RESULTS OF OPERATIONS

The Fund's net assets increased by \$16.5 million to \$800.0 million from March 31, 2023 to September 30, 2023. The Fund had net redemptions of \$41.4 million during the period. The portfolio's performance increased assets by \$57.9 million. Series A shares returned 7.0% after fees and expenses for the six-month period ended September 30, 2023. Over the same time period, the Fund's benchmark returned 7.4%. The benchmark is the MSCI ACWI Information Technology Total Return Index (the Benchmark or the Index).

The performance of the Fund's other Series is substantially similar to that of Series A shares, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

Optimism for the spend on artificial intelligence brought positive momentum to many stocks in the information technology sector. However, optimism was dampened by the prospect of high interest rates remaining in place for a prolonged period, which could curb consumer and corporate spending.

The Fund slightly underperformed its benchmark for the period. Exposure to the health care sector detracted from the Fund's performance. The Fund's allocation to small-capitalization stocks also detracted from performance. The largest individual detractors from the Fund's performance were holdings in stocks of small-cap companies Roblox Corp. and DigitalOcean Holdings Inc.

Security selection within the information technology sector contributed to the Fund's performance, as did allocation to the communication services sector. Top contributors to the Fund's performance included holdings in large-capitalization companies, including Meta Platforms Inc., NVIDIA Corp. and Alphabet Inc.

Trade disputes involving semiconductor devices and semiconductor manufacturing equipment can impact the predictability of the industry and may affect the Fund's risk level. We added a new position in Eli Lilly and Co. to the Fund during the period, which had a positive impact on the Fund's performance. Existing holdings in NVIDIA Corp. and ServiceNow Inc. were increased. A holding in DigitalOcean Holdings Inc. was eliminated while holdings in Apple Inc. and Arista Networks Inc. were trimmed.

RECENT DEVELOPMENTS

We are concerned regarding the economic backdrop as the historically rapid move in interest rates are beginning to be felt. This, combined with volatility in the energy markets, is likely to strain consumer wallets and impact spending. Additionally, corporate spending on information technology has become increasingly selective.

We remained focused on companies with self-funded growth, and we have tilted the Fund defensively by owning stocks of health care companies. We remain cautious with those information technology stocks that are not yet profitable and will need to raise capital in the current environment.

Risk rating

Effective July 13, 2023, the risk rating for the Fund changed from "Medium-to-High" to "High". This change is the result of an annual review to comply with the methodology mandated by the Canadian Securities Administrators and is not the result of any changes to investment objective, strategies or management of the Fund.

(1) This information is derived from the Fund's semi-annual and annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on shareholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

(5) This information is provided for the period(s)/year(s) ended September 30, 2023 and March 31.

(6) Per shares amounts are presented in U.S. dollars.
