INVESTMENT OBJECTIVE AND STRATEGIES

The investment objective of the CI Global Quality Dividend Managed Corporate Class (the Fund) is to generate a consistently high level of dividend and interest income by investing, directly or indirectly, primarily in dividend-paying common and preferred shares, debentures, income trusts, equity-related securities and convertible securities of issuers anywhere in the world. Indirect investments can include derivatives and investments in other mutual funds.

The portfolio advisor identifies companies that offer good value relative to its current price and how it is expected to perform.

The portfolio advisor uses techniques such as fundamental analysis to assess value and growth potential. This means evaluating the financial condition and management of a company, its industry and the overall economy.

The Fund may use derivatives to the extent permitted by securities regulations. In order to earn additional income, the Fund may also enter into securities lending transactions, repurchase transactions and reverse repurchase transactions, as permitted by securities regulations. The Fund may hold cash, or invest excess cash in any Canadian or U.S. dollar denominated debt security considered investment grade at the time of investment, and cash equivalents. The Fund may also invest in exchange-traded funds and closed-end funds.

For a complete discussion of the Fund's investment objective and strategies, please refer to the Fund's most recently filed simplified prospectus.

RISK

No changes affecting the overall level of risk associated with investing in the Fund were made during the period/year. The risks of the Fund remain as discussed in the Fund's most recently filed simplified prospectus or its amendments. The Manager reviews the risk rating for the Fund on an annual basis, at a minimum, based on the methodology mandated by the Canadian Securities Administrators to determine the risk level of the Fund. Any change to the risk rating made during the period/year was as a result of such review and was not a result of any change to the investment objective, strategies or management of the Fund.

RESULTS OF OPERATIONS

The Fund's net assets decreased by \$14.6 million to \$21.5 million from March 31, 2022 to March 31, 2023. The Fund had net redemptions of \$12.6 million during the year. The portfolio's performance decreased assets by \$0.2 million. The Fund paid distributions totalling \$1.8 million. Series A shares returned 1.8% after fees and expenses for the one-year period ended March 31, 2023. Over the same time period, the Fund's benchmark returned 0.1%. The benchmark is the MSCI ACWI Total Return Index (the Benchmark or the Index).

The performance of the Fund's other Series is substantially similar to that of Series A shares, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

By the end of 2022, the primary concern of market participants was inflation. However, inflation began to cool and supply chain disruptions eased, as evidenced by declining commodity prices. Investors entered 2023 with extreme optimism that an economic soft landing could be achieved in the United States, with cooling inflation and the U.S. Federal Reserve Board (Fed) close to the end of its interest rate increases. U.S. equities rose as a result but were later challenged by continued strength in the labour market, which is expected to drive higher input costs and inflation.

Financial markets weakened as bank runs hit the news, with the failures of SVB Financial Group and Signature Bank. The Fed and U.S. Treasury came to the rescue quickly, assuring that deposits were safe and announced a new program to allow banks to borrow from the Fed using their holdings of government bonds as collateral. Elsewhere in the world, Credit Suisse Group AG was under stress and was forced to be sold to UBS Group AG in mid-March 2023 at a fraction of its value.

The price of crude oil dipped as low as US\$67. The Organization of the Petroleum Exporting Countries announced a surprise production cut, and the price decline was reversed as investors realized there could still be a supply and demand imbalance during a recession. Given the Canadian equity index has more exposure to banks and energy, the performance of the S&P/TSX Composite Index trailed market indexes in the United States and their global peers.

China failed to impress investors as its government did not announce new policies or measures following the announcement in November 2022 of reopening from COVID-19 pandemic lockdowns. The Chinese government reported weak manufacturing numbers in March 2023, highlighting weakness in both domestic and foreign demand.

CI Global Quality Dividend Managed Corporate Class

Management Report of Fund Performance for the period/year ended March 31, 2023

The Fund outperformed its benchmark for the year. An overweight allocation to international equities contributed to the Fund's performance, as did sector allocation. Overweight exposures to the consumer staples and consumer discretionary sectors contributed to the Fund's performance. Underweight allocations to the information technology, health care, communication services, utilities and real estate sectors also contributed to the Fund's performance. The largest individual contributor to the Fund's performance was a holding in CI WisdomTree U.S. Quality Dividend Growth Index ETF.

An overweight allocation to emerging markets detracted from the Fund's performance, as did security selection within international equities. A notable individual detractor from the Fund's performance was a holding in CI WisdomTree International Quality Dividend Growth Index ETF.

We added a new position in iShares MSCI China ETF to the Fund during the year and eliminated the Fund's position in CI Canadian Banks Covered Call Income Class ETF. We trimmed a number of Fund positions, including those in CI WisdomTree Canada Quality Dividend Growth Index ETF, CI WisdomTree U.S. MidCap Dividend Index ETF, CI WisdomTree Emerging Markets Dividend Index ETF, CI WisdomTree International Quality Dividend Growth Index ETF and CI WisdomTree U.S. Quality Dividend Growth Index ETF.

RECENT DEVELOPMENTS

We believe this economic cycle is likely to end with a slowdown, and we are finding opportunities in company stocks in specific countries/regions (Japan, China and emerging markets) and sectors and sub-sectors (energy, health care and semiconductors). Their share prices in the medium term are supported by demand, though in the near term, their valuations could rise or fall with news headlines.

The Fund has a larger cash allocation. We anticipate bond prices to decline for higher long-term average interest rates and equity valuations to decline to their normal end-of-cycle valuations. Hence, there will be opportunities to add core holdings to the Fund, such as long-dated bonds and U.S. equities.

(1) This information is derived from the Fund's audited annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on shareholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

(5) This information is provided for the period(s)/year(s) ended March 31.
