INVESTMENT OBJECTIVE AND STRATEGIES

The investment objective of the CI Canadian Investment Corporate Class (the Fund) is to obtain maximum long-term capital growth by investing, directly or indirectly, primarily in shares of major Canadian corporations.

To meet the investment objectives of the Fund, the portfolio advisor invests primarily in the securities of the largest companies (by capitalization) listed on the Toronto Stock Exchange, manages the Fund in a disciplined value style, focusing on companies that are considered to be undervalued in relation to their future prospects and offer good absolute and relative value as characterized by measures such as lower-than-average price/book and price/earnings, and higher-than-average dividend yield. The portfolio advisor applies a disciplined, bottom-up stock selection process to evaluate a company's current position and future prospects.

The portfolio advisor may also choose to invest up to 49% of the Fund's assets in foreign securities.

The Fund may use derivatives, but only as permitted by securities regulations. In order to earn additional income, the Fund may also enter into securities lending transactions, repurchase transactions and reverse repurchase transactions, to the extent permitted by securities regulations.

For a complete discussion of the Fund's investment objective and strategies, please refer to the Fund's most recently filed simplified prospectus.

RISK

No changes affecting the overall level of risk associated with investing in the Fund were made during the period/year. The risks of the Fund remain as discussed in the Fund's most recently filed simplified prospectus or its amendments. The Manager reviews the risk rating for the Fund on an annual basis, at a minimum, based on the methodology mandated by the Canadian Securities Administrators to determine the risk level of the Fund. Any change to the risk rating made during the period/year was as a result of such review and was not a result of any change to the investment objective, strategies or management of the Fund.

RESULTS OF OPERATIONS

The Fund's net assets decreased by \$152.9 million to \$250.3 million from March 31, 2022 to March 31, 2023. The Fund had net redemptions of \$80.6 million during the year. The portfolio's performance decreased assets by \$33.1 million. The Fund paid distributions totalling \$39.2 million. Series A shares returned -8.5% after fees and expenses for the one-year period March 31, 2023. Over the same time period, the Fund's benchmark returned -5.2%. The benchmark is the S&P/TSX Composite Total Return Index (the Benchmark or the Index).

The performance of the Fund's other Series is substantially similar to that of Series A shares, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

Rising interest rates throughout the year significantly impacted growth companies. A higher discount rate was particularly impactful for those companies with a large portion of their cash flows in the future. The reverberations of the Russian invasion of Ukraine impacted a variety of commodity prices and contributed to inflationary pressures. While the Canadian banking system is in good shape, there was economic impact of the tightening impact of deposits leaving regional banks for larger banks.

The Fund underperformed its benchmark for the year. Exposure to the information technology sector detracted from the Fund's performance as tightening monetary policy began to increase interest rates, negatively impacting growth-oriented stocks. The Fund's position in Meta Platforms Inc. detracted from performance as tightening monetary policy and increased recession risk raised questions about future advertising spend on the company's platform. Another notable detractor from the Fund's performance was The Bank of Nova Scotia. The company's stock underperformed as the replacement for its departing CEO was a board member with no direct banking experience, creating uncertainty about the bank's strategic direction.

A position in Humana Inc. contributed to the Fund's performance as the company benefited from its defensive characteristics. The Fund's holding in Starbucks Corp. was another notable contributor to performance given its exposure to a China re-opening.

We increased the Fund's exposure to mining by adding new positions in gold producer Agnico Eagle Mines Ltd., copper producer First Quantum Minerals Ltd. and lithium producer Lithium Americas Corp. We also added new Fund positions in Nuvista Energy Ltd. and ARC Resources Ltd. The Fund's energy sector weighting was increased by increasing existing positions in Cenovus Energy Inc., Suncor Energy Inc. and Canadian Natural Resources Ltd. We eliminated health care sector positions in Humana Inc. and Danaher Corp. after strong performance. Holdings in Amazon.com Inc. and Meta Platforms Inc. were eliminated from the Fund to increase the Fund's Canadian exposure.

RECENT DEVELOPMENTS

Canada's resource footprint positions it well to benefit from the upcoming energy transition away from fossil fuels. Copper, a critical metal for the transition, is well represented in Canada. Given our expectation for supply and demand tightness, we have increased the Fund's exposure to position it for a recovery in copper prices.

While there is greater uncertainty with medium-term oil demand, there is a positive supply and demand balance outlook for the shorter term. Increased demand from China's economic reopening from COVID-19 pandemic lockdowns is expected to add to demand in the second half of 2023. The recently announced 1.1 million barrels per day production cut from the Organization of the Petroleum Exporting Countries should help offset the looser supply conditions after the first quarter of 2023.

Outside of resources, we continue to believe that the Canadian economy is closely aligned with that of the US and its markets will continue to reflect this strong relationship. This includes reflecting the risk of an economic slowdown. We will therefore continue to position the Fund to maintain the necessary flexibility to balance the risks of an economic slowdown versus that of a softer landing.

(1) This information is derived from the Fund's audited annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on shareholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

(5) This information is provided for the period(s)/year(s) ended March 31.
