INVESTMENT OBJECTIVE AND STRATEGIES

The investment objective of the CI Global Dividend Opportunities Fund (the Fund) is to achieve a high level of total investment return, consisting of dividend income and capital gains. It invests primarily, directly or indirectly, in equity securities of companies anywhere in the world that pay, or may be expected to pay, dividends.

To achieve the investment objective of the Fund, the portfolio advisor seeks companies that offer good value and the potential for growth in their industry. The portfolio advisor may use techniques such as fundamental analysis to assess growth potential and valuation. This means evaluating the financial condition and management of each company, its industry and the overall economy. As part of this evaluation, the portfolio advisor analyzes financial data and other information sources, assesses the quality of management and conducts company interviews.

For a complete discussion of the Fund's investment objective and strategies, please refer to the Fund's most recently filed simplified prospectus.

RISK

No changes affecting the overall level of risk associated with investing in the Fund were made during the period/year. The risks of the Fund remain as discussed in the Fund's most recently filed simplified prospectus or its amendments. The Manager reviews the risk rating for the Fund on an annual basis, at a minimum, based on the methodology mandated by the Canadian Securities Administrators to determine the risk level of the Fund. Any change to the risk rating made during the period/year was as a result of such review and was not a result of any change to the investment objective, strategies or management of the Fund.

RESULTS OF OPERATIONS

The Fund's net assets decreased by \$158.4 million to \$843.8 million from March 31, 2022 to March 31, 2023. The Fund had net redemptions of \$128.0 million during the year. The portfolio's performance decreased assets by \$7.6 million. The Fund paid distributions totalling \$22.8 million. Series A units returned -1.6% after fees and expenses for the one-year period ended March 31, 2023. Over the same time period, the Fund's benchmark returned 1.0%. The benchmark is the MSCI World Total Return Index (the Benchmark or the Index).

The performance of the Fund's other Series is substantially similar to that of Series A units, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

For most of 2022, equity markets were under pressure as interest rates continued to rise. Expectations of an early end to monetary tightening saw equities rebound in the fourth quarter of 2022. The rebound continued into the early part of 2023, with European equities outperforming as fears of another energy shock subsided as a mild winter dampened the risk of another rise in natural gas prices. However, the equity rebound stalled as the first quarter of 2023 progressed as investors had to rethink how aggressive the U.S. monetary tightening cycle might be as core inflation remained stubbornly high. A similar situation was evident in Europe. The regional banking crisis in the U.S. and the situation around Credit Suisse Group AG dampened risk sentiment but did not prevent most sectors, except energy, to end the first quarter of 2023 in positive territory.

The Fund underperformed its benchmark for the year. Security selection, particularly in the financials, consumer discretionary and communication services sectors, detracted from the Fund's performance. Underweight exposures to the energy and communication services sectors detracted from the Fund's performance, as did an overweight allocation to China and underweight allocations to France and Australia. A key individual detractor from the Fund's performance was a holding in First Republic Bank, which was adversely affected by the U.S. regional banking crisis and the takeover of Credit Suisse Group AG by UBS Group AG. A holding in Altice USA Inc. was another notable detractor from the Fund's performance.

The Fund's cash allocation contributed to its performance in a challenging backdrop for equities. An underweight allocation to the consumer discretionary sector and underweight allocation to the information technology sector also contributed to the Fund's performance. An overweight exposure to the United Kingdom and Ireland contributed to the Fund's performance. Top individual contributors to the Fund's performance included holdings in McKesson Corp., Advanced Micro Devices Inc. and Apple Inc. Pharmaceutical company McKesson Corp. benefited from its defensive characteristics as investors sought safer investment options as higher interest rates weighed on equity markets. Advanced Micro Devices Inc. and Apple Inc. were also strong performers during the year.

CI Global Dividend Opportunities Fund

Management Report of Fund Performance for the period/year ended March 31, 2023

We added a new position in AECOM to the Fund. After a few years of painful restructuring, the company has emerged as a strong beneficiary of a multi-year public infrastructure spending cycle in the United States. AECOM has divested its less profitable government services business and sold its at-risk power and civil construction business as well as its oil and gas division. The company also has initiated a plan to exit over 30 unprofitable geographies and increase higher-margin program management and advisory work. We eliminated the Fund's positions in First Republic Bank after it became clear that most regional banks would be swept up in the deposit flight worries after SVB Financial Group and Signature Bank failed.

RECENT DEVELOPMENTS

The probability of a recession in the United States has increased significantly as credit lending standards will likely continue to tighten after the turmoil in the country's regional banking sector. This could extend to Europe after the Swiss banking crisis. The tightening of lending standards is coming at a time when the U.S. economy was already showing signs of a slowdown. Though U.S. employment has held up surprisingly well despite the aggressive interest rate increases, large layoff announcements by U.S. companies in late 2022 and early 2023 suggest that the employment situation could weaken going forward. The U.S. housing market, especially construction activity, has also peaked and remains a concern with a decline in building permits, apartment sales, new home prices and record-low housing affordability. Equity valuations are not yet pricing in a deeper recession.

On the positive side, inflation is expected to trend downward, and short-term U.S. interest rates are close to peaking. We continue to position the Fund with a defensive bias and have added back high-quality information technology sector stocks to reduce the Fund's underweight allocation to this sector.

(1) This information is derived from the Fund's audited annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on unitholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

(5) This information is provided for the period(s)/year(s) ended March 31.
