### **RESULTS OF OPERATIONS**

The Fund's net assets increased by \$62.1 million to \$868.9 million from March 31, 2024 to September 30, 2024. The Fund had net sales of \$14.7 million for the period. The portfolio's performance increased assets by \$56.9 million. The Fund paid distributions totalling \$9.5 million. Series A units returned 6.7% after fees and expenses for the six-month period ended September 30, 2024. Over the same time period, the Fund's benchmark returned 7.8%. The benchmark is a combination of the ICE BofA U.S. Government and Corporate Master Index (TR) - 50% and the S&P 500 Index (NTR) - 50% (the Benchmark or the Index).

The performance of the Fund's other Series is substantially similar to that of Series A units, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

Inflation continued to decline during the period due to restrictive monetary policy and higher interest rates. This progress on inflation, combined with weakening in the U.S. labour market, prompted the U.S. Federal Reserve Board to announce in September 2024 its first interest rate reduction since 2020.

Residential real estate activity remained depressed amid higher mortgage rates and weakness within certain pockets of commercial real estate, such as office and retail. U.S. unemployment increased from record-low levels, which eased pressure on wages. Inflation and higher interest rates in mortgage, auto and credit card debt damped consumer spending on discretionary purchases.

The impact of stimulus spending under the U.S. Infrastructure Investment and Jobs Act (IIJA), Inflation Reduction Act (IRA) and CHIPS and Science Act offset moderation in private sector investment. The proliferation of artificial intelligence (AI) spurred an increase in data centre spending. Conflicts in Ukraine and the Middle East renewed concerns about global supply chains and increased defence spending.

The Fund underperformed its benchmark during the period. Security selection in the consumer discretionary sector detracted from the Fund's performance, as did allocation to the information technology sector. The largest individual detractors from the Fund's performance were positions in Visa Inc., Canadian Pacific Kansas City Ltd., CoStar Group Inc., CSX Corp., LVMH Moet Hennessy Louis Vuitton SE, Nike Inc., VeriSign Inc., Medtronic PLC, The Walt Disney Company and Starbucks Corp.

Stock selection within the health care and financials sectors contributed to the Fund's performance. Top individual contributors to the Fund's performance included holdings in Alphabet Inc., Meta Platforms Inc., KKR & Co. Inc., Brookfield Corp., UnitedHealth Group Inc., Booking Holdings Inc., Apple Inc., TransDigm Group Inc., Brookfield Infrastructure Partners L.P. and CACI International Inc.

We added to the Fund a new holding in Uber Technologies Inc., and we increased existing positions in UnitedHealth Group Inc., Apple Inc., Nike Inc., Salesforce Inc., Accenture PLC, Zoetis Inc. and Thermo Fisher Scientific Inc.

The Fund's positions in VeriSign Inc., Medtronic PLC, Starbucks Corp. and Mondelez International Inc. were eliminated. The Fund holdings in Alphabet Inc., Mastercard Inc., JPMorgan Chase & Co., Berkshire Hathaway Inc., Live Nation Entertainment Inc., Bank of America Corp., Six Flags Entertainment Corp., CGI Inc. and The Walt Disney Company were trimmed.

### RECENT DEVELOPMENTS

We expect inflation will moderate but remain at an elevated level. Therefore, we favour businesses that have sustainable competitive advantages that allow them to exercise pricing power. Lower inflation should cause central banks to ease monetary policy and cut interest rates. This should benefit the valuation of companies that operate in cyclical industries. We are cautious toward companies that sell discretionary goods because consumers remain pressured by inflation in the cost of living. However, we also believe low unemployment and a desire to spend on experiences should support overall consumer spending. Stimulus spending under the IIJA, IRA and CHIPS and Science Act should partially offset slower economic activity in the private sector related to higher interest rates.

Management Report of Fund Performance for the period/year ended September 30, 2024

We expect adoption of AI to increase, driving demand for semiconductor chips and data centre capacity. The Fund is also invested in companies that are exposed to higher military and defence spending in response to recent conflicts across the world.

The Fund is positioned in companies that can endure any economic environment, as well as businesses with short-term challenges that are trading at prices well below our estimate of their intrinsic value. We continue to place an emphasis on balance sheet resilience and liquidity, which enables businesses to continue investing through an economic downturn and ultimately emerge stronger when economic conditions recover.

<sup>(1)</sup> This information is derived from the Fund's semi-annual and annual financial statements.

<sup>(2)</sup> Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on unitholder residency and can be different from 13%.

<sup>(3)</sup> The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

<sup>(4)</sup> The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

<sup>(5)</sup> This information is provided for the period(s)/year(s) ended September 30, 2024 and March 31.

<sup>(6)</sup> Per units amounts are presented in U.S. dollars.
