INVESTMENT OBJECTIVE AND STRATEGIES

The investment objective of the CI Global Bond Fund (the Fund) is to obtain long-term total return. It invests primarily in fixed income and floating rate securities of governments and companies throughout the world that the portfolio advisor believes offer an attractive yield and opportunity for capital gains. The Fund may make large investments in any country, including emerging markets and emerging industries of developed markets, and in high yield securities of developed markets.

The portfolio advisor selects securities that it believes have fundamental value that is not reflected in their credit rating and yield. The portfolio advisor uses techniques such as fundamental analysis to assess growth potential. This means evaluating the financial condition and management of an issuer, its industry, and the overall economy. The portfolio advisor analyzes whether companies can generate enough cash to service debt and reinvest into their business over the long-term.

The Fund has received permission from securities regulatory authorities to invest and hold up to 35% of its assets in securities issued or guaranteed by any government or its agency or by certain supranational agencies as long as these securities meet or exceed minimum credit ratings. There is no limit on how much the Fund can invest in securities issued or guaranteed by Canadian federal or provincial governments or their agencies, or by the U.S. government or its agencies.

For a complete discussion of the Fund's investment objective and strategies, please refer to the Fund's most recently filed simplified prospectus.

RISK

No changes affecting the overall level of risk associated with investing in the Fund were made during the period/year. The risks of the Fund remain as discussed in the Fund's most recently filed simplified prospectus or its amendments. The Manager reviews the risk rating for the Fund on an annual basis, at a minimum, based on the methodology mandated by the Canadian Securities Administrators to determine the risk level of the Fund. Any change to the risk rating made during the period/year was as a result of such review and was not a result of any change to the investment objective, strategies or management of the Fund.

RESULTS OF OPERATIONS

The Fund's net assets decreased by \$184.2 million to \$236.3 million from March 31, 2022 to March 31, 2023. The Fund had net redemptions of \$163.4 million during the year. The portfolio's performance decreased assets by \$9.8 million. The Fund paid distributions totalling \$11.0 million. Series A units returned -2.2% after fees and expenses for the one-year period ended March 31, 2023. Over the same time period, the Fund's benchmark returned -1.6%. The benchmark is the J.P. Morgan Global Government Bond Total Return Index (the Benchmark or the Index).

The performance of the Fund's other Series is substantially similar to that of Series A units, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

Central banks around the world continued to raise interest rates throughout the year. After reaching the highest inflation levels in decades, recent readings showed that inflation has dropped from its peak, but core measures remained elevated, leading central banks to maintain their monetary policy stance.

The Canadian and U.S. government bond yield curves began to invert as the past year progressed in anticipation of weaker economic growth. Economic growth did slow in most interest-rate-sensitive sectors as higher borrowing costs and tighter financial conditions led to decreased spending. However, labour markets remain tight, with low unemployment and strong nominal wage gains.

The Fund underperformed its benchmark for the year. Exposure to corporate bonds detracted from the Fund's performance, resulting largely from its overweight exposure to high-yield corporate bonds. Holdings in French Republic 0.0% Nov. 25, 2030 and Republic of Italy 0.5% Feb. 1, 2026 bonds detracted from the Fund's performance as European interest rates rose. A holding in U.S. Treasury 1.875% Nov. 15, 2051 bonds was another notable detractor from the Fund's performance as U.S. interest rates rose.

The Fund's underweight duration (sensitivity to interest rates) positioning contributed most to performance as interest rates increased. The largest individual contributors to the Fund's performance were holdings in General Electric Co. preferred shares and U.S. Treasury 0.375% Oct. 31, 2023 and U.S. Treasury 2.75% Aug. 15, 2023 bonds. General Electric Co. continued its progress towards splitting into three companies, which should also result in significant debt repayment, and the company announced the spin-off of its health care division. We expect the company's preferred shares to be redeemed starting in late 2023 to early 2024, offering a double-digit return. The U.S. Treasury holdings performed well because of a strengthening U.S. dollar against the Canadian dollar and rising interest rates.

CI Global Bond Fund

Management Report of Fund Performance for the period/year ended March 31, 2023

During the year, we made a number of changes to the Fund's government bonds allocation, increasing its exposure to both domestic and foreign government bonds. As interest rose through the fourth quarter of 2022, we increased the Fund's duration mainly through 10- and 30-year bonds, including adding new holdings in U.S. Treasury 2.75% Aug. 15, 2032 and Government of Canada (GoC) 2.5% Dec. 1, 2032 bonds. We increased an existing Fund holding in GoC 1.75% Dec. 1, 2053 bonds. The Fund's position in Republic of Colombia 2.625% Mar. 15, 2023 bonds was eliminated to take profits as the bond approached maturity.

RECENT DEVELOPMENTS

We are expecting a further slowing of the economy, which will likely lead to recession in 2023. Therefore, we have positioned the Fund with a bias toward a longer duration in the U.S. and Canada, and a lower exposure to credit. The Fund has underweight allocations to U.K. and European sovereign bonds because of their less attractive real yield profile. We added to the Fund's overweight exposure to North American debt, with the Fund having a shorter duration than its benchmark overall.

(1) This information is derived from the Fund's audited annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on unitholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

(5) This information is provided for the period(s)/year(s) ended March 31.
