The portfolio's performance increased assets by \$2.9 million. The Fund paid distributions totalling \$0.6 million. Series A shares returned 6.6% after fees and expenses for the six-month period ended September 30, 2021. Over the same time period, the Fund's benchmark returned 8.8%. The benchmark is the MSCI World Total Return Index (the Benchmark or the Index).

The performance of the Fund's other Series is substantially similar to that of Series A shares, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

The following commentary pertains to the results of operations of the CI Global Dividend Opportunities Class (the Underlying Fund).

Economic activity continued to recover during the period, but at a slower pace in the preceding six-month period. Challenges relating to restarting segments of the economy and the COVID-19 delta variant were cause for concern. Interest rates moderated, but began to rise again in September. Equity markets moved higher as corporate earnings were stronger than anticipated.

The Underlying Fund underperformed its benchmark for the period. Underweight positions in the information technology, health care, consumer discretionary and communication services sectors detracted from the Underlying Fund's performance, as did overweight exposures to real estate and materials. From a regional perspective, underweight allocations to the United States, Japan, Switzerland, Denmark, Australia, Sweden, Italy, Finland, Spain, Norway, Israel, Belgium, Austria, Singapore and Portugal detracted from performance.

The largest individual contributors to the Underlying Fund's performance included holdings in Microsoft Corp., Capgemini SE, Apollo Global Management Inc. and Viper Energy Partners L.P.

We added new positions in Altice USA Inc. and Universal Music Group NV to the Underlying Fund. Holdings in Eurofins Scientific SE and Verizon Communications Inc. were eliminated, while CSX Corp. and Wells Fargo & Co. were trimmed.

Overall, the Fund underperformed its benchmark for the period.

RECENT DEVELOPMENTS

We believe that economic conditions should continue to remain favourable in the coming months.

(1) This information is derived from the Fund's semi-annual and annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on shareholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period. The higher a Fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period.

(5) This information is provided for the period ended September 30, 2021 and the years ended March 31.
