INVESTMENT OBJECTIVE AND STRATEGIES

The investment objective of the CI Global Value Fund (the Fund) is to obtain maximum long-term capital growth by identifying securities that the portfolio advisor believes are undervalued and have the potential for future growth. It invests primarily in equity and equity-related securities of companies around the world. The Fund may make large investments in any country, including emerging markets and emerging industries of any market.

The portfolio advisor uses techniques such as fundamental analysis to assess growth potential. This means evaluating the financial condition and management of a company, its industry and the overall economy. The portfolio advisor analyzes financial data, assesses the quality of management, and conducts company interviews.

Fund may use derivatives, but only as permitted by securities regulations. In order to earn additional income, the Fund may also enter into securities lending transactions, repurchase transactions and reverse repurchase transactions, to the extent permitted by securities regulations.

For a complete discussion of the Fund's investment objective and strategies, please refer to the Fund's most recently filed simplified prospectus.

RISK

No changes affecting the overall level of risk associated with investing in the Fund were made during the period/year. The risks of the Fund remain as discussed in the Fund's most recently filed simplified prospectus or its amendments. The Manager reviews the risk rating for the Fund on an annual basis, at a minimum, based on the methodology mandated by the Canadian Securities Administrators to determine the risk level of the Fund. Any change to the risk rating made during the period/year was as a result of such review and was not a result of any change to the investment objective, strategies or management of the Fund.

RESULTS OF OPERATIONS

The Fund's net assets decreased by \$17.3 million to \$60.8 million from March 31, 2022 to March 31, 2023. The Fund had net redemptions of \$18.5 million during the year. The portfolio's performance increased assets by \$2.3 million. The Fund paid distributions totalling \$1.1 million. Series A units returned 3.6% after fees and expenses for the one-year period ended March 31, 2023. Over the same time period, the Fund's benchmark returned 1.0%. The benchmark is the MSCI World Total Return Index (the Benchmark or the Index).

The performance of the Fund's other Series is substantially similar to that of Series A units, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

Global equities delivered their worst quarterly performance since the European sovereign debt crisis (which began in 2009 and lasted several years) during the second quarter of 2022, as uncertainty stemming from inflationary concerns, tightening central bank monetary policies and rising recession risk weighed on markets.

The downturn in equity markets continued during the third quarter of 2022 as concerns over tightening monetary policy, inflationary pressures, weakening economic growth, and geopolitical risks intensified.

During the fourth quarter of 2022, global equity markets recovered strongly, aided by falling inflation expectations, optimism that the U.S. Federal Reserve Board would move away from aggressive monetary policy tightening, an improved energy outlook in Europe, and Chinese President Xi Jinping's unexpected decision to unwind zero-COVID policies.

The first quarter of 2023 was volatile, with global equity markets rebounding sharply in January, dipping in February, and ending positive in March. The failures of SVB Financial Group and Credit Suisse Group AG in mid-March and resulting uncertainty drove significant losses in financial sector stocks, while technology sector stocks benefitted from market expectations that US interest rates have peaked amidst a potential banking crisis, and energy sector stocks declined on fears of reduced demand in a potential recessionary environment.

The Fund outperformed its benchmark for the one-year period ending March 31, 2023. Stock selection in the financials, consumer discretionary, and consumer staples sectors contributed to the Fund's relative performance. Top individual contributors to the Fund's relative performance included holdings in Everest Re Group Ltd., EOG Resources Inc., and Las Vegas Sands Corp. Everest Re Group Ltd. benefited from improving reinsurance industry competitive discipline, which led to a sharp rally in the company's share price. EOG Resources Inc. delivered strong results in the second and third quarters of 2022 owing to higher oil prices, the announcement of a dividend equal to 100% of free cash flow, the introduction of a formulaic cash return policy, and better-than-expected 2023 production and capital expenditure forecasts. Las Vegas Sands Corp. outperformed after China abandoned its zero-COVID policies.

CI Global Value Fund

Management Report of Fund Performance for the period/year ended March 31, 2023

Security selection within the information technology, health care and communication services sectors detracted from the Fund's relative performance. The largest individual detractors from the Fund's relative performance were holdings in Gen Digital Inc., Charter Communications Inc., and Fidelity National Information Services Inc. Gen Digital Inc.'s stock price declined as investors worried about the potential impacts of a recession and rising interest rates. Charter Communications Inc.'s shares declined amid fears over slowing broadband growth and high debt. The company's shares continued to be weak following the announcement of a plan to increase capital spending to expand the company's network. Fidelity National Information Services Inc. reported weak first-quarter 2023 results, particularly in its payments business, where it faces rising competition.

We added a new position in Banco Bilbao Vizcaya Argentaria SA to the Fund. The company's shares rebounded after the company announced strong capital returns and net interest income expansion while benefiting from an improving economic outlook in Spain and Mexico. A new holding in Deutsche Post AG was also added to the Fund. While the company is facing short-term challenges as freight rates normalize, an improvement in efficiency, business mix, and rising supply chain complexity all support a higher earnings level. A holding in Fomento Economico Mexicano SAB de CV was purchased for the Fund. The company is in the midst of a corporate efficiency drive to focus on its core convenience store operations, selling 40% of its holdings in Heineken NV and promising to sell the balance within three years.

A holding in Julius Baer Group Ltd. was eliminated from the Fund because of disappointments on costs and fees. After the company's stock rallied, we sold the Fund's position in the company. We also eliminated a Fund holding in Nintendo Co. Ltd. after strong share price performance. Nintendo Co. Ltd. was a successful investment. We continue to like the company's intellectual property and believe it is taking the right steps to improve its business. However, the company's shares are discounting profitability remaining at high levels despite a worsening consumer spending backdrop. We are skeptical of the company's management execution, which has been poor versus global peers.

RECENT DEVELOPMENTS

Uncertainty over global economic growth, inflation, and financial system stability should continue to drive market volatility. However, periods marked by the reversal of multi-decade trends often create compelling investment opportunities. We remain vigilant about monitoring risks (geopolitical, economic, societal, and market-related) that are likely to persist for some time, but will seek quality companies with durable business models. We will also seek to capitalize on opportunities that arise from near-term volatility.

(1) This information is derived from the Fund's audited annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on unitholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

(5) This information is provided for the period(s)/year(s) ended March 31.
