Level 3 Reconciliation (cont'd)
 The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Equities	1,575,603	Recent transaction	Recent transaction price

The above investments are valued using the valuation techniques detailed below:

Recent transaction: The investments are valued based on recent completed transaction, which may include external financing, secondary market trades or other transactions near the measurement dates.

For investments valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable units of the Fund as at March 31, 2025 and 2024.

Level 3 Reconciliation (cont'd)

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Equity	800,968	Discounted cash flows	Discount rate, terminal growth rate

The above investment is valued using the valuation techniques detailed below:

Discounted cash flows: The investment is valued based on its expected future cash flows.

The range of reasonably possible alternative assumptions would result in an increase or decrease in a fair value of approximately \$40,000.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable units of the Fund as at March 31, 2025 and 2024.

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Equities	800,968	Discounted cash flows	Discount rate, terminal growth rate

The above investments are valued using the valuation techniques detailed below:

Discounted cash flows: The investments are valued based on its expected future cash flows.

The range of reasonably possible alternative assumptions would result in an increase or decrease in a fair value of approximately \$40,000.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable units of the Fund as at March 31, 2025 and 2024.

Level 3 Reconciliation (cont'd)

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at March 31, 2025

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Bond	15,970,300	Black-Derman-Toy/ Lattice Model	Credit spreads, Interest Rate Volatility
Equity	8,708,961	Capitalized Cash Flow, Recent Transaction	Discount rate, Sales growth rate, EBITDA Multiple

The above investments are valued using the valuation techniques detailed below:

Black-Derman-Toy/Lattice Model: The investment is valued based on its future cash flows while incorporating interest rate modeling into the pricing framework and accounting for prepayment option.

The range of reasonably possible alternative assumptions based on 5% of increase/decrease in credit spreads and interest rate volatility, would result in an increase or decrease in a fair value of approximately \$799,000.

Capitalized cash flow and Recent Transaction: The investment is valued based on its expected future cash flows and the recent transaction price.

The range of reasonably possible alternative assumptions based on 5% of increase/decrease in the discount rate, sales growth rate and the EBITDA multiple, would result in an increase or decrease in a fair value of approximately \$435,000.

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Bonds	23,412,363	Discounted cash flows	Credit spreads
Bond	7,113,385	Market comparable analysis	Estimated sale price, discount rate
Equity	9,102,777	Capitalized cash flow	Discount rate, sales growth rate

The above investments are valued using the valuation techniques detailed below:

Discounted cash flows: The investments are valued based on its expected future cash flows.

The range of reasonably possible alternative assumptions would result in an increase or decrease in a fair value of approximately \$1,171,000.

Market comparable analysis: Bond is valued based on comparable companies bond valuation.

The range of reasonably possible alternative assumptions would result in an increase or decrease in a fair value of approximately \$356,000.

Capitalized cash flow: The investment is valued based on its expected future cash flows.

The range of reasonably possible alternative assumptions would result in an increase or decrease in a fair value of approximately \$455,000.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable units of the Fund as at March 31, 2025 and 2024.

Level 3 Reconciliation (cont'd)

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at March 31, 2025

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
		Net asset value as reported by underlying fund's investment manager	Net asset value
Fund	2,566,149		
Bonds	1,461,745	Black-Derman-Toy/Lattice Model	Credit spreads, Interest Rate Volatility

The above investments are valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Black-Derman-Toy/Lattice Model: The investment is valued based on its future cash flows while incorporating interest rate modeling into the pricing framework and accounting for prepayment option.

The range of reasonably possible alternative assumptions based on 5% of increase/decrease in credit spreads and interest rate volatility, would result in an increase or decrease in a fair value of approximately \$73,000.

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
		Net asset value as reported by underlying fund's investment manager	Net asset value
Fund	2,282,621		
Bond	3,555,100	Discounted cash flows	Credit spreads

The above investments are valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Discounted cash flows: The investment is valued based on its expected future cash flows.

The range of reasonably possible alternative assumptions would result in an increase or decrease in a fair value of approximately \$117,000.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable shares of the Fund as at March 31, 2025 and 2024.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at March 31, 2025

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
		Net asset value as reported by underlying fund's investment manager	Net asset value
Fund	20,179,367		

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
		Net asset value as reported by underlying fund's investment manager	Net asset value
Fund	17,949,795		
Bonds	8,734,643	Discounted cash flows	Credit spreads

The above investments are valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Discounted cash flows: The investments are valued based on its expected future cash flows.

