 30% (the Benchmark or the Index).

The performance of the Fund's other Series is substantially similar to that of Series A shares, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

The following commentary pertains to the results of operations of the CI Canadian Small/Mid Cap Equity Income Fund (the Underlying Fund).

Inflation declined during the year due to restrictive monetary policy and higher interest rates. Residential real estate activity remained depressed amid higher mortgage rates and weakness within certain pockets of commercial real estate, such as office and retail. Unemployment remained at near-record lows, which put upward pressure on wages and increased labour strikes between workers and employers. Inflation and higher interest rates in mortgage, auto and credit card debt has damped consumer spending on discretionary purchases.

The initial impact of stimulus spending under the U.S. Infrastructure Investment and Jobs Act (IIJA), Inflation Reduction Act (IRA) and CHIPS and Science Act offset moderation in private sector investment in the United States. The failures of SVB Financial Group, Signature Bank and First Republic Bank and the subsequent regulatory response resulted in more stringent lending standards and reduced availability of debt capital.

Conflicts in Ukraine and the Middle East led to volatility in the energy markets and placed pressure on global supply chains.

The Underlying Fund outperformed its benchmark during the year. Security selection within the industrials and real estate sectors contributed to the Underlying Fund's performance. Top individual contributors to the Underlying Fund's performance included holdings in KKR & Co. Inc., Stantec Inc., TFI International Inc., Information Services Corp. and Waste Connections Inc.

CI Canadian Small/Mid Cap Equity Income Class

Management Report of Fund Performance for the period/year ended March 31, 2024

Security selection in the information technology sector detracted from the Underlying Fund's performance, as did allocation to the energy sector. The largest individual detractors from the Underlying Fund's performance were positions in VeriSign Inc., Kinaxis Inc. Andlauer Healthcare Group Inc., Sensata Technologies Holding PLC and Jamieson Wellness Inc.

We added new positions in Atlanta Braves Holdings Inc., Park Lawn Corp. and FirstService Corp. to the Underlying Fund. Existing holdings in Softchoice Corp., Jamieson Wellness Inc. and Superior Plus Corp. were increased. The Underlying Fund's positions in Sensata Technologies Holding PLC, Liberty Media Corp. and Berry Global Group Inc. were eliminated while holdings in KKR & Co. Inc., Stantec Inc. and Cargojet Inc. were trimmed.

Overall, the Fund outperformed its benchmark during the year.

RECENT DEVELOPMENTS

We expect elevated inflation to persist over the near term, and therefore, we favour businesses that have sustainable competitive advantages that allow them to exercise pricing power.

Globally, central banks have raised interest rates aggressively to combat the rapid inflation. This has pressured the valuations of high-growth information technology companies and those in cyclical sectors, including housing, luxury goods and industrial components. Recent turbulence in the U.S. regional banking system may constrain credit availability and put upward pressure on financing costs.

Consumer budgets have been pressured by elevated inflation and deteriorating housing affordability. While we remain cautious, we expect consumer spending should be fairly resilient because of excess savings accumulated during the COVID-19 pandemic, record home equity and low unemployment. We expect spending to remain especially resilient in travel, entertainment and experiences, which consumers were unable to enjoy during the pandemic. Stimulus spending under the IJJA, IRA and the CHIPS and Science Act should partially offset slower economic activity related to higher interest rates.

The Underlying Fund holds companies that are better able to endure any economic environment and businesses with some short-term challenges that are trading at prices well below intrinsic value. We continue to place an emphasis on balance sheet resilience and liquidity, which enables businesses to continue investing through an economic downturn and ultimately emerge stronger when conditions recover.

(1) This information is derived from the Fund's audited annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on shareholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

(5) This information is provided for the period(s)/year(s) ended March 31.
