RESULTS OF OPERATIONS

The Fund's net assets decreased by \$120.6 million to \$506.7 million from March 31, 2024 to September 30, 2024. The Fund had net redemptions of \$120.6 million for the period. The portfolio's performance increased assets by \$13.7 million. The Fund paid distributions totalling \$13.7 million. Series A units returned 1.8% after fees and expenses for the six-month period ended September 30, 2024.

The performance of the Fund's other Series is substantially similar to that of Series A shares, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

The following commentary pertains to the results of operations of the CI Money Market Fund (the Underlying Fund).

The Bank of Canada (BoC) cut its overnight lending rate from 5.00% to 4.25% during the period and indicated that if the Canadian economy progresses as expected there should be more cuts in the coming months. Money market interest rates declined with the three cuts to the overnight lending rate and in anticipation of more cuts to come.

The Underlying Fund's bias toward longer-dated money market securities contributed to performance. Money market yields declined with the BoC's overnight lending rate reductions, and in anticipation of further BoC interest rate cuts. The Underlying Fund's positioning in longer-dated money market securities locked in higher yields and led to relative outperformance versus the benchmark. Overweight holdings in Bank of Montreal 2.37% Jan. 17, 2025 and The Toronto-Dominion Bank 1.94% Mar. 13, 2025 bonds contributed to performance because of their longer time to maturity.

The Underlying Fund's larger cash position was maintained to ensure the liquidity needs of the Underlying Fund are met. As cash yields were lower than security yields, this detracted from the Underlying Fund's performance.

Increases and decreases to the Underlying Fund's positions are made primarily as a result of cash management activities to address flows into and out of the Underlying Fund when they occur. Active trading is not common as the securities are short term in nature and of high quality and, therefore, held to maturity absent material outflows from the Underlying Fund. This limits unnecessary turnover and transaction costs. We increased the Underlying Fund's position in Bank of Montreal 2.37% Jan. 17, 2025 bonds to continue the Underlying Fund's bias toward longer-dated money market securities.

RECENT DEVELOPMENTS

Economic conditions in Canada remain weak. The Canadian economy faces challenges from rising unemployment, consumers stressed by higher interest rates and likely lower demand as immigration moderates. The BoC began cutting interest rates in June and completed three cuts through September, lowering its overnight lending rate from 5.00% to 4.25%. The market expects the BoC to further cut its overnight lending rate at each of its next two meetings into year-end. It has indicated that it is reasonable to expect more cuts if economic data progresses as expected.

The U.S. Federal Reserve Board (Fed) started its interest rate cutting cycle in September with a relatively large 50-basis-point cut to its overnight lending rate. The market expects more cuts before year-end. Given rising unemployment in both Canada and the United States, the BoC and the Fed are increasingly sensitive to downside risks now that there is a line of sight on inflation returning to target.

To manage risk, we are maintaining for the Underlying Fund a relatively higher duration (sensitivity to interest rates) in government bonds and focusing on high-quality corporate bonds to add yield.

Inflows continue to occur into bond funds in Canada, albeit at a somewhat slower pace than earlier in the year. 2024 is on track to reach a record amount of corporate bond issuance and yet year-to-date spreads have still tightened, which is indicative of continued demand for yield products.

Management Report of Fund Performance for the period/year ended September 30, 2024

Corporate balance sheets are not showing signs of weakness yet, but second-quarter 2024 earnings calls have pointed to a slowdown in the purchase of big-ticket items and a much more cost-conscious consumer overall.

It takes some time for interest rate cuts to begin taking effect on individuals and businesses, but most are still operating from a position of balance sheet strength. As long as this continues, lower borrowing costs should drive better performance in the coming year in the form of stronger growth.

The Underlying Fund remains split equally between high-quality corporate and government securities as we believe there remains valuable carry in short-end corporate bonds at this time.
