RESULTS OF OPERATIONS

The Fund's net assets increased by \$1.5 million to \$69.6 million from March 31, 2023 to September 30, 2023. The Fund had net sales of \$8.8 million during the period. The portfolio's performance decreased assets by \$7.3 million. Series I units returned -9.8% after fees and expenses for the six-month period ended September 30, 2023. Over the same time period, the Fund's benchmark returned -8.9%. The benchmark is the FTSE Canada Long Term Bond Total Return Index (the Benchmark or the Index).

Although inflation declined during the period, it remained elevated at around 4%. It moved higher in September and is expected to remain high in the near term given the rise in oil prices. Consumer spending generally came in stronger than expected and labour markets remained robust. This contributed to investor concerns that interest rates may need to rise further or remain higher for longer. The combination of elevated inflation, stronger-than-expected consumer spending and robust labour markets drove bond yields significantly higher across the yield curve over the period.

The Fund underperformed its benchmark for the period. The Fund's higher duration in government bonds than the benchmark detracted from performance. Exposure to longer-duration U.S. Treasuries detracted from the Fund's performance as they underperformed longer-duration Canadian government bonds. The largest individual detractors from the Fund's performance included U.S. Treasury bonds 1.625% Nov. 15, 2050, 1.25% May 15, 2050 and 3.625% Feb. 15, 2053.

An overweight allocation to corporate bonds contributed to the Fund's performance as this segment outperformed government debt. Security selection contributed to performance as one of the Fund's equity holdings performed well. Top individual contributors to the Fund's performance included an equity holding in Teekay Offshore Partners L.P., which reported stronger company fundamentals. A floating-rate bond holding in Constellation Software Inc. (Mar. 31, 2040) contributed to the Fund's performance. Its coupon is indexed to inflation, which helped it to outperform long-duration (sensitivity to interest rates) bonds.

We added a new holding in a floating-rate bond issued by Constellation Software Inc. (Mar. 31, 2040) to the Fund and increased an existing holding in Province of Ontario 2.55% Dec. 2, 2052 bonds. A holding in Province of Manitoba 3.8% Sep. 5, 2053 bonds was eliminated from the Fund, and a holding of preferred shares issued by The Toronto-Dominion Bank (5.75%) was trimmed.

RECENT DEVELOPMENTS

Economic conditions continue to unfold as expected. While labour markets and consumer spending remain stronger than expected, economic data continues to weaken as higher interest rates take hold. Lending conditions are tightening, and higher interest rates are starting to drive delinquencies and bankruptcies higher. Central banks are still uncomfortable with relatively high inflation. Thus, interest rates are likely to stay higher for longer to tame inflation, which poses a risk of recession over the next six months. To manage risk, we are maintaining higher duration in government bonds within the Fund and are focused on high-quality corporate bonds to add additional yield.

RELATED PARTY TRANSACTIONS

Manager, Portfolio Adviser, Trustee and Registrar

CI Investments Inc. is the Manager, Portfolio Adviser, Trustee and Registrar of the Fund. CI Investments Inc. is a subsidiary of CI Financial Corp. The Manager, in consideration for management fees, provides management services required in the day-to-day operations of the Fund. The Manager bears all of the operating expenses of the Fund (other than taxes, borrowing costs and new governmental fees) in return for an administration fee.

The Fund only offers Series I units, thus management and administration fees are negotiated directly with each investor and paid directly to the Manager as per Series I Account Agreement Fee. Please refer to Part A of the simplified prospectus for further details.

Independent Review Committee

The Manager, in respect of the Fund, received the following standing instructions from the Independent Review Committee (IRC) with respect to related party transactions:

The applicable standing instructions require, amongst others, that related party transactions be conducted in accordance with the Manager's policies and procedures and applicable law and that the Manager reports related party transactions periodically to the IRC and advise the IRC of any material breach of such policies. The Manager's policies and procedures require that investment decisions in respect of related party transactions (a) are free from any influence by an entity related to the Manager and without taking into account any consideration relevant to an entity related to the Manager; (b) represent the business judgment of the Manager, uninfluenced by considerations other than the best interests of the Fund; (c) do not exceed the limitations of the applicable legislation; and (d) achieve a fair and reasonable result for the Fund.

Except as otherwise noted above under Related Party Transactions section, the Fund was not a party to any related party transactions during the period/year ended September 30, 2023. If the Fund invested in related party transactions, it relied on the IRC's standing instructions regarding related party transactions during this reporting period/year.

(1) This information is derived from the Fund's semi-annual and annual financial statements.

(2) Management expense ratio is calculated based on expenses charged to the Fund (excluding commissions and other portfolio transaction costs) and is expressed as an annualized percentage of daily average net assets for the period/year, including the Fund's proportionate share of any underlying fund(s) expenses, if applicable. The Effective HST tax rate is calculated using the attribution percentage for each province based on unitholder residency and can be different from 13%.

(3) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period/year, including the Fund's proportionate share of such expenses of any underlying fund(s), if applicable.

(4) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the fiscal period/year. The higher a Fund's portfolio turnover rate in a period/year, the greater the trading costs payable by the Fund in the period/year, and the greater the chance of an investor receiving taxable capital gains in the period/year. There is not necessarily a relationship between a higher turnover rate and the performance of a Fund. Portfolio turnover rate is calculated by dividing the lesser of the cost of purchases and the proceeds of sales of portfolio securities for the period/year, and excluding cash and short-term investments maturing in less than one year, and before assets acquired from a merger, if applicable, by the average of the monthly fair value of investments during the period/year.

(5) This information is provided for the period(s)/year(s) ended September 30, 2023 and March 31.

PAST PERFORMANCE

This section describes how the Fund has performed in the past. Remember, past returns do not indicate how the Fund will perform in the future. The information shown assumes that distributions made by the Fund in the period(s)/year(s) shown were reinvested in additional units of the Fund or relevant Series/Class of the Fund, as applicable. In addition, the information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance.

Year-by-Year Returns

The following chart/charts shows/show the Fund's semi-annual and annual performance for each of the period(s)/year(s) shown and illustrates/illustrate how the Fund's performance has changed from period/year to period/year. In percentage terms, the chart/charts shows/show how much an investment made on the first day of each financial period/year would have grown or decreased by the last day of each financial period/year, except where noted.

¹ 2019 return is for the period from November 15, 2018 to March 31, 2019.
