RESULTS OF OPERATIONS

The Fund's net assets decreased by \$4.4 million to \$74.4 million from March 31, 2023 to September 30, 2023. The Fund had net redemptions of \$4.6 million during the period. The portfolio's performance increased assets by \$0.2 million. Series A units returned -0.2% after fees and expenses for the six-month period ended September 30, 2023. Over the same time period, the Fund's benchmark returned 0.3%. The benchmark is the S&P 1000 Total Return Index (the Benchmark or the Index).

The performance of the Fund's other Series is substantially similar to that of Series A units, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

Inflation declined during the period due to restrictive monetary policy and higher interest rates, as well as an easing of global supply chain pressures. Residential construction activity contracted amid higher mortgage rates, and there have been early signs of weakness within certain pockets of commercial real estate, such as office and retail. Unemployment remained at near-record lows, but there was upward pressure on wages and increased labour strikes. Inflation and higher interest rates in mortgages, autos and credit card debt dampened consumer spending on discretionary purchases.

The Fund underperformed its benchmark for the period. Security selection in the real estate and energy sectors detracted from the Fund's performance. The largest individual detractors from the Fund's performance were holdings in GFL Environmental Inc. and Sensata Technologies Holding PLC. GFL Environmental Inc.'s share price underperformed because elevated repair and maintenance costs weighed on the company's profitability. The company also accelerated investments in recycling and renewable natural gas capabilities, which will negatively impact free cash flow in the near term. Sensata Technologies Holding PLC was negatively impacted by inflation in component and logistics costs and concerns that rising interest rates could reduce demand for new vehicles.

Stock selection in the information technology and health care sectors contributed to the Fund's performance. Top individual contributors to the Fund's performance included holdings in Live Nation Entertainment Inc. and Construction Partners Inc. Live Nation Entertainment Inc. outperformed because demand for live events remained robust relative to other recreational activities and consumers displayed limited sensitivity to the recent rise in ticket prices for premium events. Construction Partners Inc.'s stock outperformed because of moderating prices for raw materials required to produce asphalt and a record backlog of new projects attributable to the U.S. Infrastructure Investment and Jobs Act.

We added a new position in CCC Intelligent Solutions Holdings Inc. to the Fund based on the company's dominant market share and a wide competitive advantage. The company is well positioned to benefit from growing vehicle complexity to due to adoption of electric vehicles and advanced driver safety systems. An existing holding in Hayward Holdings Inc. was increased after the company faced several challenges in the past year, including destocking from wholesale distributors and weaker consumer demand. However, we believe demand has bottomed and the company can return to positive unit growth in 2024.

A holding in The Middleby Corp. was eliminated from the Fund because we believe the company management's ability to source and execute acquisitions at adequate returns has been diminished. Furthermore, we expect persistent challenges from retailer destocking and weak demand for new residential equipment. A holding in Malibu Boats Inc. was trimmed because of concerns that higher financing rates could negatively impact demand for new boats.

RECENT DEVELOPMENTS

We expect elevated inflation to persist over the near term and thus favour businesses that have sustainable competitive advantages that allow them to exercise pricing power. Globally, central banks have raised interest rates aggressively to combat inflation. This has put pressure on the valuations of high-growth information technology companies and companies in cyclical sub-sectors, including housing, luxury goods and industrial components. While we do not position the Fund based on specific macroeconomic factors, we believe the recent valuation pullback has presented compelling opportunities to build positions in high-quality companies within these spaces.

In our opinion, the Russia-Ukraine conflict has reshaped the global energy supply chain. The North American energy sector has benefited from elevated pricing and is well-positioned to ramp volumes to alleviate the shortage of crude oil and natural gas, especially in Europe. However, we remain cognizant of potential offsetting pressure from demand destruction and the economic slowdown induced by central banks to tame inflation.

Consumer budgets have been pressured by elevated inflation and deteriorating housing affordability. While we remain cautious, we expect consumer spending will be fairly resilient amid excess savings accumulated during the COVID-19 pandemic, record home equity and low unemployment. We expect spending to remain especially resilient in travel, entertainment and experiences, which consumers were unable to enjoy during the pandemic.

Management Report of Fund Performance for the period/year ended September 30, 2023

We continue to favour companies that can endure any economic environment, as well as businesses with short-term challenges that are trading at prices well below our estimate of their intrinsic value. We continue to place an emphasis on balance sheet resilience and liquidity, which enables businesses to continue investing through an economic downturn and ultimately emerge stronger when conditions recover.

(1) This information is derived from the Fund's semi-annual and annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on unitholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

(5) This information is provided for the period(s)/year(s) ended September 30, 2023 and March 31.

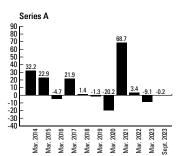

Management Report of Fund Performance for the period/year ended September 30, 2023

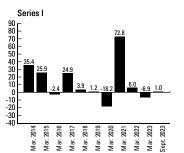

PAST PERFORMANCE

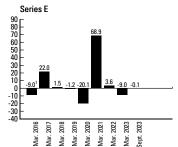

This section describes how the Fund has performed in the past. Remember, past returns do not indicate how the Fund will perform in the future. The information shown assumes that distributions made by the Fund in the period(s)/year(s) shown were reinvested in additional units of the Fund or relevant Series/Class of the Fund, as applicable.
