INVESTMENT OBJECTIVE AND STRATEGIES

The investment objective of the CI International Equity Fund (the Fund) is to seek long-term capital growth by investing primarily in equity securities of companies located outside of Canada and the United States.

When selecting securities for the Fund, the portfolio advisor evaluates the merits of each company in terms of its leadership position within its industry, the strength of management, profit growth and the potential for capital appreciation. In order to develop a proprietary view of the company, the portfolio advisor also considers overall macro-economic conditions, historical financial performance of the company, trends and technological changes in the business, sensitivity to economic factors, as well as other factors which may affect the future economics of the business.

For a complete discussion of the Fund's investment objective and strategies, please refer to the Fund's most recently filed simplified prospectus.

RISK

No changes affecting the overall level of risk associated with investing in the Fund were made during the period/year. The risks of the Fund remain as discussed in the Fund's most recently filed simplified prospectus or its amendments. The Manager reviews the risk rating for the Fund on an annual basis, at a minimum, based on the methodology mandated by the Canadian Securities Administrators to determine the risk level of the Fund. Any change to the risk rating made during the period/year was as a result of such review and was not a result of any change to the investment objective, strategies or management of the Fund.

RESULTS OF OPERATIONS

The Fund's net assets decreased by \$72.9 million to \$920.7 million from March 31, 2023 to March 31, 2024. The Fund had net redemptions of \$106.1 million during the year. The portfolio's performance increased assets by \$83.4 million. The Fund paid distributions totalling \$50.2 million. Series A units returned 7.7% after fees and expenses for the one-year period ended March 31, 2024. Over the same time period, the Fund's benchmark returned 15.6%. The benchmark is the MSCI EAFE Total Return Index (the Benchmark or the Index).

The performance of the Fund's other Series is substantially similar to that of Series A units, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

International equities, as defined by the MSCI ACWI ex-USA Index, rose 13.3% over the period, in U.S.-dollar terms. However, equity markets were narrowly led and dominated by large-capitalization stocks and optimism around artificial intelligence, weight-loss drugs and expected monetary policy easing from central bankers. The broader, equal-weighted market, as measured by the MSCI ACWI ex-USA Equally Weighted Index, only rose 2.2%, in U.S.-dollar terms.

U.S. stock valuations appeared stretched, but there were opportunities in smaller- and mid-capitalization companies and in value stocks. Developed market international stocks traded at a significant discount to their U.S. peers. Emerging market equities traded at a low valuation but concerns over China and other geopolitical challenges led to negative investor sentiment for the region.

The Fund underperformed its benchmark during the twelve-month period. Stock selection within the financials sector detracted most from the Fund's performance. Stock selection in the information technology, consumer discretionary, industrials and health care sectors also detracted from the Fund's performance, as did an underweight allocation to the industrials sector. The largest individual detractors from the Fund's performance were holdings in Worldline SA, Alibaba Group Holding Ltd. and Tate & Lyle PLC. Worldline SA experienced a slowdown in its higher-margin consumption areas in Europe, namely bars and restaurants. Alibaba Group Holding Ltd.'s shares were weak amid increased competition and a slowdown in the Chinese economy. Tate & Lyle PLC was affected by volume pressure from soft consumer demand, customer de-stocking and a declining contribution from price increases to offset higher input costs.

Stock selection within the communication services, materials, consumer staples and energy sectors contributed to the Fund's performance. Top individual contributors to the Fund's performance included holdings in Indus Towers Ltd., Heidelberg Materials AG and Galp Energia SGPS SA. One of Indus Towers Ltd.'s significant customers, Vodafone Idea Ltd., faced intense competition and lost wireless subscribers to its competitors. The Indian government and debt holders have agreed to take an equity stake in the company, allowing it to refinance debt and free up cash to pay vendors. In its most recent quarterly report, Indus Towers Ltd. noted better-than-expected earnings, primarily related to improved collections from Vodafone Idea. Heidelberg Materials AG benefited from record revenue and earnings results for 2023. Galp Energia SGPS SA's stock rose on news that the company had made another oil discovery off the coast of Namibia.

RECENT DEVELOPMENTS

Global growth is expected to remain low in 2024 given the effects of tighter monetary policy. U.S. growth continues to be positive, while Europe and the United Kingdom remain weak. The Japanese economy remains stable, but higher-than-expected inflation resulting from wage growth and rising prices led the Bank of Japan to end its negative interest rate policy and raise interest rates for the first time since 2007. China's struggling property market, uncertainty around economic policy and high youth unemployment are weighing on growth.

Global debt levels are on the rise, and higher borrowing costs resulting from rising interest rates have put increased pressure on all borrowers.

The coming year will be an important one on the political front, which adds to uncertainty and volatility, as many countries around the globe will be holding an election in 2024.

Our investment process is focused on the long term and uncovering overlooked and underappreciated global opportunities. We call this identifying winning businesses, businesses that are (or have the potential to be) leaders in their field, and then acquiring them at a discount from what we think they are worth in the future. Over time, this approach should earn an attractive rate of return for investors.

(1) This information is derived from the Fund's audited annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on unitholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

(5) This information is provided for the period(s)/year(s) ended March 31.