The range of reasonably possible alternative assumptions would result in an increase or decrease in a fair value of approximately \$437,000.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable units of the Fund as at March 31, 2025 and 2024.

Level 3 Reconciliation (cont'd)

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at March 31, 2025

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Bond	1,203,623	Black-Derman-Toy/ Lattice Model	Credit spreads, Interest Rate Volatility

The above investment is valued using the valuation techniques detailed below:

Black-Derman-Toy/Lattice Model: The investment is valued based on its future cash flows while incorporating interest rate modeling into the pricing framework and accounting for prepayment option.

The range of reasonably possible alternative assumptions based on 5% of increase/decrease in credit spreads and interest rate volatility, would result in an increase or decrease in a fair value of approximately \$60,000.

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
Bond	1,125,551	Discounted cash flows	Credit spreads

The above investment is valued using the valuation techniques detailed below:

Discounted cash flows: The investment is valued based on its expected future cash flows.

The range of reasonably possible alternative assumptions would result in an increase or decrease in a fair value of approximately \$56,000.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable units of the Fund as at March 31, 2025 and 2024.

Level 3 Reconciliation (cont'd)

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at March 31, 2025

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
		Net asset value as reported by underlying fund's investment manager	Net asset value
Funds	187,969,767		

The above investments are valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investments valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
		Net asset value as reported by underlying fund's investment manager	Net asset value
Funds	125,055,451		

The above investments are valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investments valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable units of the Fund as at March 31, 2025 and 2024.

Level 3 Reconciliation (cont'd)

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at March 31, 2025

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
		Net asset value as reported by underlying fund's investment manager	Net asset value
Fund	93,478,802		

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
		Net asset value as reported by underlying fund's investment manager	Net asset value
Fund	82,343,089		

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable units of the Fund as at March 31, 2025 and 2024.

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at March 31, 2025

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
		Net asset value as reported by underlying fund's investment manager	Net asset value
Fund	4,345,439		

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
		Net asset value as reported by underlying fund's investment manager	Net asset value
Fund	5,937,230		

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable shares of the Fund as at March 31, 2025 and 2024.

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at March 31, 2025

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
		Net asset value as reported by underlying fund's investment manager	Net asset value
Fund	5,587,310		

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
		Net asset value as reported by underlying fund's investment manager	Net asset value
Fund	9,895,383		

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable shares of the Fund as at March 31, 2025 and 2024.

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at March 31, 2025

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
		Net asset value as reported by underlying fund's investment manager	Net asset value
Fund	14,679,471		

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
		Net asset value as reported by underlying fund's investment manager	Net asset value
Fund	14,146,015		

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable shares of the Fund as at March 31, 2025 and 2024.

Fund	17,688,209		

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable shares of the Fund as at March 31, 2025 and 2024.

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at March 31, 2025

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
		Net asset value as reported by underlying fund's investment manager	Net asset value
Fund	12,953,220		

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
		Net asset value as reported by underlying fund's investment manager	Net asset value
Fund	9,895,383		

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable shares of the Fund as at March 31, 2025 and 2024.

The following section discusses the significant unobservable inputs for individually material Level 3 positions and quantitatively outlines the inputs used to calculate fair value in accordance with IFRS 13, Fair Value Measurement.

The table/tables below presents/present the valuation technique/techniques and the nature of significant input/inputs used to determine the fair value of the Level 3 investments:

as at March 31, 2025

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
		Net asset value as reported by underlying fund's investment manager	Net asset value
Fund	6,749,380		

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

as at March 31, 2024

Asset Type	Fair Value \$	Valuation Techniques	Significant Unobservable Inputs
		Net asset value as reported by underlying fund's investment manager	Net asset value
Fund	9,895,383		

The above investment is valued using the valuation techniques detailed below:

Net asset value: The valuation utilizes net asset value as reported by the underlying fund's investment manager.

For investment valued based on net asset value, a sensitivity analysis to show the potential effect of using reasonably possible alternative assumptions is not applicable.

Investments classified as Level 3 are valued at fair value based on unobservable inputs and assumptions, which may include credit spreads, industry multipliers, and discount rates. Management has assessed that the effect of changing these inputs to reasonably possible alternatives would not have a significant impact on the net assets attributable to holders of redeemable shares of the Fund as at March 31, 2025 and 2024.
