RESULTS OF OPERATIONS

The Fund's net assets increased by \$13.7 million to \$181.2 million from March 31, 2022 to September 30, 2022. The Fund had net sales of \$35.8 million during the period. The portfolio's performance decreased assets by \$21.7 million. The Fund paid distributions totalling \$0.4 million. Series A shares returned -10.8% after fees and expenses for the six-month period ended September 30, 2022. Over the same time period, the Fund's benchmark returned -12.9%. The benchmark is the MSCI World Total Return Index (the Benchmark or the Index).

The performance of the Fund's other Series is substantially similar to that of Series A shares, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

The following commentary pertains to the results of operations of the CI Global Dividend Opportunities Fund (the Underlying Fund).

Rising inflation, the Russia-Ukraine conflict, interest rate increases and deglobalization resulted in considerable uncertainty during the period. Riskier assets experienced volatility as investors came to terms with central banks' resolve to lower inflation through higher interest rates. Global stocks declined. Rising interest rates brought down expectations for economic growth. Markets were also rattled by the ongoing war in Ukraine, continued supply chain disruptions, high energy prices in Europe and an economic crisis in the United Kingdom.

The Underlying Fund outperformed its benchmark for the period. Stock selection contributed to the Underlying Fund's performance as did currency positioning. The largest individual contributors to the Fund's performance included holdings in McKesson Corp. and Store Capital Corp. McKesson Corp.'s stock price reflected the company's consistent strong execution. Store Capital Corp. saw its share price rise as it was acquired.

The Underlying Fund's holding in Altice USA Inc. detracted from performance amid weaker sentiment in the cable industry. A position in Philip Morris International Inc. was another notable detractor from the Underlying Fund's performance. Despite its significant momentum, a stronger U.S. dollar impacted the company's earnings expectations.

We trimmed the Underlying Fund's holding in Broadcom Inc. to manage its weighting within the portfolio.

Overall, the Fund outperformed its benchmark for the period.

RECENT DEVELOPMENTS

We believe that the economic backdrop continues to be uncertain. In addition, there is an aggressive tightening posture taken by the central banks around the world. We see these factors as challenges to fundamentals and asset prices and as such, we continue to position the Underlying Fund defensively.

⁽¹⁾ This information is derived from the Fund's semi-annual and annual financial statements.

(5) This information is provided for the period ended September 30, 2022 and the years ended March 31.

⁽²⁾ Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on shareholder residency and can be different from 13%.

⁽³⁾ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

⁽⁴⁾ The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period. The higher a Fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period.
