RESULTS OF OPERATIONS

The Fund's net assets decreased by \$9.3 million to \$98.3 million from March 31, 2023 to September 30, 2023. The Fund had net redemptions of \$8.7 million during the period. The portfolio's performance decreased assets by \$0.4 million. The Fund paid distributions totalling \$0.2 million. Series A shares returned -0.8% after fees and expenses for the six-month period ended September 30, 2023. Over the same time period, the Fund's benchmark returned -1.2%. The benchmark is a combination of the FTSE Canada Universe Bond Total Return Index - 40%, the MSCI ACWI Total Return Index - 30% and the S&P/TSX Composite Total Return Index - 30% (the Benchmark or the Index).

The performance of the Fund's other Series is substantially similar to that of Series A shares, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

The following commentary pertains to the results of operations of the CI Canadian Balanced Fund (the Underlying Fund).

Global financial markets continued to adapt to higher interest rates over the period, as well as stronger-than-expected economic growth, particularly in the United States. The duelling impact of resilient economies with higher interest rates produced moderate returns for many equity markets.

Within Canada, the impact of inflation and higher interest rates continued to make its way through the economy. Canadian borrowers' interest burden grew, affecting key economic indicators, such as retail sales and unemployment rates. While there was no significant weakness, the slowdown was apparent and contributed to a moderate decline in many Canadian equities, as measured by the S&P/TSX Composite Index. Inflationary pressures caused the Canadian bond index to record a small decline as well.

The Underlying Fund slightly outperformed its benchmark for the period. An overweight allocation to equities and underweight exposure to fixed income also contributed to the Underlying Fund's performance. Within fixed income, an overweight exposure to investment-grade bonds contributed to the Underlying Fund's performance.

Underweight exposures to the information technology, consumer discretionary and communication services sectors detracted from the Underlying Fund's performance. Currency hedging detracted from the Underlying Fund's performance as the Canadian dollar declined. The largest individual detractors from the Underlying Fund's performance were holdings in Wheaton Precious Metals Corp., MasTec Inc. and TELUS Corp. Wheaton Precious Metals Corp. was negatively affected by struggling gold prices in the higher interest rate environment. MasTec Inc. was impacted by a reduction in its construction backlog and concerns that growth expectations would not be met. TELUS Corp. was negatively impacted by rising interest rates and a reduction in its 2023 forecast relating to its TELUS International and TELUS Health businesses.

We added new positions in Restaurant Brands International Inc., Stantec Inc., MasTec Inc. and Entergy Corp. Holdings in TC Energy Corp., Jamieson Wellness Inc., Arista Networks Inc. and MDA Ltd. were eliminated from the Underlying Fund.

Overall, the Fund slightly outperformed its benchmark for the period.

RECENT DEVELOPMENTS

Looking forward, we expect economic growth to slow in most developed markets, but do not expect a steep recession. Inflation has remained persistent, although we are seeing signs that this will moderate in the medium term. Wage pressures are likely to continue as workers and consumers seek to achieve real wage growth against inflation. Overall, this speaks to a moderate outlook for market returns overall, with uncertainty around each of the drivers of equity market outperformance: valuation expansion or earnings growth. While interest rate increases are likely to moderate, economic and inflationary conditions are unlikely to lead to large-scale interest rate cuts.

Given this backdrop, the Underlying Fund has an overweight exposure to equities, with a tilt toward value-oriented sectors, such as financials and energy. We reduced the Underlying Fund's consumer-oriented exposure as we expect consumers to cut back on discretionary spending amid higher interest rates.

Management Report of Fund Performance for the period/year ended September 30, 2023

Within fixed-income markets, central banks are dealing with persistent inflation at the same time as a downturn in economic activity. Interest rates are likely to stay higher for longer to tame inflation, which could cause an economic slowdown in the near future. We do believe that interest rate increases should be moderate going forward because of the lagged impact of higher borrowing costs feeding into consumer and corporate behaviour. We have positioned the Underlying Fund with an overweight exposure to credit and a moderately overweight duration positioning, the latter to help reduce the Underlying Fund's risk.

(1) This information is derived from the Fund's semi-annual and annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on shareholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

(5) This information is provided for the period(s)/year(s) ended September 30, 2023 and March 31.
