INVESTMENT OBJECTIVE AND STRATEGIES

The investment objective of the CI International Equity Corporate Class (the Fund) is to seek long-term capital growth by investing, directly or indirectly, in equity securities of companies located outside of Canada and the United States. Indirect investments may include convertible securities, derivatives, equity-related securities and securities of other mutual funds.

The Fund currently achieves its investment objective by investing all of its assets in CI International Equity Fund (the Underlying Fund).

When selecting securities for the Underlying Fund, the portfolio advisor evaluates the merits of each company in terms of its leadership position within its industry, the strength of management, profit growth and the potential for capital appreciation. In order to develop a proprietary view of the company, the portfolio advisor also considers overall macro-economic conditions, historical financial performance of the company, trends and technological changes in the business, sensitivity to economic factors, as well as other factors which may affect the future economics of the business.

For a complete discussion of the Fund's and the Underlying Fund's respective investment objective and strategies, please refer to the Fund's and the Underlying Fund's most recently filed simplified prospectus.

RISK

No changes affecting the overall level of risk associated with investing in the Fund were made during the period/year. The risks of the Fund remain as discussed in the Fund's most recently filed simplified prospectus or its amendments. The Manager reviews the risk rating for the Fund on an annual basis, at a minimum, based on the methodology mandated by the Canadian Securities Administrators to determine the risk level of the Fund. Any change to the risk rating made during the period/year was as a result of such review and was not a result of any change to the investment objective, strategies or management of the Fund.

RESULTS OF OPERATIONS

The Fund's net assets decreased by \$78.4 million to \$178.8 million from March 31, 2022 to March 31, 2023. The Fund had net redemptions of \$85.9 million during the year. The portfolio's performance increased assets by \$7.8 million. The Fund paid distributions totalling \$0.3 million. Series A shares returned 6.4% after fees and expenses for the one-year period ended March 31, 2023. Over the same time period, the Fund's benchmark returned 7.2%. The benchmark is the MSCI EAFE Total Return Index (the Benchmark or the Index).

The performance of the Fund's other Series is substantially similar to that of Series A shares, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

The following commentary pertains to the results of operations of the CI International Equity Fund (the Underlying Fund).

The year was characterized by global uncertainty resulting from the Russia-Ukraine war and its impact on inflation and supply chains, as well as central banks' raising of interest rates in response. Non-U.S. equities, as defined by the MSCI ACWI ex-USA Index, declined 5.1% (in U.S.-dollar terms) for the year. However, investors entered 2023 with optimism surrounding China's reopening from COVID-19 pandemic lockdowns, followed by a drop in February as high inflation caused investors to reassess riskier assets. The early March market dip caused by the collapse of two U.S. regional banks and a quick sale of Credit Suisse Group AG to UBS Group AG proved short-lived. Investors again embraced risk, with volatile equity markets ending the first quarter of 2023 higher.

The Underlying Fund underperformed its benchmark for the year. Stock selection within the consumer discretionary, communication services, information technology and energy sectors detracted from the Underlying Fund's performance. The largest individual detractors from the Underlying Fund's performance were holdings in Rakuten Group Inc., Telefonaktiebolaget LM Ericsson and Indus Towers Ltd. Rakuten Group Inc. delivered revenue growth in all three of its segments for 2022, but ongoing strategic investment in the mobile segment led to an operating loss. Telefonaktiebolaget LM Ericsson reported stronger sales in 2022, but its profitability was negatively impacted by higher input costs, increased research and development investments, and one-off charges. Indus Towers Ltd.'s shares were weak due to a telecommunications market shift in India, which led to one of its main customers losing market share, which resulted in substantial unpaid payment obligations that are due to Indus Towers.

Management Report of Fund Performance for the period/year ended March 31, 2023

Stock selection in the materials, consumer staples, financials and industrials sectors contributed to the Underlying Fund's performance. Top individual contributors to the Underlying Fund's performance included HeidelbergCement AG, BAE Systems PLC and STMicroelectronics NV. HeidelbergCement AG announced record calendar-year revenue for 2022, with price increases more than offsetting the decline in volumes. BAE Systems PLC's shares performed well given continued geopolitical uncertainty and heightened concerns around cyber security. The company's sales were up 4.4% in 2022 and underlying earnings before interest and tax was up 5.5%. For 2023, the company expects higher revenue and earnings given expectations of increased military spending. STMicroelectronics NV beat fourth-quarter 2022 sales and earnings expectations, as strong demand from automotive and industrial customers helped buffer a challenging economic environment.

We added new positions in Essity AB, NICE Ltd. and Worldline SA to the Underlying Fund. Essity AB is a leading health and hygiene company with a strategic focus on higher-margin, valued-added categories in personal care. NICE Ltd. is an Israel-based enterprise software company. The company provides on-premises and cloud-based software applications for workforce engagement management and workforce optimization. Worldline SA, a payment service provider offering merchant acquiring, payment processing and payment infrastructure solutions to merchants and banks, was also added to the Underlying Fund. The company's 2020 acquisition of Ingenico added a leading global point-of-sale terminal business to its portfolio.

We eliminated a Underlying Fund position in Koninklijke Boskalis Westminster NV after the company's share price rose due to a buyout offer from its majority shareholder, HAL Holding NV. A holding in GSK PLC was sold from the Underlying Fund. The company's shares have performed well given the company's renewed focus on innovative biopharmaceuticals and its plan to spin out its consumer health care business, Haleon. A holding in Sinopharm Group Co. was sold from the Underlying Fund in favour of new ideas with a higher future return potential. The company's share price has underperformed amid ongoing growth and margin pressure on drug distribution due to volume-based procurement regulations in China.

Overall, the Fund underperformed its benchmark for the year.

RECENT DEVELOPMENTS

Global economic growth will likely continue to slow this year as rising interest rates and geopolitical uncertainty weigh on activity. Demand-driven inflation in supply chains has begun to ease, and commodity price inflation is also normalizing. However, a tight labour market has increased workers' bargaining power, and a historic worker shortage has pushed up wages.

Globally, corporate profits have remained resilient, given that companies have been able to increase prices to offset rising costs. However, labour inflation, slowing growth and tighter monetary conditions should make volume growth harder to achieve in 2023 and 2024. Equity markets have adjusted to higher interest rates, but inflation will likely weigh on profits even as revenues grow. Stock valuations are less demanding in foreign markets, such as Europe, the United Kingdom and Japan, versus the United States.

(1) This information is derived from the Fund's audited annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on shareholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

(5) This information is provided for the period(s)/year(s) ended March 31.
