INVESTMENT OBJECTIVE AND STRATEGIES

The investment objective of CI Diversified Yield Corporate Class (the Fund) is to generate a high level of income by investing, directly or indirectly, in fixed income and high-yielding equity securities throughout the world. Indirect investments can include derivatives and investments in other mutual funds. The portfolio advisor invests in companies throughout the world that have the potential for growth and value in their industry and then considers the impact of economic trends. The portfolio advisor to the Fund will actively manage the equity, fixed income, and cash components of the Fund.

Equity investments may include common shares, preferred shares and real estate investment trusts, royalty trusts, and similar high yielding investments.

The portfolio advisor may use techniques such as underlying fundamental analysis to assess growth and value potential. This means evaluating the financial condition and management of each company, its industry, and the overall economy.

Fixed income securities may include investment grade corporate and government fixed income securities throughout the world. The Fund may also invest in bank loans, convertible bonds, floating rate debt instruments and corporate bonds with ratings below investment grade or are unrated.

The Fund may use derivatives, but only as permitted by securities regulations. In order to earn additional income, the Fund may also enter into securities lending transactions, repurchase transactions and reverse repurchase transactions, to the extent permitted by securities regulations.

For a complete discussion of the Fund's investment objective and strategies, please refer to the Fund's most recently filed simplified prospectus.

RISK

No changes affecting the overall level of risk associated with investing in the Fund were made during the period/year. The risks of the Fund remain as discussed in the Fund's most recently filed simplified prospectus or its amendments. The Manager reviews the risk rating for the Fund on an annual basis, at a minimum, based on the methodology mandated by the Canadian Securities Administrators to determine the risk level of the Fund. Any change to the risk rating made during the period/year was as a result of such review and was not a result of any change to the investment objective, strategies or management of the Fund.

RESULTS OF OPERATIONS

The Fund's net assets decreased by \$99.8 million to \$198.0 million from March 31, 2022 to March 31, 2023. The Fund had net redemptions of \$81.9 million during the year. The portfolio's performance decreased assets by \$16.4 million. The Fund paid distributions totalling \$1.5 million. Series A shares returned -6.4% after fees and expenses for the one-year period ended March 31, 2023. Over the same time period, the Fund's benchmark returned -2.9%. The benchmark is a combination of the ICE BofA U.S. High Yield Total Return Index (USD) - 40%, the MSCI ACWI Global High Dividend Yield Total Return Index - 20%, the MSCI ACWI Infrastructure Total Return Index - 20% and the MSCI World Real Estate Total Return Index - 20% (the Benchmark or the Index).

The performance of the Fund's other Series is substantially similar to that of Series A shares, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

Economic activity was robust during the year but decelerated. Energy and transportation volumes remained strong, driving outperformance in securities exposed to those sectors. An eventual slowdown in economic growth that resulted from the removal of fiscal stimulus and tighter monetary policy was inevitable as central banks attempted to tame inflation. Negative year-over-year growth began to be priced into the market as central bank policy took an even more aggressive shift mid-2022 in the face of resilient inflation. As a result of higher government bond yields, investment-grade bonds, high-yield bonds and real estate investment trusts (REITs) repriced lower, with commercial real estate facing a new challenge in the form of higher vacancies.

CI Diversified Yield Corporate Class

Management Report of Fund Performance for the period/year ended March 31, 2023

The Fund underperformed its benchmark for the year. A holding in Alexandria Real Estate Equities Inc. detracted from the Fund's performance. The company's stock underperformed as elevated leasing during the past couple of years is likely to decelerate. The stock had a further drop on news of the SVB Financial Group bankruptcy, although the company indicated that its clients have little exposure to SVB Financial Group. The stock sell-off appeared overdone as the company has a strong balance sheet with no debt maturities until 2025 and lease escalators that average 3%, providing a solid base for growth. A holding in Credit Suisse Group AG additional tier 1 notes was a significant detractor from the Fund's performance. The bank had initiated a comprehensive restructuring of its investment bank in the fourth quarter of 2022, the costs of which were offset by an equity capital raise. However, the fragile market and negative headlines in March 2023 precipitated rapid outflows to the point that the Swiss regulator deemed the bank non-viable and helped broker the acquisition of the bank by UBS Group AB.

An overweight exposure to energy infrastructure significantly contributed to the Fund's performance. Unhedged U.S.-dollar exposure also contributed to the Fund's performance, as did security selection across all asset classes. A holding in Cheniere Energy Inc. contributed to the Fund's performance as a spike in natural gas prices allowed the company to take profits on its uncontracted liquefied natural gas export cargoes. An American Airlines Group Inc. AAdvantage term loan due 2028 contributed positively to the Fund's performance. Collateralized by a loyalty program, this loan proved resilient in a rising interest rate environment.

We added SNC-Lavalin Group Inc. 7.0% bonds due 2026 to the Fund as the company's credit quality seems to be set for improvement as overbudget, fixed-price turnkey projects roll off. New non-core consumer staples and health care equities, such as The Coca-Cola Company and GSK PLC, were also added to the Fund, but were later sold to fund a new position in AT&T Inc. Bank of Montreal 7.373% institutional preferred shares were purchased as well. They have essentially the same structure as limited recourse capital notes but pay in dividends instead of interest.

Refinancing activity has been muted since the interest rate structure repriced higher. As a result, fewer bonds were called for early redemption than is typical in a 12-month period. Over the course of the year, we traded in and out of the Government of Canada 10-year bond. While non-core to our strategy for the Fund, we took advantage of falling yields to turn a profit.

RECENT DEVELOPMENTS

Our chief concern is credit availability and the risk that the U.S. Federal Reserve Board focuses too long on inflation rather than growth. We expect a short and shallow recession in 2023, though this is not a certainty as financial conditions have now tightened to the point of fragility. Importantly though, the failure of some U.S. regional banks can be attributed to poor risk management rather than a function of bad assets.

Valuations have adjusted for the increase in downside risks. Overall, REITs have strong balance sheets and are not reliant on regional banks for funding, and except for office REITs, continue to have solid operating metrics. We believe current valuations looks attractive with REITs trading at 15-20% discounts to net asset value. Just as employment is proving resilient after a record year of interest rate hikes, so too is consumer spending. We believe that energy and transportation volumes, and inflation-indexed price hikes, can persist through the rest of 2023 and should support infrastructure equity valuations.

(1) This information is derived from the Fund's audited annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on shareholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

(5) This information is provided for the period(s)/year(s) ended March 31.
