INVESTMENT OBJECTIVE AND STRATEGIES

The investment objective of CI Diversified Yield Corporate Class (the Fund) is to generate a high level of income by investing, directly or indirectly, in fixed income and high-yielding equity securities throughout the world. Indirect investments can include derivatives and investments in other mutual funds. The portfolio advisor invests in companies throughout the world that have the potential for growth and value in their industry and then considers the impact of economic trends. The portfolio advisor to the Fund will actively manage the equity, fixed income, and cash components of the Fund.

Equity investments may include common shares, preferred shares and real estate investment trusts, royalty trusts, and similar high yielding investments.

The portfolio advisor may use techniques such as underlying fundamental analysis to assess growth and value potential. This means evaluating the financial condition and management of each company, its industry, and the overall economy.

Fixed income securities may include investment grade corporate and government fixed income securities throughout the world. The Fund may also invest in bank loans, convertible bonds, floating rate debt instruments and corporate bonds with ratings below investment grade or are unrated.

The Fund may use derivatives, but only as permitted by securities regulations. In order to earn additional income, the Fund may also enter into securities lending transactions, repurchase transactions and reverse repurchase transactions, to the extent permitted by securities regulations.

For a complete discussion of the Fund's investment objective and strategies, please refer to the Fund's most recently filed simplified prospectus.

RISK

No changes affecting the overall level of risk associated with investing in the Fund were made during the period/year. The risks of the Fund remain as discussed in the Fund's most recently filed simplified prospectus or its amendments. The Manager reviews the risk rating for the Fund on an annual basis, at a minimum, based on the methodology mandated by the Canadian Securities Administrators to determine the risk level of the Fund. Any change to the risk rating made during the period/year was as a result of such review and was not a result of any change to the investment objective, strategies or management of the Fund.

RESULTS OF OPERATIONS

The Fund's net assets decreased by \$15.0 million to \$183.0 million from March 31, 2023 to March 31, 2024. The Fund had net redemptions of \$31.3 million during the year. The portfolio's performance increased assets by \$17.4 million. The Fund paid distributions totalling \$1.1 million. Series A shares returned 8.9% after fees and expenses for the one-year period ended March 31, 2024. Over the same time period, the Fund's benchmark returned 10.1%. The benchmark is a combination of the ICE BofA U.S. High Yield Total Return Index (USD) - 40%, the MSCI ACWI Global High Dividend Yield Total Return Index - 20%, the MSCI ACWI Infrastructure Total Return Index - 20% and the MSCI World Real Estate Total Return Index - 20% (the Benchmark or the Index).

The performance of the Fund's other Series is substantially similar to that of Series A shares, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

The U.S. Federal Reserve Board's (Fed) interest rate policy was the market's main preoccupation over the year. The Fed surprised investors with two to three more interest rate increases than anticipated in 2023, and then tempered fourth-quarter enthusiasm when interest rate cuts failed to materialize in the first quarter of 2024. Moderating inflation and strong employment allowed interest rate policy to stabilize, if not peak, which was positive for higher-risk assets and prospective returns for fixed income in general.

The Fund underperformed its benchmark for the year. The Fund's holdings in Quotient Ltd. and SBA Communications Corp. detracted from performance. Quotient failed to deliver on a promised asset divestiture to repay secured notes and to surface a strategic partner to fund commercialization. As a result, the company was forced to raise equity capital at a lower valuation. SBA Communications was negatively affected by expectations that interest rates would likely stay higher for longer. While much of the company's underperformance can be attributed to macroeconomic factors, disappointing guidance for 2024 also played a role in negative market sentiment.

Security selection across both equities and fixed income securities contributed to the Fund's performance. A holding in Northeast Grocery Inc. contributed to performance as the realization of post-merger synergies led to an improved valuation. The Fund's position in The Williams Cos. Inc. also contributed to performance as positive data around U.S. natural gas production growth and natural gas pricing caused market sentiment to improve.

We added new positions Bank of Nova Scotia 8.0% Jan. 27, 2084 and HSBC Holdings PLC 5.719% Mar. 04, 2035. Our financial services exposure remained a key overweight allocation in the Fund, and we continue to expect a positive backdrop for this sector driven by falling interest rates and a robust economy. A new holding in Government of Canada 3.25% Dec. 1, 2033 was added to increase the Fund's exposure to Canadian sovereign debt.

Management Report of Fund Performance for the period/year ended March 31, 2024

We sold a long-time position in Cineplex Inc. 7.5% Feb. 26, 2026. An equity holding in Apartment Income REIT Corp. was also eliminated.

RECENT DEVELOPMENTS

Within fixed income, the combination of short duration (lower sensitivity to interest rates) and high carry has driven attractive returns for high-yield bonds and leveraged loans, even as defaults have risen as expected. Broad equity market strength continues to be driven by moderating inflation and a robust employment picture. However, we expect the current high interest rate environment to impact consumers, mortgage holders and corporate borrowers as we move through 2024.

Incoming economic data remains healthy, and the market's expectation for interest rate cuts has been delayed and muted, in line with our expectation for a measured Fed interest rate policy. This expectation should broadly support valuations for higher-risk assets and businesses with long-lived assets and solid cash flows, which populate the Fund. Interest-rate-sensitive parts of the equity market, notably real estate and infrastructure, have struggled to stay in positive territory and maintain investor interest. However, with peak interest rates largely behind us, we believe the opportunity offered by these sectors remains favourable. In addition, lower government bond yields, which could materialize in second half of 2024, should be positive for the Fund.

(1) This information is derived from the Fund's audited annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on shareholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

(5) This information is provided for the period(s)/year(s) ended March 31.
