## INVESTMENT OBJECTIVE AND STRATEGIES

The investment objective of the CI Global Dividend Fund (the Fund) is to achieve high total investment return by investing in primarily equity securities of companies anywhere in the world that pay, or may be expected to pay, dividends, as well as in other types of securities that may be expected to distribute income.

The portfolio advisor identifies companies that have the potential for success in their industry and then considers the impact of economic trends. The portfolio advisor uses techniques such as fundamental analysis to assess the value and growth potential of a company. This means evaluating the financial condition and management of a company, its industry, and the overall economy. The portfolio advisor analyzes financial data, assesses the quality of management, and conducts company interviews.

For a complete discussion of the Fund's investment objective and strategies, please refer to the Fund's most recently filed simplified prospectus.

### RISK

No changes affecting the overall level of risk associated with investing in the Fund were made during the period/year. The risks of the Fund remain as discussed in the Fund's most recently filed simplified prospectus or its amendments. The Manager reviews the risk rating for the Fund on an annual basis, at a minimum, based on the methodology mandated by the Canadian Securities Administrators to determine the risk level of the Fund. Any change to the risk rating made during the period/year was as a result of such review and was not a result of any change to the investment objective, strategies or management of the Fund.

### **RESULTS OF OPERATIONS**

The Fund's net assets increased by \$22.2 million to \$684.9 million from March 31, 2023 to March 31, 2024. The Fund had net redemptions of \$71.6 million during the year. The portfolio's performance increased net assets by \$114.8 million. The Fund paid distributions totalling \$21.0 million. Series A units returned 17.7% after fees and expenses for the one-year period ended March 31, 2024. Over the same time period, the Fund's benchmark returned 13.1%. The benchmark is the MSCI ACWI Global High Dividend Yield Total Return Index (the Benchmark or the Index).

The performance of the Fund's other Series is substantially similar to that of Series A units, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

As the year progressed, concerns around persistent global inflation began to abate and the likelihood of an economic soft landing (a slowdown in growth that avoids recession) increased. China's economy continued to lose momentum, while the U.S. economy was surprisingly resilient. Large growth trends in information technology drove concentrated outperformance for a small group of mega-capitalization information technology stocks (the "Magnificent 7"). Geopolitical tensions continued to support higher oil prices.

The Fund outperformed its benchmark for the year. Overweight exposure to the health care, financials, information technology, industrials, energy, consumer discretionary, communication services, materials and real estate sectors contributed to the Fund's performance. From a geographic perspective, allocations to the United States, the United Kingdom, France, Netherlands, Taiwan, Japan, Australia, Denmark and Belgium contributed to performance. The largest individual contributors to performance included holdings in Eli Lilly and Co., Broadcom Inc., Microsoft Corp., JPMorgan Chase & Co., Taiwan Semiconductor Manufacturing Co. Ltd., Linde PLC, Toyota Motor Corp., US Foods Holding Corp., Pioneer Natural Resources Co. and Safran SA.

The largest individual detractors from performance included holdings in Diageo PLC, The Estée Lauder Cos. Inc., Kenvue Inc., Nike Inc., Nestlé SA, RWE AG, AIA Group Ltd., Chevron Corp., Siemens AG and Danaher Corp.

During the year, we initiated and subsequently exited positions in Accenture PLC, Analog Devices Inc., CDW Corp., Hess Corp., Iberdrola SA, Kenvue Inc., McDonald's Corp. and Veralto Corp. We increased several existing holdings, including Eli Lilly and Co., UnitedHealth Group Inc., The Procter & Gamble Co., Broadcom Inc. and Merck & Co. Inc. The Fund's positions in Johnson & Johnson, Shell PLC, JPMorgan Chase & Co., Linde PLC and RWE AG were decreased.

## **RECENT DEVELOPMENTS**

Financial markets have undergone the swiftest monetary tightening cycle in history, undoing over a decade of unprecedented monetary and fiscal expansion. The economy managed to avoid a recession in the past year, but historically, the long lags between monetary tightening and weakness in the economy suggest increased risks as we look ahead. As the business cycle matures, inflation moderates and interest rates peak, we expect slowing economic growth to serve as a challenge to corporate profits.

Geopolitical risks tied to global energy and agriculture supply chains have not abated. Ongoing conflicts, such as the Russia–Ukraine conflict and recent events in the Middle East, are contributing to the prevailing atmosphere of uncertainty and risk.

Given the backdrop of decelerating growth and persistent geopolitical uncertainties, we perceive increased risk and fragility in financial markets. As a result, we are placing greater emphasis on diversification within the Fund to better navigate greater uncertainty and volatility.

(1) This information is derived from the Fund's audited annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on unitholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the perceds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

(5) This information is provided for the period(s)/year(s) ended March 31.

## PAST PERFORMANCE

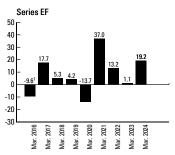

This section describes how the Fund has performed in the past. Remember, past returns do not indicate how the Fund will perform in the future. The information shown assumes that distributions made by the Fund in the period(s)/year(s) shown were reinvested in additional units of the Fund or relevant Series/Class of the Fund, as applicable. In addition, the information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance.

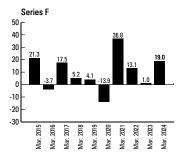

## Year-by-Year Returns

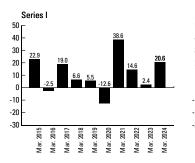

The following chart/charts shows/show the Fund's annual performance for each of the period(s)/year(s) shown and illustrates/illustrate how the Fund's performance has changed from period/ year to period/year. In percentage terms, the chart/charts shows/show how much an investment made on the first day of each financial period/year would have grown or decreased by the last day of each financial period/year, except where noted.

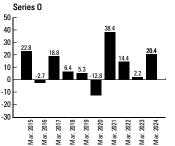

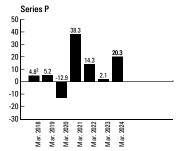

1 2016 return is for the period from August 04, 2015 to March 31, 2016.

2 2018 return is for the period from May 01, 2017 to March 31, 2018.
