## RESULTS OF OPERATIONS

The Fund's net assets decreased by \$37.8 million to \$425.3 million from March 31, 2024 to September 30, 2024. The Fund had net redemptions of \$63.6 million for the period. The portfolio's performance increased assets by \$25.8 million. Series A shares returned 5.6% after fees and expenses for the six-month period ended September 30, 2024. Over the same time period, the Fund's benchmark returned 6.2%. The benchmark is the MSCI World Small Cap Index (NTR) (the Benchmark or the Index).

The performance of the Fund's other Series is substantially similar to that of Series A shares, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

Inflation continued to decline during the period due to restrictive monetary policy and higher interest rates. This progress on inflation, combined with weakening in the labour market, prompted the U.S. Federal Reserve Board to announce in September its first interest rate reduction since 2020.

Residential real estate activity remained depressed amid higher mortgage rates and weakness within certain pockets of commercial real estate, such as office and retail. Unemployment increased from record-low levels, which eased pressure on wages. Inflation and higher interest rates in mortgage, auto and credit card debt dampened consumer spending on discretionary purchases.

The impact of stimulus spending under the U.S. Infrastructure Investment and Jobs Act (IIJA), Inflation Reduction Act (IRA) and CHIPS and Science Act offset moderation in private sector investment. The proliferation of artificial intelligence (AI) spurred an increase in data center spending. Conflicts in Ukraine and the Middle East renewed concerns about global supply chains and increased defence spending.

The Fund underperformed its benchmark for the period. Security selection in the financials and health care sectors detracted from the Fund's performance. The largest individual detractors from the Fund's performance were positions in Regal-Beloit Corp., CONMED Corp., BE Semiconductor Industries NV, CCC Intelligent Solutions Holdings Inc., discoverIE Group PLC, Medpace Holdings Inc., Autoliv Inc., Burford Capital Ltd., Charles River Laboratories International Inc. and Hensoldt AG.

Security selection within the industrials and energy sectors contributed to the Fund's performance. Top individual contributors to the Fund's performance included holdings in CSW Industrials Inc., Watches of Switzerland Group PLC, Baltic Classifieds Group PLC, Construction Partners Inc., Coherent Corp., Glenveagh Properties PLC, Diploma PLC, Colliers International Group Inc., Texas Pacific Land Corp. and CACI International Inc.

We added new holdings to the Fund in Arcadis NV, Core & Main Inc., Crown Holdings Inc., Dominion Lending Centres Inc., Gitlab Inc., Natera Inc., Shibaura Mechatronics Corp., SmartCraft ASA, Wayfair Inc. and Wise PLC. Existing holdings in Cranswick PLC, Brookfield Infrastructure Partners L.P., BE Semiconductor Industries NV, Multiply Group SPA, Cargojet Inc. and Manchester United PLC were increased.

The Fund's positions in Bravida Holding AB, TechnoPro Holdings Inc. and Berry Global Group Inc. were eliminated while holdings in Construction Partners Inc., Colliers International Group Inc., Hensoldt AG, Dalata Hotel Group PLC, Diploma PLC, Medpace Holdings Inc., Bytes Technology Group PLC, Autoliv Inc., SOL SPA, Morningstar Inc., Charles River Laboratories International Inc., CONMED Corp., Regal-Beloit Corp., Bank OZK, Sensient Technologies Corp., Instalco AB, Hayward Holdings Inc. and Kinaxis Inc. were trimmed.

## RECENT DEVELOPMENTS

We expect inflation will moderate but remain at an elevated level. Therefore, we favour businesses that have sustainable competitive advantages that allow them to exercise pricing power. Lower inflation should cause central banks to ease monetary policy and cut interest rates. This should benefit the valuation of companies that operate in cyclical industries. We are cautious toward companies that sell discretionary goods because consumers remain pressured by inflation in the cost of living. However, we also believe low unemployment and a desire to spend on experiences should support overall consumer spending. Stimulus spending under the IIJA, IRA and CHIPS and Science Act should partially offset slower economic activity in the private sector related to higher interest rates.

Management Report of Fund Performance for the period/year ended September 30, 2024

We expect adoption of AI to increase, driving demand for semiconductor chips and data center capacity. The Fund is also invested in companies that are exposed to higher military and defence spending in response to recent conflicts across the world.

The Fund is positioned in companies that can endure any economic environment, as well as businesses with short-term challenges that are trading at prices well below our estimate of their intrinsic value. We continue to place an emphasis on balance sheet resilience and liquidity, which enables businesses to continue investing through an economic downturn and ultimately emerge stronger when economic conditions recover.

(1) This information is derived from the Fund's semi-annual and annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on shareholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

(5) This information is provided for the period(s)/year(s) ended September 30, 2024 and March 31.

(6) The Fund had no EFT5 Shares outstanding as at March 31, 2020.
