Management Report of Fund Performance for the period/year ended March 31, 2023

This annual management report of fund performance contains financial highlights but does not contain the complete annual financial statements of the investment fund. You can get a copy of the annual financial statements at your request, and at no cost, by calling 1-800-792-9355, by writing to us at CI Investments Inc., 15 York Street, Second Floor, Toronto, ON, M5J 0A3 or by visiting our website at www.ci.com or SEDAR at www.sedar.com.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

INVESTMENT OBJECTIVE AND STRATEGIES

The investment objective of the CI Energy Giants Covered Call Fund (the Fund) is to provide securityholders, through an actively managed portfolio, with (i) regular distributions, (ii) the opportunity for capital appreciation by investing on an equal weight basis in a portfolio of equity securities of at least the 15 largest energy companies measured by market capitalization listed on a North American stock exchange, and (iii) lower overall volatility of returns on the portfolio than would be experienced by owning a portfolio of securities of such issuers directly. The issuers included in the portfolio, which are based on their market capitalization, may be adjusted based on the portfolio adviser's view on the liquidity of the issuers' equity securities and their related call options.

To achieve its objective, the Fund invests all or substantially all of its assets in Hedged Common Units of CI Energy Giants Covered Call ETF (the Underlying ETF), which has the same portfolio adviser and objectives as the Fund.

For a complete discussion of the Fund's investment objective and strategies, please refer to the Fund's most recently filed simplified prospectus.

RISK

The risks of the Fund remain as discussed in the Fund's most recently filed simplified prospectus. The Manager reviews the risk rating for the Fund on an annual basis, at a minimum, based on the methodology mandated by the Canadian Securities Administrators to determine the risk level of the Fund.

RESULTS OF OPERATIONS

As at March 31, 2023, the Fund's net asset value were \$0.2 million. The Fund had net sales of \$0.2 million during the period.

During the period, central banks globally raised policy rates in an attempt to bring inflation levels down. The U.S. Federal Reserve Board (Fed) raised interest rates by 375 basis points (bps) while the European Central Bank (ECB) raised interest rates by 350 bps.

U.S. equities, as measured by the S&P 500 Index, declined 8.1%, while European equities, as measured by the STOXX Europe 600 Index, gained 3.8%. Japanese equities, as measured by the Nikkei Index, rose 2.9%. Bond yields declined in March 2023 as several banks ran into trouble, prompting investors' flight to safety into government bonds. U.S. regional bank SVB Financial Group failed, the largest failure in the United States since 2008. First Republic Bank had to secure a US\$30-billion deposit injection from other banks. Credit Suisse Group AG was purchased by UBS Group AG, which saved it from failing. The 10-year U.S. Treasury yield dropped 40 bps, while the two-year yield dropped 80 bps.

RECENT DEVELOPMENTS

Personal consumption measures in the United States declined during the period. While the labour market in the United States remains tight, if inflation continues to trend lower toward the Fed's 2% target, the Fed will have room to cut interest rates. Right now, the overnight indexed swap market is pricing in interest rate cuts from the Fed starting in September 2023 and totalling 75 bps by the end of 2023. This may be driven by fears caused by the bank failures. The ECB is expected to hike its policy rate by another 50 bps.

In the United States, the two- and 10-year yield curve is inverted by 60 bps. An inverted yield curve has historically been a good predictor of recession. If a recession does occur, the Fed, ECB and Bank of Canada would be likely to cut their respective policy rates. Ongoing economic releases will demonstrate if the interest rate increases have cooled inflationary pressures. With many economic measures trending lower, there is a growing risk that developed markets will see a period of stagflation with slower growth and high inflation.

(1) This information is derived from the Fund's audited annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on unitholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

(5) This information is provided for the period(s)/year(s) ended March 31.
