INVESTMENT OBJECTIVE AND STRATEGIES

The investment objective of the CI Gold Corporate Class (the Fund) is to provide a secure, convenient alternative for investors seeking to hold gold for long-term capital growth. The Fund will invest primarily, directly or indirectly, in gold and equity securities that provide exposure to gold. The Fund may also invest, directly or indirectly, in silver, platinum, and palladium.

The portfolio advisor will make investments based on an evaluation of economic and market conditions. The Fund will invest primarily in gold and equity securities which provide exposure to gold such as gold certificates, exchange-traded funds, and securities of issuers engaged in the development or production of gold.

When investing in securities of companies, the portfolio advisor identifies companies that offer good value and the potential for growth in their industry and then considers the impact of economic trends. The portfolio advisor uses techniques such as fundamental analysis to assess the value and growth potential of a company. This means evaluating the financial condition and management of a company, its industry, and the overall economy. The portfolio advisor analyzes financial data, assesses the quality of management, and conducts company interviews.

The Fund has received exemptive relief from the Canadian Securities regulatory authorities permitting it to invest up to 100% of its net asset value, taken at the time of investment, in gold and/or permitted gold certificates.

The Fund may use derivatives, but only as permitted by securities regulations. In order to earn additional income, the Fund may also enter into securities lending transactions, repurchase transactions and reverse repurchase transactions, to the extent permitted by securities regulations.

For a complete discussion of the Fund's investment objective and strategies, please refer to the Fund's most recently filed simplified prospectus.

RISK

No changes affecting the overall level of risk associated with investing in the Fund were made during the period/year. The risks of the Fund remain as discussed in the Fund's most recently filed simplified prospectus or its amendments. The Manager reviews the risk rating for the Fund on an annual basis, at a minimum, based on the methodology mandated by the Canadian Securities Administrators to determine the risk level of the Fund. Any change to the risk rating made during the period/year was as a result of such review and was not a result of any change to the investment objective, strategies or management of the Fund.

RESULTS OF OPERATIONS

The Fund's net assets decreased by \$7.3 million to \$36.0 million from March 31, 2023 to March 31, 2024. The Fund had net redemptions of \$6.3 million during the year. The portfolio's performance decreased assets by \$0.7 million. The Fund paid distributions totalling \$0.3 million. Series A shares returned -0.9% after fees and expenses for the one-year period ended March 31, 2024. Over the same time period, the Fund's benchmark returned 4.9%. The benchmark is a combination of the Gold Bullion - 50% and the S&P/TSX Global Gold Total Return Index - 50% (the Benchmark or the Index).

The performance of the Fund's other Series is substantially similar to that of Series A shares, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

Precious metal prices strengthened during the year because of a number of factors. First, expectations of peak interest rates and the increasing potential for the U.S. Federal Reserve Board (Fed) to start cutting interest rates in 2024 lifted gold prices. Second, rising geopolitical tensions in Israel and the ongoing war in Ukraine continued to buoy gold prices as a "safe haven" asset. Gold was also supported by strong demand from central banks. Despite strength in commodity prices, equities underperformed due to inflation challenges impacting the profitability of mining companies. Furthermore, disappointing 2023 production results and weak 2024 forecasts impacted numerous gold miners.

The Fund underperformed its benchmark during the year, largely as a result of security selection and sector allocation. Stock selection also detracted from the Fund's performance. Individual detractors from the Fund's performance included holdings in SSR Mining Inc., Victoria Gold Corp. and K92 Mining Inc. SSR Mining Inc. was negatively impacted by weak production forecasts. In February 2024, the company also announced a tragic landslide at its heap leach in Turkey that resulted in the closure of all mining at its Turkish operations. Victoria Gold Corp. saw its shares underperform because of higher costs and weak production amid forest fire interruptions. K92 Mining Inc. was affected by an underground mining incident that resulted in a temporary closure of mining activities.

CI Gold Corporate Class

Management Report of Fund Performance for the period/year ended March 31, 2024

The largest individual contributors to the Fund's performance were commodity exchange-traded funds (ETFs) and an underweight position in Newmont Corp. Gold prices outperformed gold producer equities because of the ongoing impact of cost inflation among the miners and disappointing production from several producers. As a result, the Fund's significant holding of precious metals ETFs contributed to performance. Newmont Corp. underperformed because of the acquisition and integration of Newcrest Mining Ltd. and the announcement of weak combined production forecasts.

We added a new position in Franco-Nevada Corp. to the Fund and increased an existing position in Sandstorm Gold Ltd. A holding in SSR Mining Inc. was eliminated and the Fund's position in Osisko Gold Royalties Ltd. was trimmed.

RECENT DEVELOPMENTS

Our outlook remains positive for precious metals. We believe that pricing should remain strong as the Fed embarks on interest rate cuts later in 2024. However, we remain cautious on producer costs, and therefore, have positioned the Fund with an overweight exposure to royalty companies and will maintain holdings in precious metals ETFs.

(1) This information is derived from the Fund's audited annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on shareholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

(5) This information is provided for the period(s)/year(s) ended March 31.

The spot price of Gold Bullion on any given day is equal to the spot price of physical gold, as measured by the afternoon gold fixing price (also known as the London Gold P.M.
