## INVESTMENT OBJECTIVE AND STRATEGIES

The investment objective of the CI Select Canadian Equity Fund (the Fund) is to seek capital appreciation over the long-term coupled with dividend income. It invests primarily in common shares and convertible securities of Canadian companies and preferred shares that pay regular income. The Fund's investments are diversified across industry sectors.

The portfolio advisor identifies companies that offer good value and the potential for growth in their industry and then considers the impact of economic trends.

The portfolio advisor uses techniques such as fundamental analysis to assess the value and growth potential of a company. This means evaluating the financial condition and management of a company, its industry, and the overall economy. The portfolio advisor analyzes financial data, assesses the quality of management, and conducts company interviews.

Investments in foreign securities will generally be no more than 49% of the Fund's assets.

For a complete discussion of the Fund's investment objective and strategies, please refer to the Fund's most recently filed simplified prospectus.

## RISK

No changes affecting the overall level of risk associated with investing in the Fund were made during the period/year. The risks of the Fund remain as discussed in the Fund's most recently filed simplified prospectus or its amendments. The Manager reviews the risk rating for the Fund on an annual basis, at a minimum, based on the methodology mandated by the Canadian Securities Administrators to determine the risk level of the Fund. Any change to the risk rating made during the period/year was as a result of such review and was not a result of any change to the investment objective, strategies or management of the Fund.

## RESULTS OF OPERATIONS

The Fund's net assets increased by \$71.1 million to \$2,822.1 million from March 31, 2023 to March 31, 2024. The Fund had net redemptions of \$382.0 million during the year. The portfolio's performance increased assets by \$485.6 million. The Fund paid distributions totalling \$32.5 million. Series A units returned 18.1% after fees and expenses for the one-year period ended March 31, 2024. Over the same time period, the Fund's benchmark returned 18.7%. The benchmark is a combination of the MSCI ACWI Total Return Index - 50% and the S&P/TSX Composite Total Return Index - 50% (the Benchmark or the Index).

The performance of the Fund's other Series is substantially similar to that of Series A units, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

During the year, progress was made to reduce inflation in Canada and in most developed economies. Supply chain problems receded, the effects of higher interest rates increased, and commodity price pressures eased through most of the year. As a result, equity markets performed well on the expectation of reasonable economic growth, declining inflation, and expectations of interest rate cuts in 2024.

Within Canada, economic growth was slower due to broad-based weakness in consumer and investment spending, both of which were impacted by the Bank of Canada's interest rate increases. While financial markets priced in future interest rate cuts, corporations and consumers were still dealing with higher interest rates, which restrained economic activity.

From January to March 2024, equity markets continued their strong performance, propelled by declining inflation levels, a strong economic backdrop in the United States, and an expectation that central banks had ended their cycles of interest rate increases. By the end of March, expectations for interest rate cuts had moderated somewhat as inflation proved persistent due to ongoing wage strength and some passthrough of commodity price increases. However, the path forward still appeared to one of an easing of monetary policy.

The Fund underperformed its benchmark during the year. Underweight exposure to the information technology sector detracted from the Fund's performance, as did stock selection within the consumer discretionary sector. The largest individual detractors from performance included an underweight position in NVIDIA Corp. and lack of exposure to Meta Platforms Inc.

Stock selection in the financials, consumer staples and materials sectors contributed to the Fund's performance. An overweight allocation to financials also contributed to performance. The largest individual contributors to performance included positions in Fairfax Financial Holdings Ltd. and Advanced Micro Devices Inc. Fairfax Financial released a series of strong earnings reports that led to higher earnings and a valuation increase. Advanced Micro Devices benefited from its exposure to the growing artificial intelligence industry, which bolstered optimism around demand for its microchips.

# CI Select Canadian Equity Fund

Management Report of Fund Performance for the period/year ended March 31, 2024

We added new positions in Stantec Inc., Restaurant Brands International Inc., The Goldman Sachs Group Inc. and Entergy Corp. to the Fund. We increased existing holdings in Bank of Montreal, Agnico Eagle Mines Ltd. and TELUS Corp. Holdings in Jamieson Wellness Inc., TC Energy Corp., Emera Inc. and Humana Inc. were eliminated, while Teck Resources Ltd., Manulife Financial Corp. and Cenovus Energy Inc. were trimmed. We also trimmed the Fund's holdings in Fairfax Financial given that its share price has come closer to our target price, despite some volatility caused by a short report in early 2024.

## RECENT DEVELOPMENTS

The Fund is positioned with an overweight allocation to Canada, as we believe that the valuation differential between Canada and the United States is not justified at existing levels. Geopolitical risks (conflicts in the Middle East and Ukraine, a variety of upcoming elections around the world) have influenced market trading, and we remain conscious of these risks, reflected by the Fund's moderate overweight to the energy sector. The Fund is also positioned with a significant overweight exposure to the financials sector. We believe that economic concerns have been overly discounted in Canadian bank share prices and that investors' perception is likely to change over the near term.

### Series merger

Effective July 21, 2023, Insight Series merged into Series Y.

(1) This information is derived from the Fund's audited annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on unitholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

(5) This information is provided for the period(s)/year(s) ended March 31.

(6) The Fund had no Insight Series outstanding as at March 31, 2024.
