## RESULTS OF OPERATIONS

The Fund's net assets increased by \$111.6 million to \$1,634.9 million from March 31, 2024 to September 30, 2024. The Fund had net sales of \$60.7 million for the period. The portfolio's performance increased assets by \$96.2 million. The Fund paid distributions totalling \$45.3 million. Series A units returned 5.7% after fees and expenses for the six-month period ended September 30, 2024. Over the same time period, the Fund's benchmark returned 5.9%. The benchmark is a combination of the FTSE Canada Universe + Maple All Corporate Bond Index (TR) - 70% and the ICE BofA U.S. High Yield Index (TR) - 30% (the Benchmark or the Index).

The performance of the Fund's other Series is substantially similar to that of Series A units, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

Facing a weaker Canadian economy and more indebted consumer, the Bank of Canada cut its overnight lending rate by 25 basis points (bps) three times during the period. The U.S. Federal Reserve Board (Fed) finally cut the federal funds rate in September, with a reduction of 50 bps. With inflation now within their target ranges, central banks have the flexibility to support the labour market and extend the economic cycle. Revisions to prior-period payroll data over the summer of 2024 was some cause for concern, but unemployment was still low by historical standards.

The Fund underperformed its benchmark for the period. A holding in MPH Acquisition Holdings LLC 5.75% Sep. 1, 2028 bonds detracted from the Fund's performance as lawsuits accumulated and the company's debt level remained elevated despite it reaffirming its forecast for 2024. As a result, the holding was liquidated. The Fund's position in New Fortress Energy Inc. 8.75% Feb. 15, 2029 bonds also detracted from performance amid concerns over the company's liquidity, potential challenges in refinancing near-term maturities and delays in the company's fast liquefied natural gas projects.

Holding a variable rate, convertible bond (Jan. 25, 2081) issued by Pembina Pipeline Corp. contributed to the Fund's performance as the company continued to benefit from the development of the Western Canadian Sedimentary Basin. It also benefited from a favourable egress outlook driven by the Trans Mountain Expansion pipeline project and the LNG Canada project. A holding in Highland Therapeutics Inc. shares contributed to the Fund's performance following a sale of the company to competitor Collegium Pharmaceutical Inc.

New positions in AltaGas Ltd. 7.2% Oct. 15, 2054 bonds and a term loan (+200 bps due Sep. 10, 2031) issued by Formula One were added to the Fund. Both companies have been familiar to the investment team for many years. Holdings in Highland Therapeutics Inc. 10.0% Sep. 30, 2026 and Global Aircraft Leasing Co. Ltd. 6.5% Sep. 15, 2024 bonds were eliminated from the Fund in connection with refinancing activity.

## RECENT DEVELOPMENTS

Central bank interest rate cuts are underway globally, with the exception of Japan. China's late entry likely supports commodity markets, and Canada indirectly, over the intermediate term. While we are optimistic the Fed can avoid recession in the United States, we have a more cautious outlook for Canada given its greater interest rate sensitivity and lower productivity growth. Nonetheless, the two countries' economies are interconnected, and recession in Canada, should it occur, would likely be mild.

As we progress into the fourth quarter of 2024, the financial markets will face U.S. presidential election headlines and geopolitical uncertainty, and corporate earnings guidance for 2025. Resilient earnings and a lack of supply in the face of rampant demand probably supports credit spreads in 2025. If interest rate cuts are met with an economic "soft landing," corporate bonds and riskier assets should exhibit competitive returns. We view the current investment environment as favourable.

(1) This information is derived from the Fund's semi-annual and annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on unitholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

(5) This information is provided for the period(s)/year(s) ended September 30, 2024 and March 31.
