INVESTMENT OBJECTIVE AND STRATEGIES

The investment objective of the CI Canadian Core Plus Bond Fund (the Fund) is to provide stability of capital and income with the potential for capital appreciation. The Fund aims to achieve its investment objective by investing primarily in a portfolio of fixed-income securities issued by Canadian and foreign governments and corporations.

The majority of the Fund's assets will be invested in a diversified portfolio of fixed income securities of any credit quality or term issued by Canadian, U.S. and other foreign governments and corporations. The Fund may also invest in asset-backed securities, mortgage-backed securities, bank loans and floating rate debt instruments.

The portfolio advisor may use techniques such as fundamental analysis to assess cash flow and growth potential. This means evaluating the financial condition and management of each issuer, its industry and the overall economy. As part of this evaluation, the portfolio advisor analyzes interest rates, the yield curve, credit ratings, credit risk, financial data and the quality of management.

For a complete discussion of the Fund's investment objective and strategies, please refer to the Fund's most recently filed simplified prospectus.

RISK

No changes affecting the overall level of risk associated with investing in the Fund were made during the period/year. The risks of the Fund remain as discussed in the Fund's most recently filed simplified prospectus or its amendments. The Manager reviews the risk rating for the Fund on an annual basis, at a minimum, based on the methodology mandated by the Canadian Securities Administrators to determine the risk level of the Fund. Any change to the risk rating made during the period/year was as a result of such review and was not a result of any change to the investment objective, strategies or management of the Fund.

RESULTS OF OPERATIONS

The Fund's net assets increased by \$49.9 million to \$1,187.0 million from March 31, 2022 to March 31, 2023. The Fund had net sales of \$222.8 million during the year. The portfolio's performance decreased assets by \$124.8 million. The Fund paid distributions totalling \$48.1 million. Series I units returned -9.3% after fees and expenses for the one-year period March 31, 2023. Over the same time period, the Fund's benchmark returned -2.0%. The benchmark is the FTSE Canada Universe Bond Total Return Index (the Benchmark or the Index).

The performance of the Fund's other Series is substantially similar to that of Series I units, except for differences in the structure of fees and expenses. For the returns of the Fund's other Series, please refer to the "Past Performance" section.

Rising inflation during the year drove bond yields higher. Economic growth continued to slow, which raised the risk of recession across many geographies. Failures of a handful of U.S. regional banks in March 2023 led to a widening of credit spreads (the yield differential between securities of similar maturities but differing credit quality), especially in the financials sector.

The Fund underperformed its benchmark for the year. Exposure to U.S. Treasuries rather than Canadian bonds detracted from the Fund's performance as U.S. Treasuries underperformed. An overweight allocation to the financials sector also detracted from the Fund's performance, as did security selection. The largest individual detractors from the Fund's performance included Teekay Offshore Partners L.P. 8.5% Jul. 15, 2023 and U.S. Treasury 1.625% Nov. 15, 2050 bonds, as well as perpetual bonds issued by The Toronto-Dominion Bank (3.662%), Royal Bank of Canada (3.65%) and Bank of Montreal (3.852%).

Inflation exceeding expectations drove strong performance in real return bonds (RRBs). Top individual contributors to the Fund's performance included holdings in TELUS Corp. 3.875% Sep. 30, 2029 bonds, Government of Canada 4.0% Dec. 1, 2031 RRBs, Province of Ontario 2.55% Dec. 2, 2052 bonds and Province of Manitoba 2.05% Jun. 2, 2031 bonds.

We added a new Fund holding in Government of Canada 4.0% Dec. 1, 2031 RRBs and increased an existing Fund position in perpetual bonds issued by The Toronto-Dominion Bank (3.662%). A holding of Teekay Offshore Partners L.P. 8.5% Jul. 15, 2023 bonds was eliminated from the Fund and a holding in Bank of Montreal 3.19% Mar. 1, 2028 bonds was trimmed.

RECENT DEVELOPMENTS

Economic data continues to point towards higher risk of recession. Combined with the recent financials sector turmoil, significant risks to the economy remain. We favour investment in high-quality credits and adding duration (sensitivity to interest rates) through sovereign bond holdings.

(1) This information is derived from the Fund's audited annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on unitholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.
