INVESTMENT OBJECTIVE AND STRATEGIES

The investment objective of the CI Canadian Investment Corporate Class (the Fund) is to obtain maximum long-term capital growth by investing, directly or indirectly, primarily in shares of major Canadian corporations.

To meet the investment objectives of the Fund, the portfolio advisor invests primarily in the securities of the largest companies (by capitalization) listed on the Toronto Stock Exchange, manages the Fund in a disciplined value style, focusing on companies that are considered to be undervalued in relation to their future prospects and offer good absolute and relative value as characterized by measures such as lower-than-average price/book and price/earnings, and higher-than-average dividend yield. The portfolio advisor applies a disciplined, bottom-up stock selection process to evaluate a company's current position and future prospects.

The portfolio advisor may also choose to invest up to 49% of the Fund's assets in foreign securities.

The Fund may use derivatives, but only as permitted by securities regulations. In order to earn additional income, the Fund may also enter into securities lending transactions, repurchase transactions and reverse repurchase transactions, to the extent permitted by securities regulations.

For a complete discussion of the Fund's investment objective and strategies, please refer to the Fund's most recently filed simplified prospectus.

RISK

No changes affecting the overall level of risk associated with investing in the Fund were made during the period/year. The risks of the Fund remain as discussed in the Fund's most recently filed simplified prospectus or its amendments. The Manager reviews the risk rating for the Fund on an annual basis, at a minimum, based on the methodology mandated by the Canadian Securities Administrators to determine the risk level of the Fund. Any change to the risk rating made during the period/year was as a result of such review and was not a result of any change to the investment objective, strategies or management of the Fund.

RESULTS OF OPERATIONS

The Fund's net assets decreased by \$22.9 million to \$227.4 million from March 31, 2023 to March 31, 2024. The Fund had net redemptions of \$42.3 million during the year. The portfolio's performance increased assets by \$25.7 million. The Fund paid distributions totalling \$6.3 million. Series A shares returned 10.7% after fees and expenses for the one-year period ended March 31, 2024. Over the same time period, the Fund's benchmark returned 14.0%. The benchmark is the S&P/TSX Composite Total Return Index (the Benchmark or the Index).

The performance of the Fund's other Series is substantially similar to that of Series A shares, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

Higher interest rates had an impact on Canadian housing and by extension the Canadian economy. Cost inflation continued to impact profitability across many sectors. Ongoing strength in the U.S. economy helped to buoy Canadian companies with exposure to U.S. markets. On the other hand, weakness in China's recovery weighed on commodities and companies with exposure to the Chinese economy.

Higher interest rates put pressure on Canadian consumers, which negatively impacted consumer-related equity performance. In addition, the performance in interest rate-sensitive sectors, such as communication services, real estate and utilities, struggled through the year. The top-performing equities in Canada during the year were from the information technology, energy, financials and industrials sectors. The artificial intelligence (Al) theme was a significant driver for the outperformance in the information technology sector.

The Fund underperformed its benchmark for the year. Security selection detracted from the Fund's performance, as did an underweight exposure to information technology. The Fund's position in First Quantum Minerals Ltd. detracted from performance as the Panamanian government shut one of the company's mines amid civil protests and social pressures. A holding in Canadian Tire Corp. Ltd. detracted from the Fund's performance as weakness in Canadian consumer spending put pressure on the company's sales and outlook. The Fund's position in Northland Power Inc. was another detractor from performance. The company's stock underperformed because of rising capital requirements and required financing to complete growth initiatives, followed by the unexpected departure of its CEO.

Stock selection contributed to the Fund's performance, as did an overweight allocation to the industrials sector. Top individual contributors to the Fund's performance were holdings in Amazon.com Inc., Constellation Software Inc. and Thomson Reuters Corp. Amazon.com Inc. benefited from its exposure to Al and strong sales growth driven primarily by resilient U.S. consumers. Constellation Software Inc.'s shares outperformed as a result of the company's ability to deliver on its growth strategy. Thomson Reuters Corp.'s solid business model and growing exposure to Al through recent acquisitions resulted in share price outperformance.

We added new positions in Capstone Copper Corp. and TransAlta Corp. to the Fund. An existing holding in Canadian Pacific Kansas City Ltd. was increased. We eliminated a holding in First Quantum Minerals Ltd. and trimmed the Fund's holding in Thomson Reuters Corp.

RECENT DEVELOPMENTS

Given the weight of housing and higher levels of debt in the Canadian economy, it is not surprising that higher interest rates are having a larger economic impact in Canada than the United States. Therefore, we expect interest rate cuts to come sooner in Canada. We maintain the Fund's neutral weight to the financials sector as we believe Canadian financials should benefit from improving credit books, offsetting net interest rate margins as interest rates decline. However, we continue to hold underweight allocations to interest rate-sensitive sectors such as telecommunications, utilities and real estate. We also maintain exposure to Canadian consumer equities due to attractive valuations and are trimming some of our oil exposure given the high oil prices.

We believe that 2024 will be a year balanced between slowing economic activity and upward pressure on commodities from improving global conditions. As a result, the Fund holds defensive companies in the industrials sector balanced with a market weight in commodities. Given disruptions in the copper market, the market is tight, and therefore, the Fund holds an overweight allocation to equities exposed to production of copper. Lastly, given rising geopolitical tensions in Israel and Ukraine and expectations for U.S. interest rate cuts in 2024, we maintain a position in gold equities.

⁽¹⁾ This information is derived from the Fund's audited annual financial statements.

(5) This information is provided for the period(s)/year(s) ended March 31.

⁽²⁾ Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on shareholder residency and can be different from 13%.

⁽³⁾ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

⁽⁴⁾ The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.
